✓ SECOND ANNUAL GENERAL AVIATION FLY-IN: All pilots are invited to attend the second annual aviation "fly in" to be held October 1, 1960 at the Federal Aviation Agency's National Aviation Facilities Experimental Center at Atlantic City, New Jersey."

AIRCRAFT MANEUVERS WITHIN CONTROL ZONES: To reduce the potential for in-flight conflict between aircraft operated in the vicinity of controlled airports in VFR weather conditions, FAA airport traffic control specialists will approve only those maneuvers considered necessary for the safe and expeditious movement of air traffic within the associated control zones. For this purpose, maneuvers such as operation of aircraft at speeds in excess of the minimum speed consistent with safe operational limitations of an aircraft, formation fly-bys, and unnecessary low passes, will be considered as unusual and will not be approved.

Maneuvers which will be approved, on a traffic permitting basis, include:

1. Normal take-offs and landings including 360° overhead approaches and those conducted in formation.
2. Practice instrument approaches including those conducted with a chase plane.
3. Touch-and-go landings.
4. Flight check activities such as short field take-offs and landings, engine out operations, checking of navigational aids, etc.
5. Simulated forced landing patterns including practice flame-out maneuvers.
6. Low passes for prearranged aircraft test or calibration purposes and visual equipment checks, such as gear checks, provided the flights are not conducted at an excessive speed.
7. Jettisoning of fuel tanks or other external stores.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Volume 13 dated December 1959, as follows:

(1) Table of Contents: change page number for "Visibility - Type and Programs" from "34" to "35".

(2) Page 1, last paragraph under General information delete 272.7 mc in the 3rd and 5th lines.

Radiated Test Signals:

(1) Page 15 add - *Fort Worth(Meacham 108.2 mc).

VOR Receiver Check Points:

(1) Page 17 add - Houghton, Michigan(County Mem'l): -- 241°; 3.5 nmi from arpt; alt. 2100'.

(2) Page 18 add - Lake Charles, Louisiana (McFillen Airpark : -- 305°; over Lake Charles H facil, dist 2.9 nmi from VOR.

(3) Page 20 Spokane, Washington - change to: Spokane, Washington (Int'l).

(4) Page 25, Tulsa, Oklahoma -change Lctn #1 to: 258°; Int S boundary taxi-strip and rnwy 30-12 ; Lctn #2 to: 266°; SW corner AA ramp at mid center ; Lctn #3 to: 265°; bend in taxi-strip at N end to rnwy 17L; and delete Lctn #4.

FAA and WB Telephone Numbers:

(1) Page 36, Tuscon, Arizona - change FAA telephone number to: AXminster 4-1463.

(2) Page 37, Fort Wayne, Indiana- correct to read: WB S 2577* and FAA S 2644.

(3) Page 37, Indianapolis, Indiana - change FAA telephone number to: CH 4-9561.

(4) Page 38, Greenwood, Mississippi - delete WB telephone number and add FAA telephone number: GL 3-2631.

(5) Page 38, delete - Farmington, Missouri FAA telephone number

(6) Page 38 add - Cape Girardeau, Missouri FAA telephone number EDgewater 4-2803.

(7) Page 40, Salt Lake City, Utah - change WB telephone number to: EMpire 3-9267*.

(8) Page 49 - Search and Rescue under Coast Guard Air Stations and Air Detachments change Miami, Fla to read: Miami, Fla; Dinner Key; HIghland 8-2674.

Standard Broadcast Stations:

(1) Page 100, Rochester, Minnesota KROC - change power to - 1.00 days, 0.25 ngts; location to - W edge 44-01-46, 92-29-31; elevation to - 1180'; height to - 180'; Type to - directional- days, non directional ngts.

(2) Page 101 Libby, Montana KOLL - change call letters to: KLCB.

(3) Page 107 Renton, Washington KQDE - change call letters to: KUDY.

(4) Page 108 Latysmith, Wisconsin WLDY - change power to - 1.00 days; 0.25 ngts; and latitude to 45-28-30.

(5) Page 99 Annapolis, Maryland WNAV - change power to - 5.00 days; 1.00 ngts; latitude to - 38-58-58 and height to - 385'.

Flight Test Areas:

(1) Page 118 add - Butler, Missouri - See this issue of Airgi page

(2) Page 118 add - Creve Coeur Airport, Missouri - See this issue of Airgi page

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route" published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

1. Radar Advisory Areas

a. No additional operational restriction, control or communication requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operated within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Basic Mark X equipped military flights operating within radar advisory areas will adjust transponders to operate on Mode 3. Unless otherwise instructed by air traffic control, Mark X SIF equipped flights will adjust transponder to Mode 3, Code 62, except that ADC flights will adjust transponder to Mode 3, Code 00. Those military flights operating on a mode other than Mode 3 will adjust transponder to operate on Mode 3 and the assigned mode simultaneously. Civil turbojet transponders will be adjusted to reply on Mode A, Code **40**. Other civil aircraft will adjust transponder to reply on Mode A, Code 62.

b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.

c. In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.

2. Nonradar Advisory Areas

The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.

a. Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.

b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information and radar vectors to avoid observed traffic. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
2. In the event of loss of communication with a USAF(ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR/VORTAC Jet Route No. 1 (Los Angeles, Calif., to Seattle, Washington)
2. VOR/VORTAC Jet Route No. 2 (Houston, Texas to Lake Charles, La.) (Houston, Texas to New Orleans, La. Effective 5 May 1960.)
3. VOR/VORTAC Jet Route No. 3 (Oakland, Calif., to Spokane, Wash.)
4. VOR/VORTAC Jet Route No. 4 (Los Angeles, Calif., to Phoenix, Ariz.
5. VOR/VORTAC Jet Route No. 8 (Tulsa, Okla., to New York, N.Y.)
6. VOR/VORTAC Jet Route No. 12 (Baltimore, Md., to Pittsburgh, Pa.)
7. VOR/VORTAC Jet Route No. 14 (Cleveland, Ohio to Idlewild, N.Y..
8. VOR/VORTAC Jet Route No. 16 (Portland, Ore., to Pullman, Mich.,; Albany, N.Y. to Boston, Mass.) Nonradar advisory area from 60 nmi W of Dillon, Mont., VOR to 90 nmi E of Dillon.
9. VOR/VORTAC Jet Route No. 21 (Omaha, Neb., to Duluth, Minn.) (Dallas, Tex., to San Antonio, Tex.)
10. VOR/VORTAC Jet Route No. 22 (Lake Charles, La.,to intersection with J55V).
11. VOR/VORTAC Jet Route No. 24 (Phoenix, Ariz., to Albuquerque, N.M.)
12. VOR/VORTAC Jet Route No. 25 (Dallas, Tex., to Tulsa, Okla.)
13. VOR/VORTAC Jet Route No. 26 (Amarillo, Tex., to Appleton, Ohio.)
14. VOR/VORTAC Jet Route No. 29 (Houston, Tex., to Memphis, Tenn.)
15. VOR/VORTAC Jet Route No. 31 (Dallas, Tex., to Chicago, Ill.)
16. VOR/VORTAC Jet Route No. 33 (Shreveport, La., to the Int. with J31V and Kansas City, Mo., to Des Moines, Iowa.)
17. VOR/VORTAC Jet Route No. 34 (Cleveland, Ohio to Pittsburgh, Pa.)
18. VOR/VORTAC Jet Route No. 35 (New Orleans, La., to St. Louis, Mo.)
19. VOR/VORTAC Jet Route No. 37 (New Orleans, La., to Spartanburg, S.C.)
20. VOR/VORTAC Jet Route No. 42 (Dallas, Tex., to New York, N.Y.)
21. VOR/VORTAC Jet Route No. 45 (Alma, Ga., to St. Louis, Mo.)
22. VOR/VORTAC Jet Route No. 49 (Alma, Ga., to Spartanburg, S.C.)
23. VOR/VORTAC Jet Route No. 52 (Dallas, Tex., to Atlanta, Ga.) via Texarkana, Ark., VOR; Greenwood, Miss., VOR; Birmingham, Ala., VOR. (Dallas, Tex-Birmingham, Ala., extension to J52V.
24. VOR/VORTAC Jet Route No. 53 (Miami, Fla., to the Int. of J53V and J81V;Spartanburg,S.C.. to Pittsburgh Pa.)
25. VOR/VORTAC Jet Route No. 55 (From the intersection with J22V to Kenton, Del.)
26. VOR/VORTAC Jet Route No. 58 (San Francisco, Calif., to New Orleans, La.) Nonradar advisory area from 20 nmi W of Pioche, Nev., VOR to 90 nmi SE of Alamosa, Colo., VOR.)
27. VOR/VORTAC Jet Route No. 60 (Los Angeles, Calif., to New York, N.Y.) Nonradar advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb., VOR.
28. VOR/VORTAC Jet Route No. 62 (Idlewild, N.Y., to Nantucket VOR.)
29. VOR/VORTAC Jet Route No. 64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory area from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
30. VOR/VORTAC Jet Route No. 67 (Idlewild, N.Y., to U.S.-Canadian Border.)
31. VOR/VORTAC Jet Route No. 69 (Spartanburg, S.C., to Gordonsville, Va.)
32. VOR/VORTAC Jet Route No. 71 (Appleton, Ohio to Front Royal, Va.
33. VOR/VORTAC Jet Route No. 75 (Miami, Fla., to U.S.-Canadian Border)
34. VOR/VORTAC Jet Route No. 77 (Miami, Fla., to U.S.-Canadian Border)
35. VOR/VORTAC Jet Route No. 78 (Los Angeles, Calif., to New York, N.Y.)

36. VOR/VORTAC Jet Route No. 79 (Miami, Fla., to Idlewild, N. Y.)
37. VOR/VORTAC Jet Route No. 80 (Denver, Colo., to New York, N. Y.) Nonradar advisory area that portion of JR-80 from 120 nmi ESE of Denver, Colo., VOR to 25 nmi W of Hill City, Kansas VOR.
38. VOR/VORTAC Jet Route No. 81 (The intersection of J81V and J53V to Barracuda Int.)
39. VOR/VORTAC Jet Route No. 82 (Chicago, Ill., to Boston, Mass.)
40. VOR/VORTAC Jet Route No. 84 (Oakland, Calif., to the U. S.-Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 40 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr. Advisory Service on Jet 84 Victor will be provided flight level 270 and above from 100 nmi W to 40 nmi E of Scottsbluff, Nebr.
41. VOR/VORTAC Jet Route No. 85 (Miami, Fla., to the U.S.-Canadian Border.)
42. VOR/VORTAC Jet Route No. 87 (Houston, Tex., to Northbrook, Ill.)
43. VOR/VORTAC Jet Route No. 89 (Northbrook, Ill., to Miami, Fla.)
44. Control 1150 (West Palm Beach, Fla., to Wilmington, N. C.)
45. VOR/VORTAC Jet Route No. 90 (Seattle, Wash., to Chicago, Ill.)

AREAS

1. That area 20 n mi either side of a line from Des Moines, Iowa VOR; intersection of Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.
2. Duluth, Minnesota to the U.S.-Canadian Border via the Duluth 047° M radial(direct route between Duluth & Lakehead, Canada.)
3. Spokane, Washington to the U.S.-Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)
4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif., 208° M radials; thence via the Long Beach, Calif 208° M radial(Control Area Extension 1177) for a distance of 180 n mi.
5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif. 236° M radial (Control Area Extension 1316) for a distance of 180 n mi.
6. Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 n mi.
7. Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 n mi.
8. Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial(Control Area Extension 1173 over Francis Intersection) for a distance of 150 n mi.
9. Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 n mi.
10. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 n mi.
11. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 n mi.
12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 n mi.
13. Honolulu, Hawaii VOR: thence via the Honolulu, Hawaii 250° M radial for a distance of 87 n mi.
14. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 n mi.
15. Honolulu, Hawaii VOR: thence via the Honolulu, Hawaii 168° M radial for a distance of 99 n mi.
16. Honolulu, Hawaii LFR; thence NW via Red Airway 87 to a point 40 nmi NW of Point Allen rbn.
17. Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.
18. Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 n mi (boundary of the Miami Oceanic Control Area)
19. Seattle, Washington VOR to the U.S.-Canadian Border via the Seattle VOR direct radial to the Victoria (Patricia Bay), B. C., Canada RR.
20. Boston, Mass., Terminal Area-- That area within 20 nmi to either side of J-16-V between Albany, N. Y., & Boston, Mass.
21 New York City, N. Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Bridgeport, Conn. Int. via Poughkeepsie, N. Y., VOR to Albany, N. Y., VOR.
b. Idlewild, N. Y., VORTAC via Huguenot, N. Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.
22. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOR
Baltimore, Md., Terminal Area-- Effective 5 May 1960
a. That area within 20 nmi from the sides and within the triangle formed by a direct course from the Baltimore, Md., VOR to the Idlewild, N. Y., VOR to the Salisbury, Md., VOR; to the Baltimore, Md., VOR.
b. That area within 20 nmi to either side of the center line of Control Area Extension 1148.
23. St. Louis, Mo., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Int. of J-80-V & Terre Haute, Ind., 268° M radial; via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.
d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.
Effective 17 December 1959.
24. Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 265° M radial; to Int. of Palmdale, Calif., 265° M radial and J-1-V.
d. Los Angeles, Calif., VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 336° M radial and J-1-V
e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.
25. Oakland, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Francisco, Calif., VOR via V-199 to Red Bluff, Calif., VOR.
b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.
26. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.
d. Dallas, Tex., VOR via the Int. of the Dallas VOR 230° and the Waco, Tex., VOR 344° M radials; to the Waco, Tex., VOR.
e. Dallas, Tex., VOR via the Int. of the Dallas VOR 178° and the Waco, Tex., VOR 028° M radials; to the Waco, Tex., VOR.
27. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
b. Spartanburg, S. C., VOR via V-20-N to Norcross, Ga., VOR.
c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S. C., VOR.
28. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.

b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne, Bay, Fla., VOR.
c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR.

29. Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S. - Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.

30. Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V.
d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

31 From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi--bndry of the Havana, Cuba Ctl Area.

32. Houston, Tex., Terminal Area--That area within 20 nmi to either side of a direct crs from the:
a. Houston, Tex., VOR via the Int of the Houston 036° and the Lake Charles, La, 265° M radials to the Lake Charles VOR (V-222N).
b. Houston, Tex., VOR via the Int of the Houston VOR 082° and the Lake Charles, La., VOR 233° M radials to the Lake Charles VOR (V20S).
c. Houston, Tex., VOR via the Int of the Houston VOR 315° and the Leona, Tex., VOR 162° M radials; to the Leona, Tex., VOR.
d. Houston, Tex., VOR via the Int of the Houston VOR 345° and the Leona, Tex., VOR 132° M radials; to the Leona, Tex., VOR.

33. San Antonio, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Antonio, Tex., VOR via the Int of the San Antonio VOR 048° and the Austin, Tex., VOR 166° M radials to the Austin, Tex., VOR.
b. San Antonio, Tex., VOR via the Int of the San Antonio VOR 353° and the Austin, Tex., VOR 248° M radials; to the Austin, Tex., VOR.

34. New Orleans, La., Terminal Area-- That area within 20 nmi to either side of a direct course from the:
a. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 320° and the Alexandria, La., VOR 098° M radials; to the Alexandria, La., VOR. (Overlies V-114-N.)
b. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 030° and the McComb, Miss., VOR 142° M radials; to the McComb, Miss., VOR. (Overlies V-9-E).
c. McComb, Miss., VOR to the Int. of the McComb, Miss., VOR 222° and the New Orleans, La., VOR 320° M radials. (Overlies V-194).
d. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 094° and the Mobile, Ala., VOR 219° M radials; to the Mobile, Ala., VOR. (Overlies V-240).
e. Mobile, Ala., VOR to the Int. of the Mobile, Ala., VOR 258° and the New Orleans, La., VOR 030° M radials. (Overlies V-20-N.).
f. Alexandria, La., VOR to the Baton Rouge, La., VOR. (Overlies V-114).
g. Baton Rouge, La., VOR via the Int. of the Baton Rouge, La., VOR 126° and the New Orleans, La., VOR 269° M radials; to the New Orleans, La., VOR.
Effective 5 May 1960.

35. Tampa, Fla., Terminal Area - That area within 20 nmi to either side of a direct course from the:
1. St. Petersburg, Florida VOR direct to the Orlando, Fla., VOR. (Overlies V-152).
2. St. Petersburg, Fla., VOR via the Int. of the St. Petersburg, Fla., VOR 038° and the Orlando, Fla., VOR 257° M radials; to the Orlando, Fla., VOR. (Overlies V152N).
3. St. Petersburg, Fla., VOR via the Lakeland, Fla., VOR; to the Orlando, Fla., VOR. (Overlies V-152S).
Effective 5 May 1960.

DISCONTINUANCE OF 135.0 MC: Effective 0800 GMT July 1, 1960, transmitting 135.0 mc will be discontinued in Flight Service Stations and Combined Stations/Towers.

FREQUENCY CHANGE - 126.18 MC to 126.20 MC: FAA will change all existing 126.18 mc frequency assignments to 126.20 mc during the month of July 1960. The individual locations affected will be NOTAMED as the changes are accomplished. The military services have advised their commands to make the change not later than July 1, 1960.

DISCONTINUANCE OF CONTINUOUS GUARD ON 3023.5 kc: Effective July 1, 1960 at the following locations, 3023.5 kc will be available "on request".

Glens Falls, New York
Martinsburg, West Virginia
Philipsburg, Pennsylvania
Youngstown, Ohio
Utica, New York
Dalhart, Texas
Memphis, Tennessee
Butler, Missouri
Cedar Rapids, Iowa
Chanute, Kansas
Des Moines, Iowa
Jackson, Michigan
Jamestown, North Dakota
Russell, Kansas
St. Louis, Missouri
Columbus, New Mexico
Crescent City, California
Idaho Falls, Idaho
Laramie, Wyoming
Oakland, California
Redmond, Oregon
Sacramento, California

VOR/DMET or TACAN EQUIPPED AIRCRAFT: The FAA has implemented new procedures and separation standards for the control of VOR/DMET or TACAN equipped aircraft. In order that ATC can apply these standards, pilots of aircraft so equipped are requested to include the statement "TACAN (or DMET) Equipped" in the remarks section of their flight plan.

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue.
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included. Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

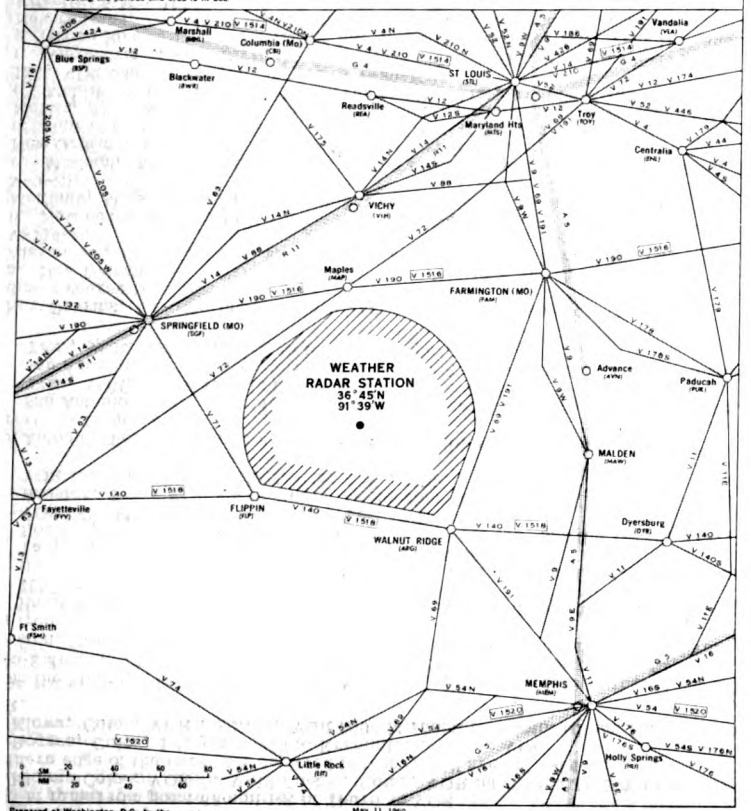
VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight Information Manual Corrections." Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time.

SPECIAL NOTICE

CUMULUS CLOUD RESEARCH PROJECT

EFFECTIVE MAY 15 THROUGH AUGUST 31 ANNUALLY

Beginning May 15 and ending August 31 annually, a cumulus cloud research operation will be conducted within a 50 statute mile radius of a weather radar station located 11 statute miles east of West Plains, Missouri at 36°45'N, 91°39'W, excluding airways.



All flight operations will be conducted outside of controlled airspace. Hours of operation will be from 1300Z to 0300Z. Three Cessna 172 aircraft will operate VFR in the western portion of the area at selected altitudes between the surface and 10,000 feet MSL. One Beechcraft D-18 will operate VFR or IFR throughout the area between the surface and 23,000 feet MSL, generally within a selected group of five altitudes.

Flight operations will be conducted on days selected at random during the three and one-half month period each year. Specific information concerning these operations will be issued by NOTAM on each day the flights will operate.

Other aircraft proposing flight within the designated area may obtain current information concerning these operations from the following FAA facilities:

St. Louis, Mo. FSS — Springfield, Mo. CS/T — Malden, Mo. FSS — Walnut Ridge, Ark. FSS — Memphis, Tenn. ARTCC
Vichy, Mo. FSS — Farmington, Mo. FSS — Flippin, Ark. FSS — St. Louis, Mo. ARTCC

The flight service stations listed above will broadcast appropriate information concerning the operation following regular weather broadcasts during the periods this area is in use.

NEW AIR TRAFFIC CONTROL ADVISORY SERVICE: IFR aircraft operating in accordance with an ATC authorized cruising level of VFR conditions-on-top are required by CAR 60.44 to be flown at the altitudes/flight levels specified in CAR 60.32 for VFR flight. Noncompliance by pilots with the cruising level requirements of CAR 60 compromises intended segregation between aircraft operating at VFR and IFR altitudes/flight levels. Beginning April 5, 1960, pilots of IFR aircraft operating in accordance with an air traffic control authorized cruising level of VFR conditions-on-top and reporting at an altitude/flight level incorrect for direction of flight will be advised by air traffic control facilities of the appropriate level/s for direction of flight. Controllers will provide this advisory service on a "workload permitting" basis. The provision, or lack of provision of this service should not be construed to relieve or diminish pilot responsibility for operation at the correct altitudes/flight levels for direction of flight.

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC/TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future. Effective date of changes (which are indicated by ✓) is July 3, 1960.

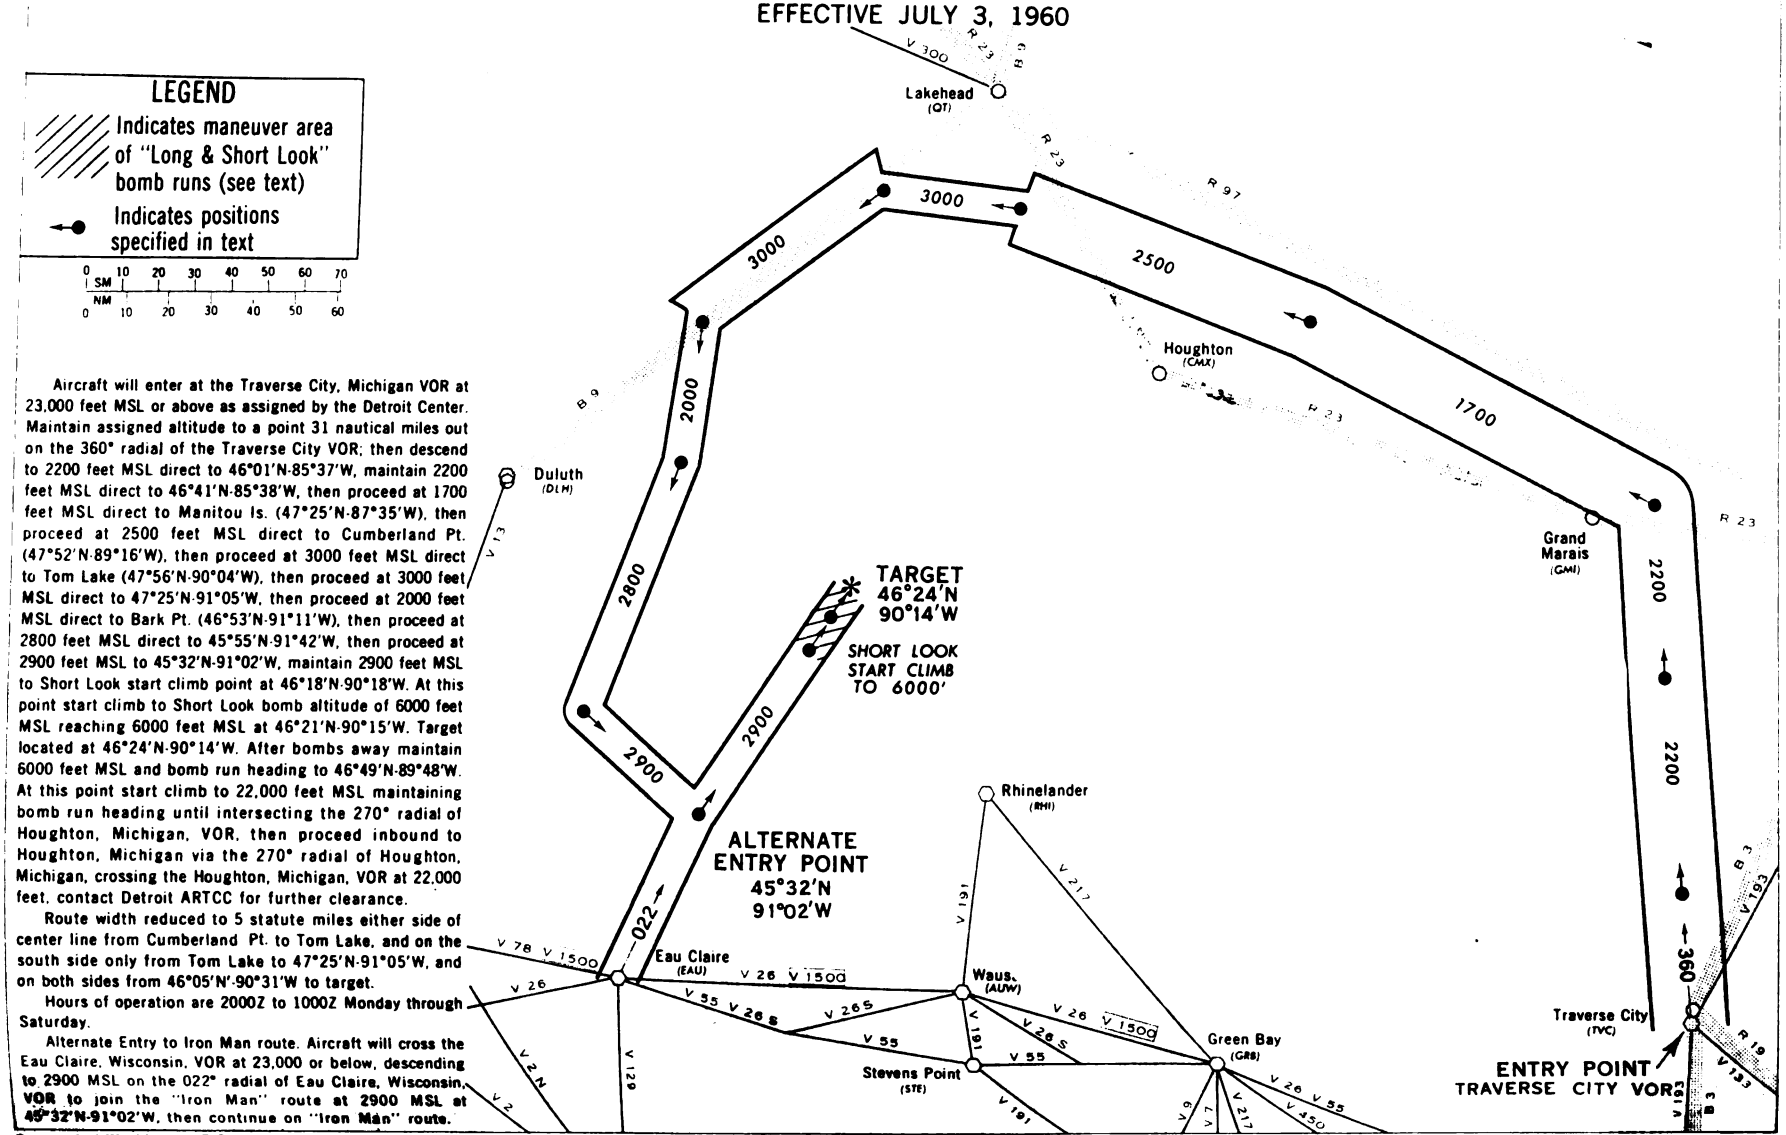
ALTIMETER SETTINGS - VFR FLIGHTS: In order to maintain proper separation between IFR and VFR cruising altitudes, it is essential that VFR pilots keep altimeters corrected in accordance with altimeter setting issued by nearest weather reporting station. Current altimeter settings are available to VFR pilots from FAA Flight Service Stations, Airport Traffic Control Towers, and aviation broadcasts.

CAUTION-AIRCRAFT ARRESTING BARRIERS AT JOINT USE MILITARY/CIVIL AIRPORTS: Aircraft Arresting Barriers are installed at some joint use military/civil airports. Pilots, particularly those of the light propeller driven category of aircraft are advised to operate with caution while operating near or over a lowered barrier. Aircraft operations at minimum practical power settings and taxi speeds are recommended until clear of the arresting barrier system.



ILS SENSITIVITY ADJUSTMENTS: At a number of facilities in the United States, ILS localizer course width will be reduced from 5 degrees to 4 degrees in the near future. Individual facility NOTAM's will be published as these changes occur.

NAVIGATIONAL WARNING - USAF OPERATION "OIL BURNER": USAF (Strategic Air Command) is conducting low level navigational flights in jet aircraft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following pages, and at the alts specified therein. At the termination of the low level flights, the acft climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during the times specified for each route.

✓ Effective July 3, 1960

SPECIAL NOTICE

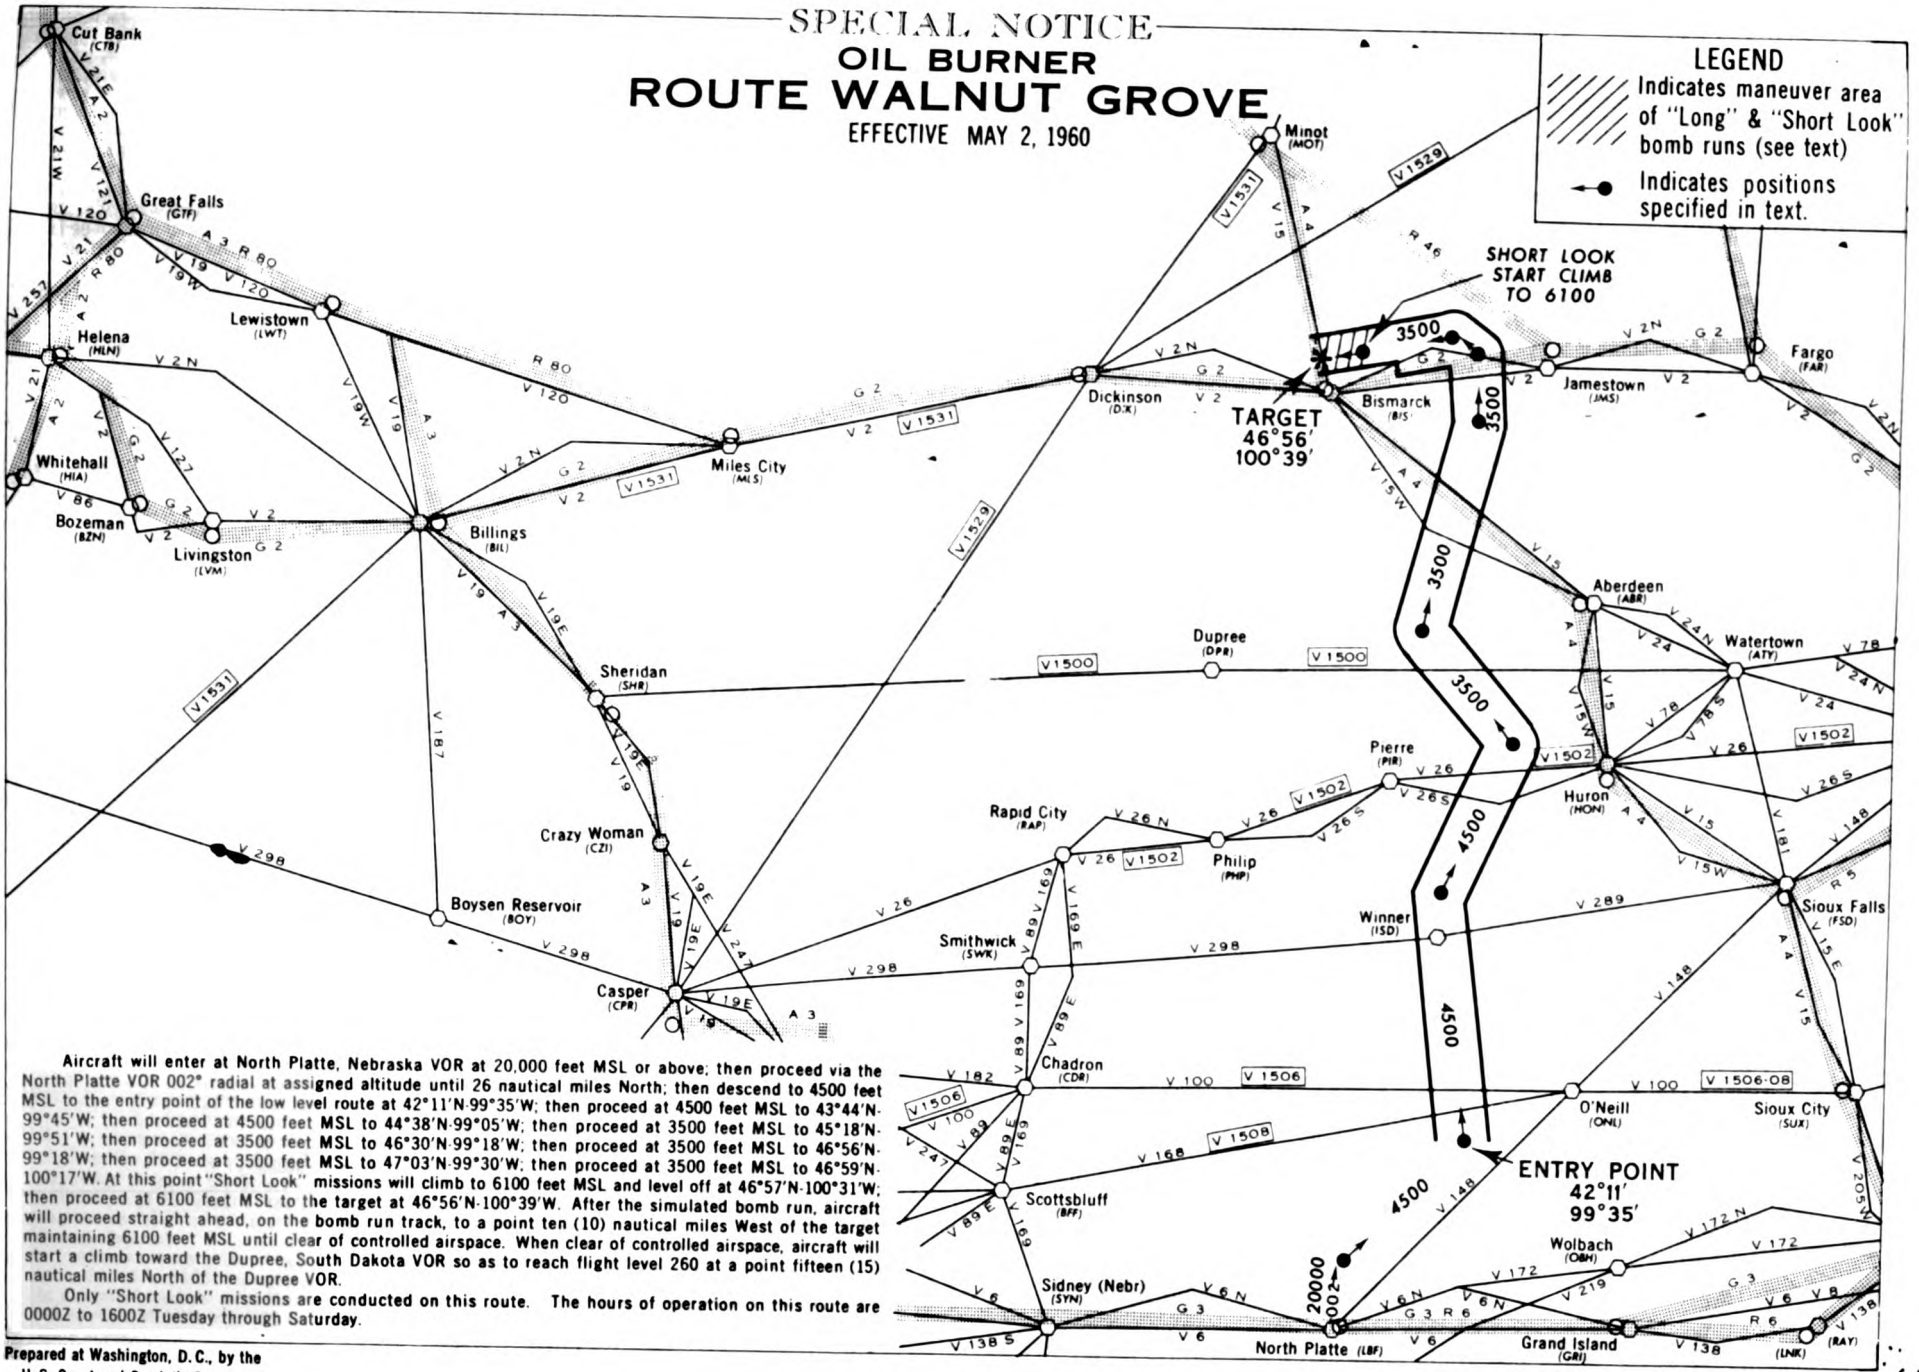
OIL BURNER
ROUTE IRON MAN
EFFECTIVE JULY 3, 1960

Aircraft will enter at the Traverse City, Michigan VOR at 23,000 feet MSL or above as assigned by the Detroit Center. Maintain assigned altitude to a point 31 nautical miles out on the 360° radial of the Traverse City VOR; then descend to 2200 feet MSL direct to 46°01'N-85°37'W, maintain 2200 feet MSL direct to 46°41'N-85°38'W, then proceed at 1700 feet MSL direct to Manitou Is. (47°25'N-87°35'W), then proceed at 2500 feet MSL direct to Cumberland Pt. (47°52'N-89°16'W), then proceed at 3000 feet MSL direct to Tom Lake (47°56'N-90°04'W), then proceed at 3000 feet MSL direct to 47°25'N-91°05'W, then proceed at 2000 feet MSL direct to Bark Pt. (46°53'N-91°11'W), then proceed at 2800 feet MSL direct to 45°55'N-91°42'W, then proceed at 2900 feet MSL to 45°32'N-91°02'W, maintain 2900 feet MSL to Short Look start climb point at 46°18'N-90°18'W. At this point start climb to Short Look bomb altitude of 6000 feet MSL reaching 6000 feet MSL at 46°21'N-90°15'W. Target located at 46°24'N-90°14'W. After bombs away maintain 6000 feet MSL and bomb run heading to 46°49'N-89°48'W. At this point start climb to 22,000 feet MSL maintaining bomb run heading until intersecting the 270° radial of Houghton, Michigan, VOR, then proceed inbound to Houghton, Michigan via the 270° radial of Houghton, Michigan, crossing the Houghton, Michigan, VOR at 22,000 feet, contact Detroit ARTCC for further clearance.

Route width reduced to 5 statute miles either side of center line from Cumberland Pt. to Tom Lake, and on the south side only from Tom Lake to 47°25'N-91°05'W, and on both sides from 46°05'N-90°31'W to target.

Hours of operation are 2000Z to 1000Z Monday through Saturday.

Alternate Entry to Iron Man route. Aircraft will cross the Eau Claire, Wisconsin, VOR at 23,000 or below, descending to 2900 MSL on the 022° radial of Eau Claire, Wisconsin, VOR to join the "Iron Man" route at 2900 MSL at 45°32'N-91°02'W, then continue on "Iron Man" route.



Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(21 June 1960)

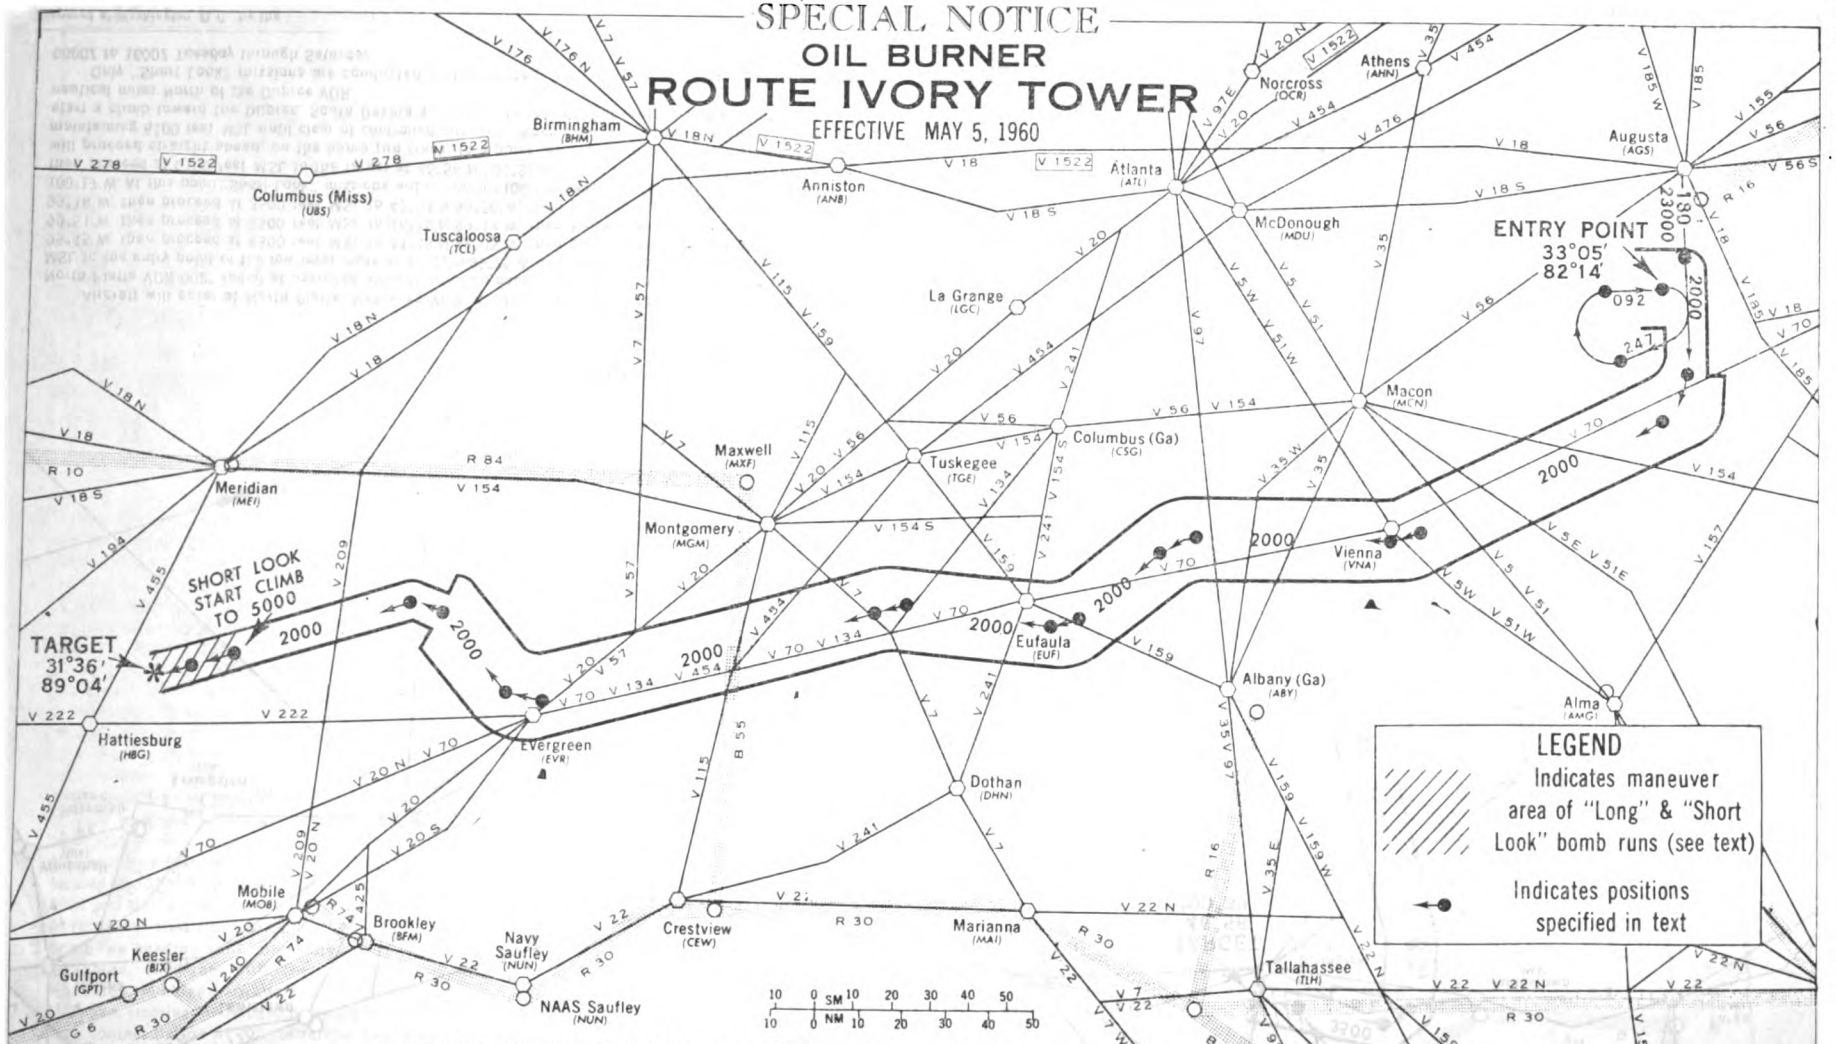
SPECIAL NOTICE

OIL BURNER
ROUTE WALNUT GROVE

EFFECTIVE MAY 2, 1960

Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 002° radial at assigned altitude until 26 nautical miles North; then descend to 4500 feet MSL to the entry point of the low level route at 42°11'N-99°35'W; then proceed at 4500 feet MSL to 43°44'N-99°45'W; then proceed at 4500 feet MSL to 44°38'N-99°05'W; then proceed at 3500 feet MSL to 45°18'N-99°51'W; then proceed at 3500 feet MSL to 46°30'N-99°18'W; then proceed at 3500 feet MSL to 46°56'N-99°18'W; then proceed at 3500 feet MSL to 47°03'N-99°30'W; then proceed at 3500 feet MSL to 46°59'N-100°17'W. At this point "Short Look" missions will climb to 6100 feet MSL and level off at 46°57'N-100°31'W; then proceed at 6100 feet MSL to the target at 46°56'N-100°39'W. After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, to a point ten (10) nautical miles West of the target maintaining 6100 feet MSL until clear of controlled airspace. When clear of controlled airspace, aircraft will start a climb toward the Dupree, South Dakota VOR so as to reach flight level 260 at a point fifteen (15) nautical miles North of the Dupree VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 0000Z to 1600Z Tuesday through Saturday.



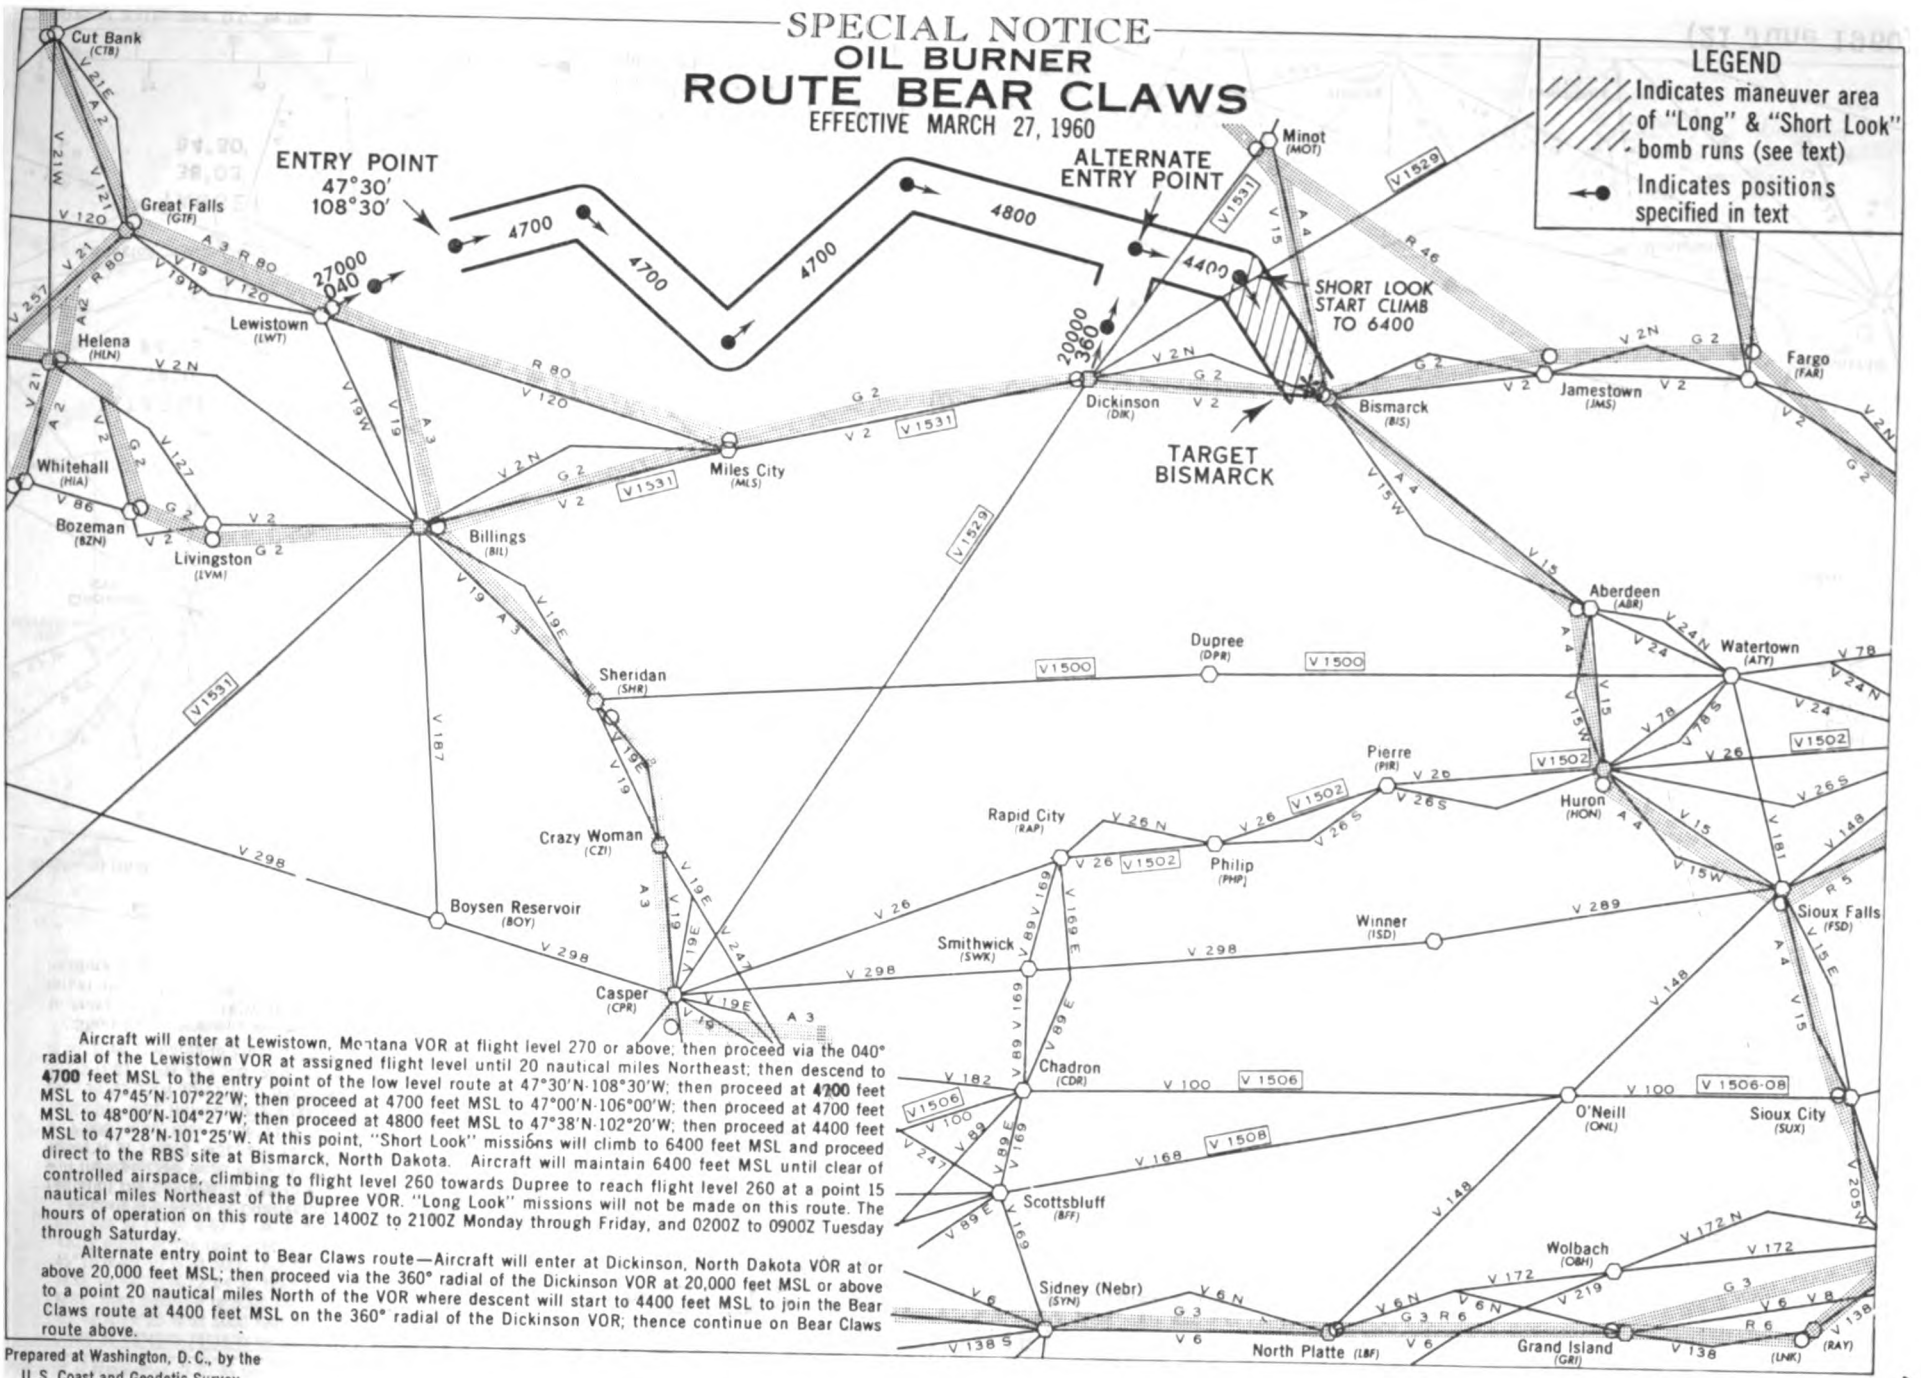
Prepared at Washington, D.C., by the
U.S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER

ROUTE IVORY TOWER

EFFECTIVE MAY 5, 1960



Aircraft will enter at Augusta, Georgia VOR at 23,000 feet MSL or above; then proceed via the Augusta VOR 180° radial at assigned altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49'N-82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N-82°30'W to the entry point of the low level route at 33°05'N-82°14'W, and at 2000 feet MSL, turn right to intercept the 180° radial of the Augusta VOR to 32°46'N-82°08'W. Aircraft will then make a nine nautical mile radius right turn to 32°35'N-82°16'W at 2000 feet MSL; then proceed at 2000 feet MSL Southwest along the South edge of Victor Airway 70 to 32°10'N-83°25'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 32°09'N-83°30'W; then at 2000 feet MSL, proceed direct to 32°09'N-84°25'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 32°07'N-84°32'W, then at 2000 feet MSL proceed direct to 31°53'N-84°54'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 31°51'N-85°01'W, then at 2000 feet MSL proceed direct to 31°54'N-85°46'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 31°54'N-85°49'W; then at 2000 feet MSL proceed direct to 31°34'N-87°18'W; then at 2000 feet MSL make a nine nautical mile radius right turn to 31°36'N-87°28'W; then at 2000 feet MSL proceed direct to 31°53'N-87°46'W; then at 2000 feet MSL make a nine nautical mile radius left turn to 31°55'N-87°55'W; then proceed at 2000 feet MSL to 31°43'N-88°43'W. At this point, "Short Look" missions will start a climb so as to reach 5000 feet MSL at 31°39'N-88°55'W; then at 5000 feet MSL proceed direct to the target at 31°36'N-89°04'W.

After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, and climb to 6000 feet MSL. Upon reaching 6000 feet MSL, aircraft will make a right turn to a true course of 106° and maintain 6000 feet MSL until past the 180° radial of the Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding direct to the intersection of the McComb, Mississippi VOR 068° radial and the Meridian VOR 160° radial; then continue climbing in a non-standard, one minute holding pattern (making all turns to the left) Southwest of the intersection on the 068° radial of the McComb VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 0000Z to 1600Z Tuesday through Saturday.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(21 June 1960)

Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast; then descend to **4700** feet MSL to the entry point of the low level route at 47°30'N-108°30'W; then proceed at **4700** feet MSL to 47°45'N-107°22'W; then proceed at 4700 feet MSL to 47°00'N-106°00'W; then proceed at 4700 feet MSL to 48°00'N-104°27'W; then proceed at 4800 feet MSL to 47°38'N-102°20'W; then proceed at 4400 feet MSL to 47°28'N-101°25'W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL; then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above.

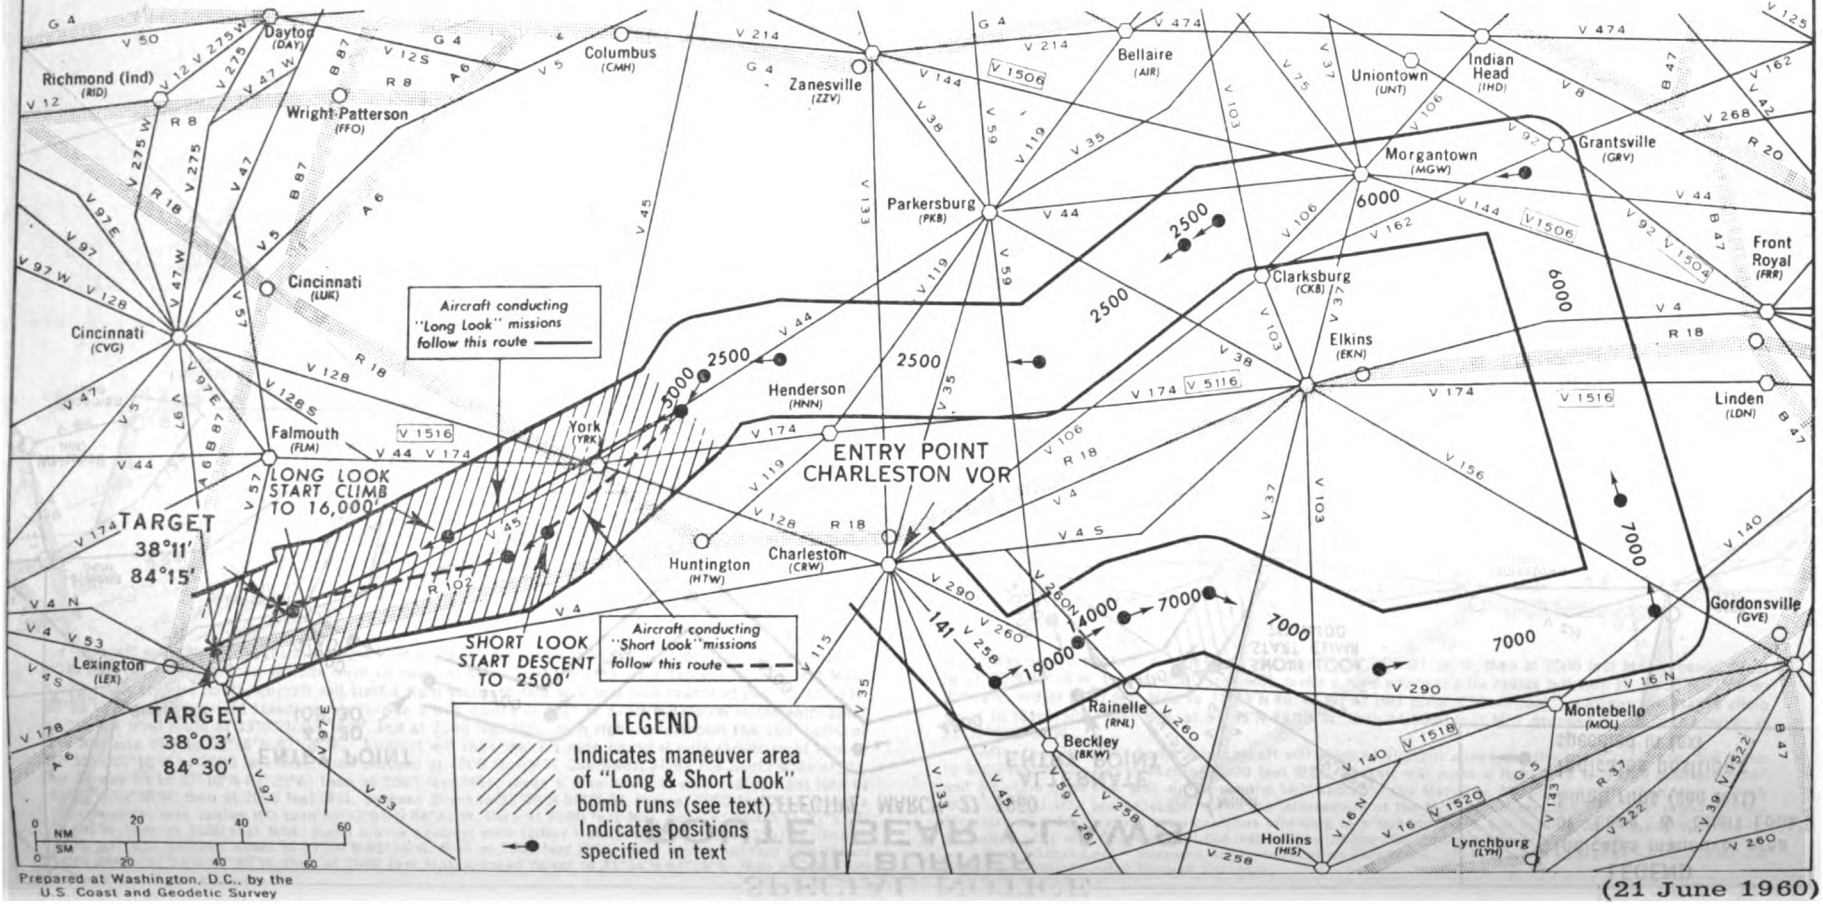
U.S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER

ROUTE GREEN VALLEY



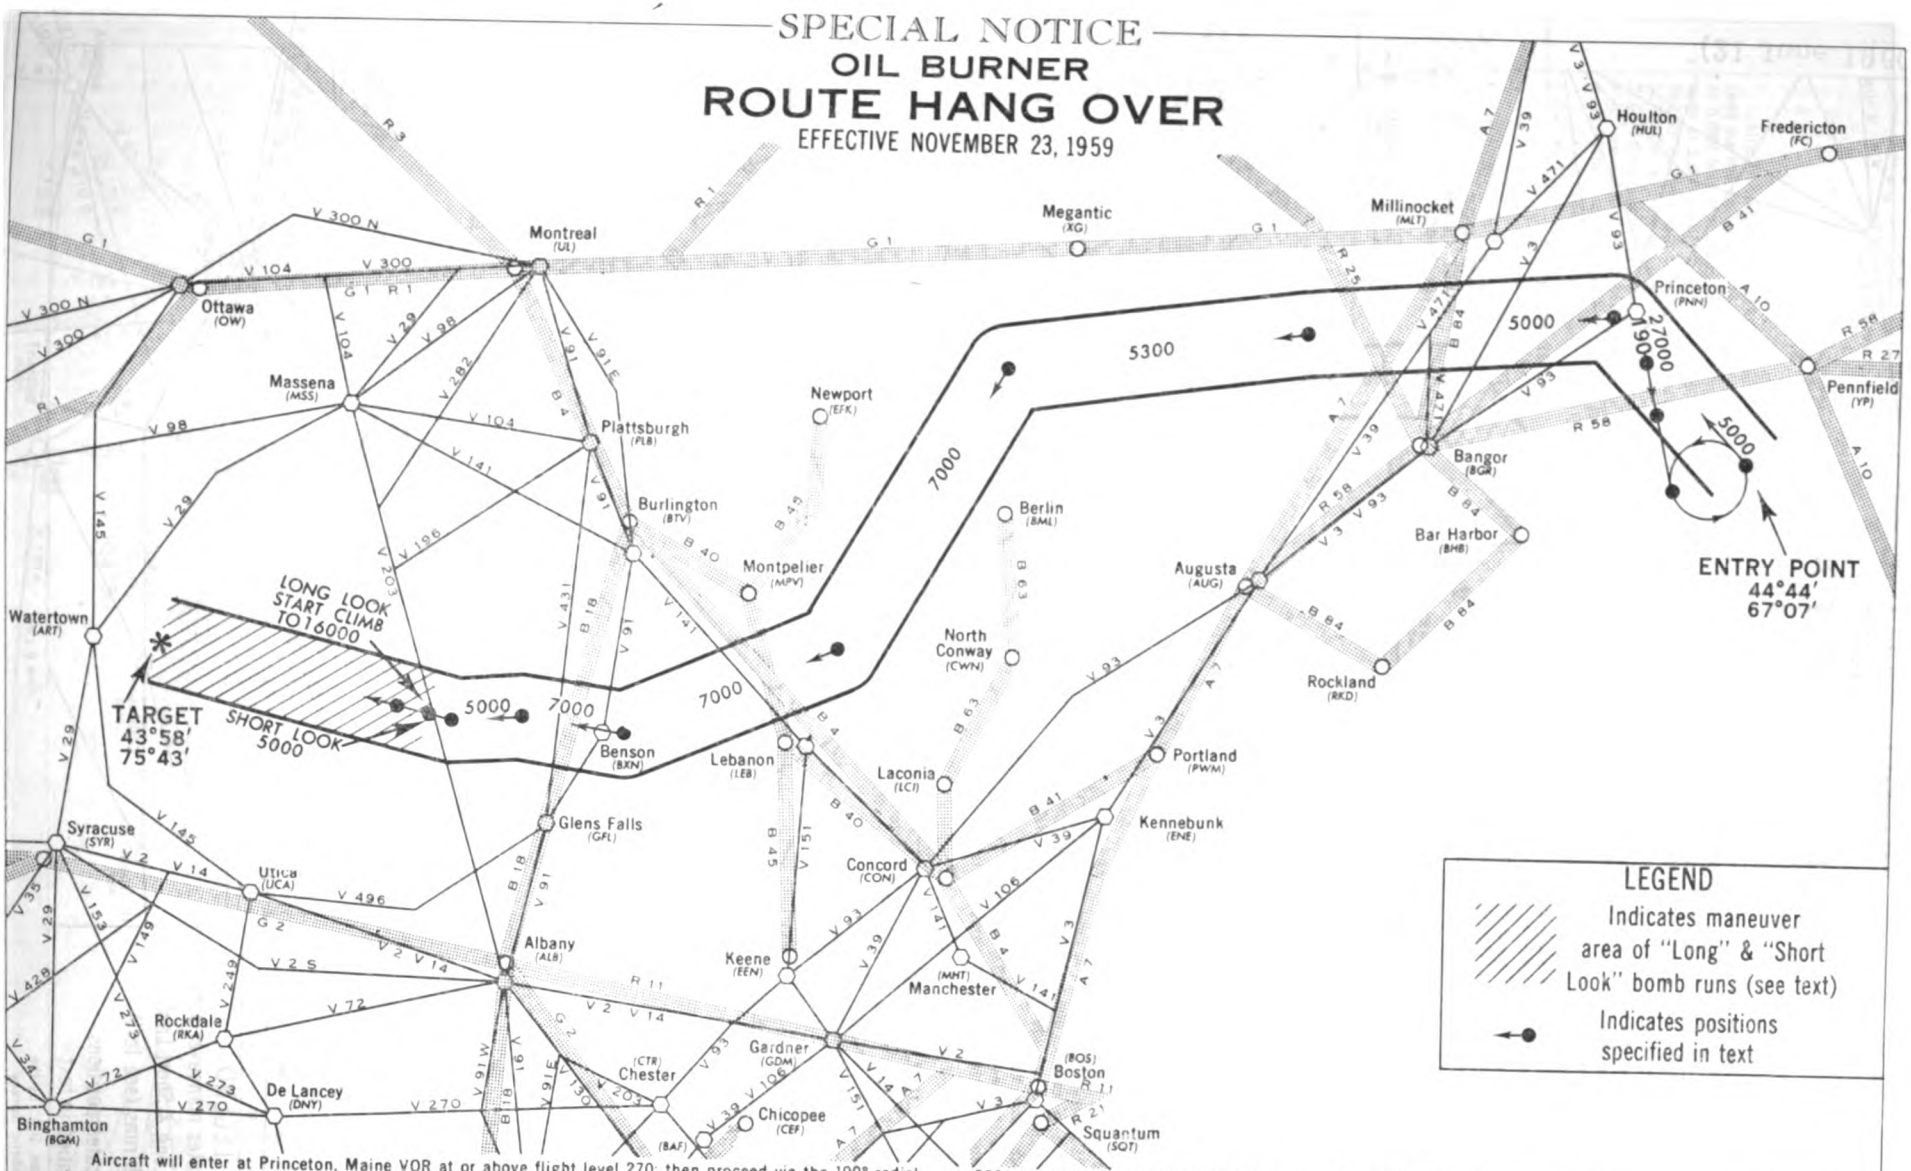
EFFECTIVE JUNE 19, 1960

Aircraft will enter at Charleston, W. Va., VOR at or above Flight Level 240; and proceed via the 141° radial of the Charleston VOR to 37°59'N-81°22'W, descending to cross this point at 19,000' MSL. Aircraft will then proceed to 38°08'N-81°00'W at 19,000' MSL. Aircraft will then continue descent to cross 38°12'N-80°49'W at 14,000' MSL; and to cross 38°16'N-80°30'W at 7,000' MSL; then proceeding to 38°01'N-79°49'W at 7,000' MSL; then to 38°11'N-78°41'W at 7,000' MSL; then to 38°32'N-78°49'W at 7,000' MSL; descend to 6,000' MSL immediately after passing 38°32'N-78°49'W, then at 6,000 feet MSL to 39°33'N-79°10'W; then to 39°25'N-80°27'W at 6,000' MSL; then descending to cross 39°21'N-80°34'W at 2,500' MSL; then to 38°59'N-81°11'W at 2,500' MSL; then to 38°59'N-82°14'W at 2,500' MSL; then to 38°51'N-82°33'W at 2,500' MSL; then climbing to cross 38°49'N-82°38'W at 5,000' MSL.

"Short Look" Missions will maintain 5,000' MSL from 38°49'N-82°38'W to 38°26'N-83°09'W; then descend to cross 38°22'N-83°18'W at 2,500' MSL (end of navigation leg). Aircraft will then proceed to cross the target at 38°11'N-84°15'W at 5,000' MSL. After the simulated bomb run, the aircraft will proceed via a 270° heading to cross the Lexington, Ky., VOR 024° radial at 6,000' MSL; then continuing via a 270° heading, cross Lexington VOR 322° radial at 6,000' MSL. The aircraft will then climb on the Lexington VOR 322° radial to cross Louisville, Ky., VOR 070° radial at 11,000' MSL; cross Louisville VOR 050° radial at 17,000' MSL; maintaining this altitude until after crossing Louisville VOR 018° radial; then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 310.

"Long Look" Missions will proceed from 38°49'N-82°38'W, maintaining 5,000' to 38°25'N-83°34'W; then climb to cross 38°10'N-84°11'W at 16,000' MSL; then to the target at 38°03'N-84°30'W at 16,000' MSL. After the simulated bomb run, the aircraft will make a right turn to intercept the Lexington, Ky., VOR 332° radial, still at 16,000' MSL; then climb on the Lexington VOR 332° radial so as to cross Louisville VOR 070° radial at 17,000' MSL and the Louisville VOR 050° radial at 21,000' MSL; maintaining 21,000' MSL until after crossing the Louisville VOR 018° radial; then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 310.

The hours of operation on this route are 0100Z to 1300Z, Tuesday through Saturday.



Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(21 June 1960)

SPECIAL NOTICE

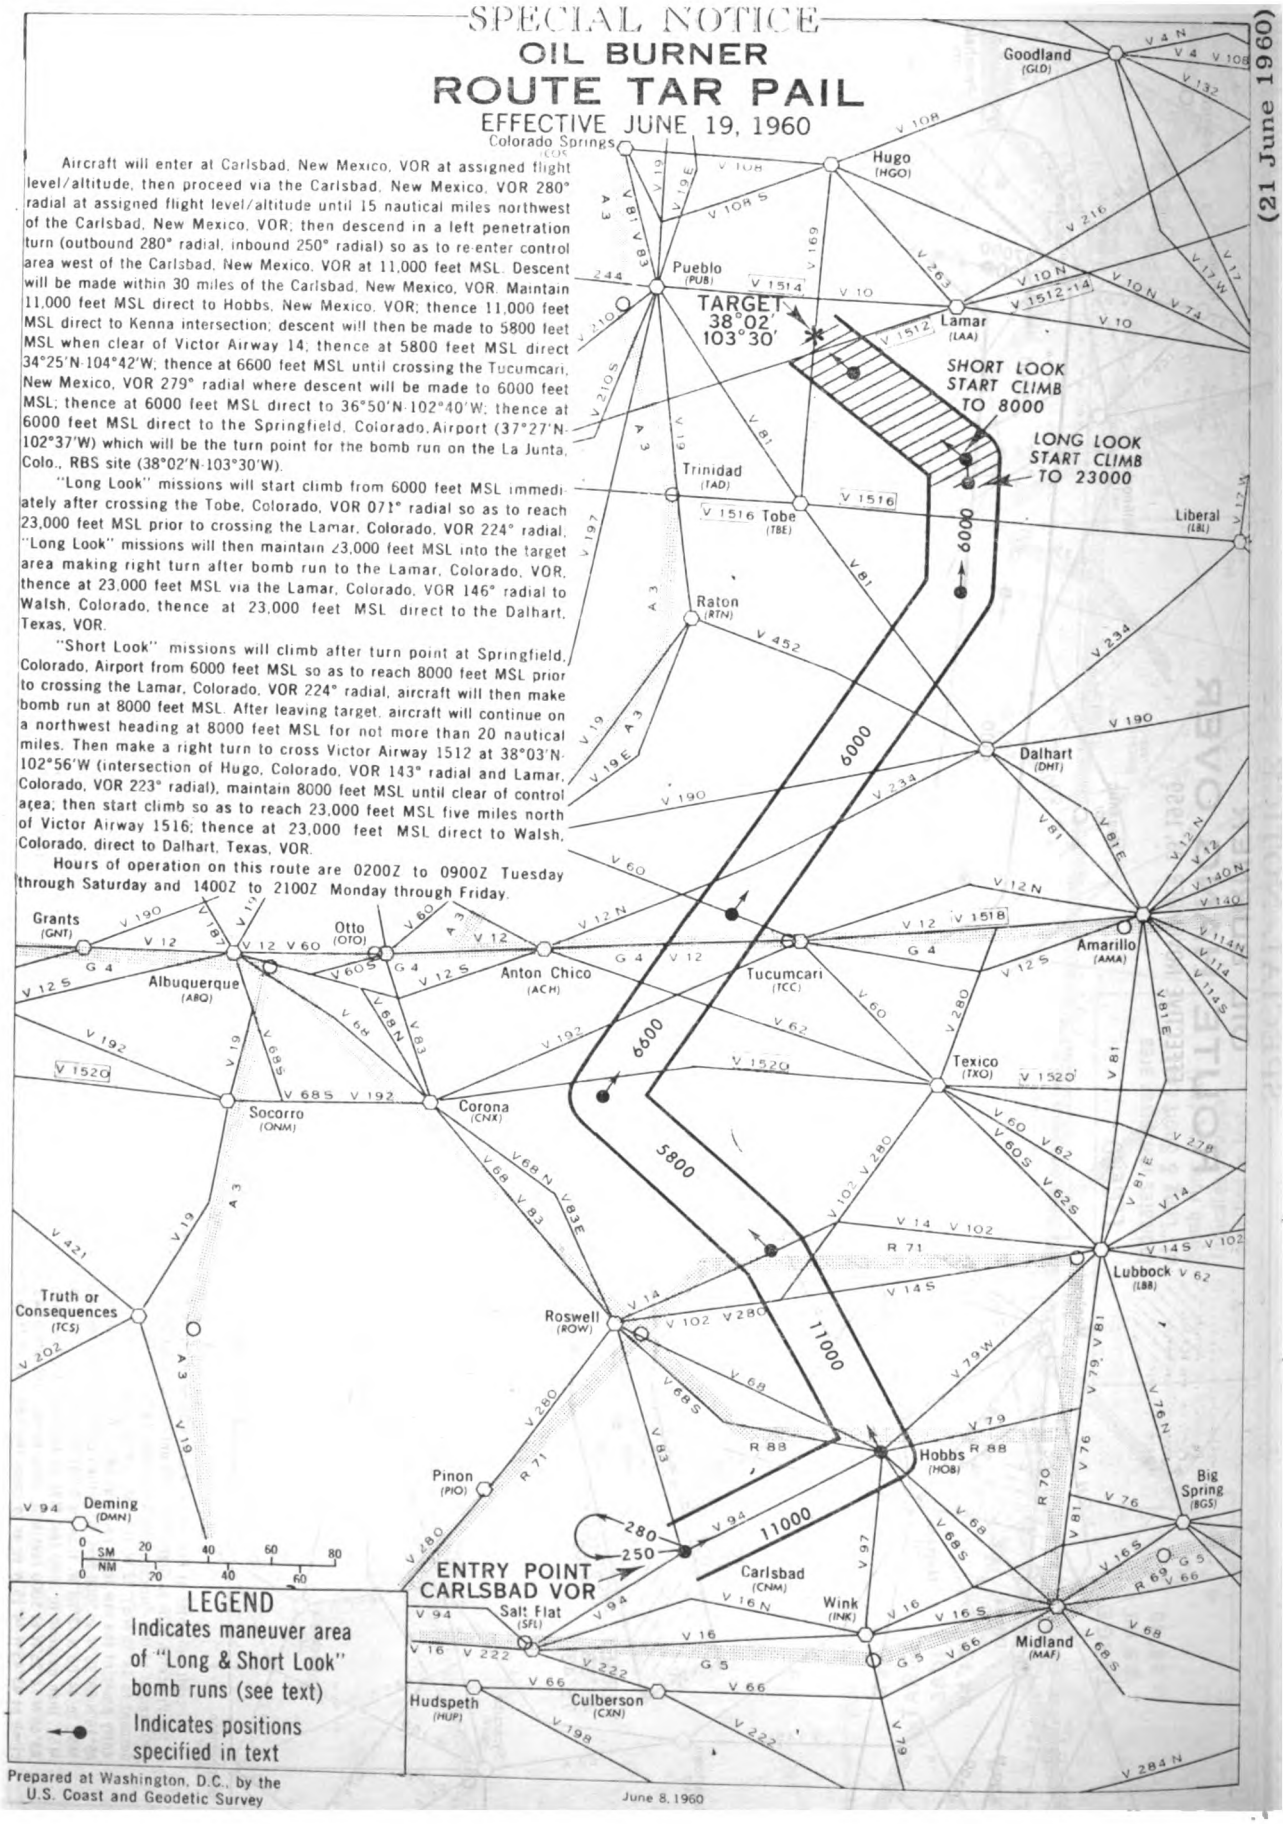
OIL BURNER
ROUTE HANG OVER

EFFECTIVE NOVEMBER 23, 1959

Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08'N-67°39'W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56'N-67°36'W at or above 20,000 feet MSL; then continuing descent to 44°39'N-67°32'W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44'N-67°07'W; then to 45°19'N-67°49'W at 5000 feet MSL; then to 45°16'N-69°30'W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08'N-71°09'W; then climb to 7000 feet MSL to 44°03'N-72°04'W; then to 43°42'N-73°12'W at 7000 feet MSL; then to 43°45'N-73°45'W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44'N-74°07'W; then to 43°45'N-74°15'W at 5000 feet MSL; then to 43°46'N-74°25'W at 5000 feet MSL; then to the RBS site at 43°58'N-75°43'W. "Long Look" missions will start climb at 43°45'N-74°15'W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45'N-74°15'W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13'N-75°38'W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial of the Burlington VOR to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL, turn right to the 060° radial of the Watertown, New York VOR to 44°13'N-75°38'W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday, and 0000Z-0630Z Tuesday through Saturday.

Prepared at Washington, D.C., by the
U. S. Coast and Geodetic Survey

SPECIAL NOTICE
OIL BURNER
ROUTE TAR PAIL
EFFECTIVE JUNE 19, 1960



(21 June 1960)

Aircraft will enter at Carlsbad, New Mexico, VOR at assigned flight level/altitude, then proceed via the Carlsbad, New Mexico, VOR 280° radial at assigned flight level/altitude until 15 nautical miles northwest of the Carlsbad, New Mexico, VOR; then descend in a left penetration turn (outbound 280° radial, inbound 250° radial) so as to re-enter control area west of the Carlsbad, New Mexico, VOR at 11,000 feet MSL. Descent will be made within 30 miles of the Carlsbad, New Mexico, VOR. Maintain 11,000 feet MSL direct to Hobbs, New Mexico, VOR; thence 11,000 feet MSL direct to Kenna intersection; descent will then be made to 5800 feet MSL when clear of Victor Airway 14; thence at 5800 feet MSL direct 34°25'N-104°42'W; thence at 6600 feet MSL until crossing the Tucumcari, New Mexico, VOR 279° radial where descent will be made to 6000 feet MSL; thence at 6000 feet MSL direct to 36°50'N-102°40'W; thence at 6000 feet MSL direct to the Springfield, Colorado, Airport (37°27'N-102°37'W) which will be the turn point for the bomb run on the La Junta, Colo., RBS site (38°02'N-103°30'W).

"Long Look" missions will start climb from 6000 feet MSL immediately after crossing the Tobe, Colorado, VOR 071° radial so as to reach 23,000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial. "Long Look" missions will then maintain 23,000 feet MSL into the target area making right turn after bomb run to the Lamar, Colorado, VOR, thence at 23,000 feet MSL via the Lamar, Colorado, VOR 146° radial to Walsh, Colorado, thence at 23,000 feet MSL direct to the Dalhart, Texas, VOR.

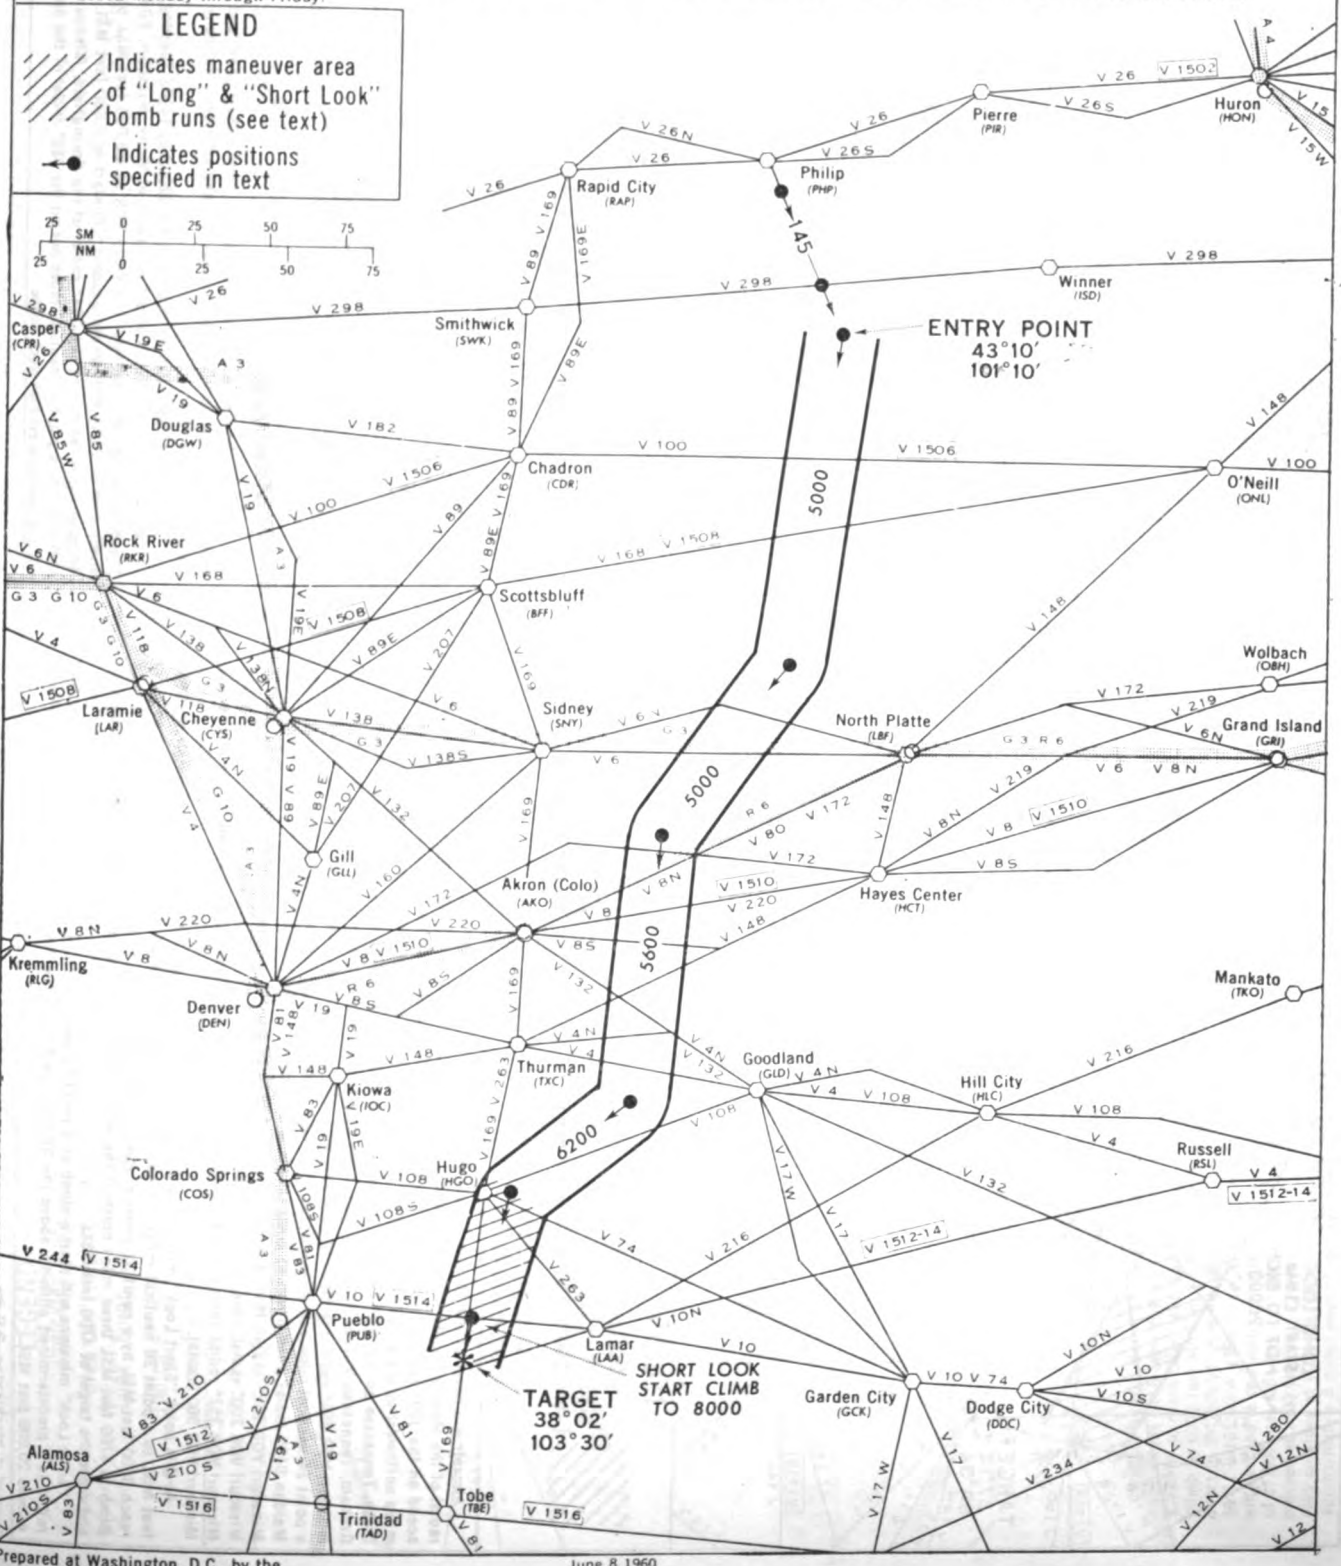
"Short Look" missions will climb after turn point at Springfield, Colorado, Airport from 6000 feet MSL so as to reach 8000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial, aircraft will then make bomb run at 8000 feet MSL. After leaving target, aircraft will continue on a northwest heading at 8000 feet MSL for not more than 20 nautical miles. Then make a right turn to cross Victor Airway 1512 at 38°03'N-102°56'W (intersection of Hugo, Colorado, VOR 143° radial and Lamar, Colorado, VOR 223° radial), maintain 8000 feet MSL until clear of control area; then start climb so as to reach 23,000 feet MSL five miles north of Victor Airway 1516; thence at 23,000 feet MSL direct to Walsh, Colorado, direct to Dalhart, Texas, VOR.

Hours of operation on this route are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

June 8, 1960

SPECIAL NOTICE

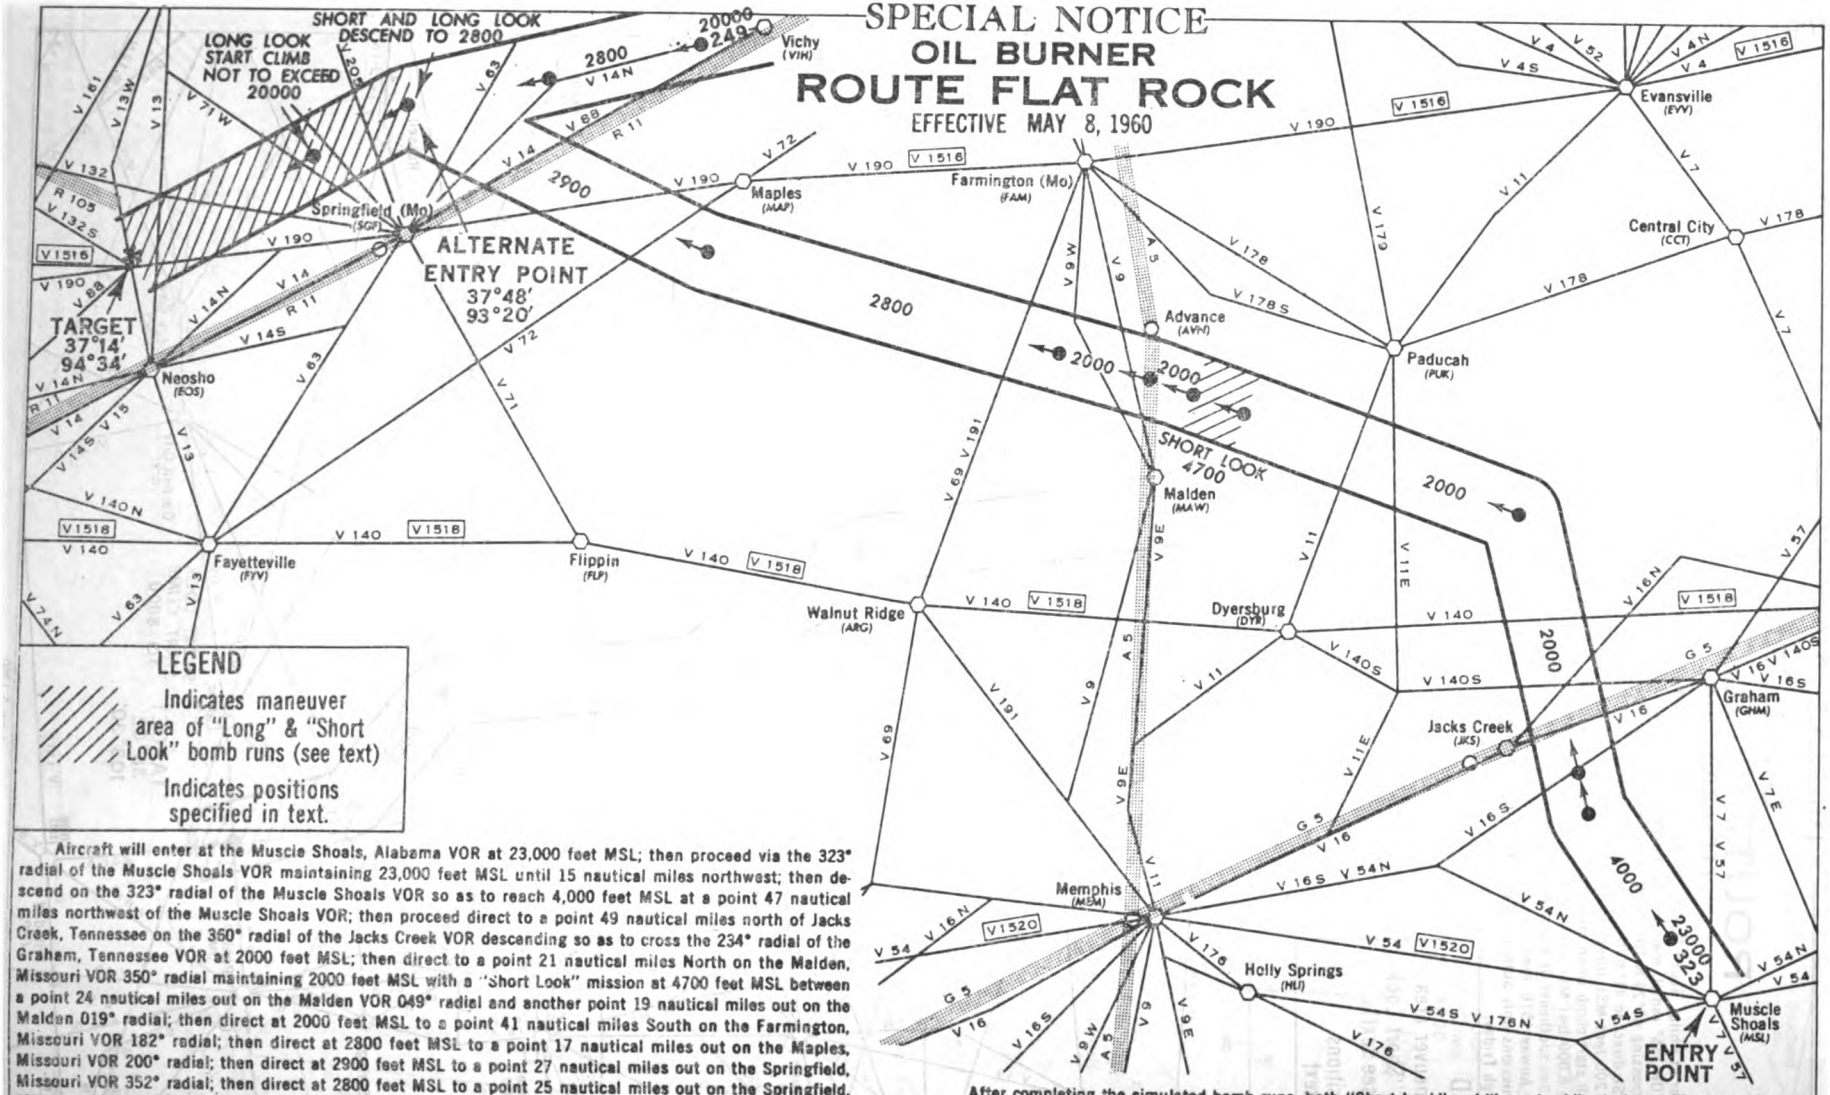


OIL BURNER

ROUTE ROUGH WOOD

EFFECTIVE JUNE 19, 1960

Aircraft will enter at Philip, South Dakota, VOR at assigned altitude/flight level (between 20,000 feet MSL and flight level 250); then proceed via the Philip VOR 145° radial, maintaining assigned altitude until 10 nautical miles southeast of the Philip VOR where descent will start to 5,000 feet MSL, crossing 43°26'N-101°20'W at or below 13,000 feet MSL; proceeding direct to low-level entry point at 43°10'N-101°10'W; then at 5,000 feet MSL direct to 41°30'N-101°30'W; then at 5,000 feet MSL direct to 40°40'N-102°20'W; then at 5,600 feet MSL direct to 39°19'N-102°29'W; then at 6,200 feet MSL direct to 38°52'N-103°13'W; then at 6,000 feet MSL direct to the La Junta, Colorado RBS site at 38°02'N-103°30'W; aircraft will start climb when crossing the Lamar, Colorado VOR 252° radial and reach 8,000 feet MSL when crossing the Lamar VOR 247° radial; maintain 8,000 feet MSL over the La Junta, Colorado RBS Site; turn left to a direct course to Walsh, Colorado, maintain 8,000 feet until five nautical miles southeast of Victor Airway 169; then climb on a direct course to Walsh, Colorado so as to reach 23,000 feet MSL five miles north of Victor Airway 1516; maintain 23,000 feet MSL direct to Dalhart, Texas, VOR.



"Short Look" missions only authorized over this route. Hours of operation are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday.

ROUTE FLAT ROCK
EFFECTIVE MAY 8, 1960

LEGEND

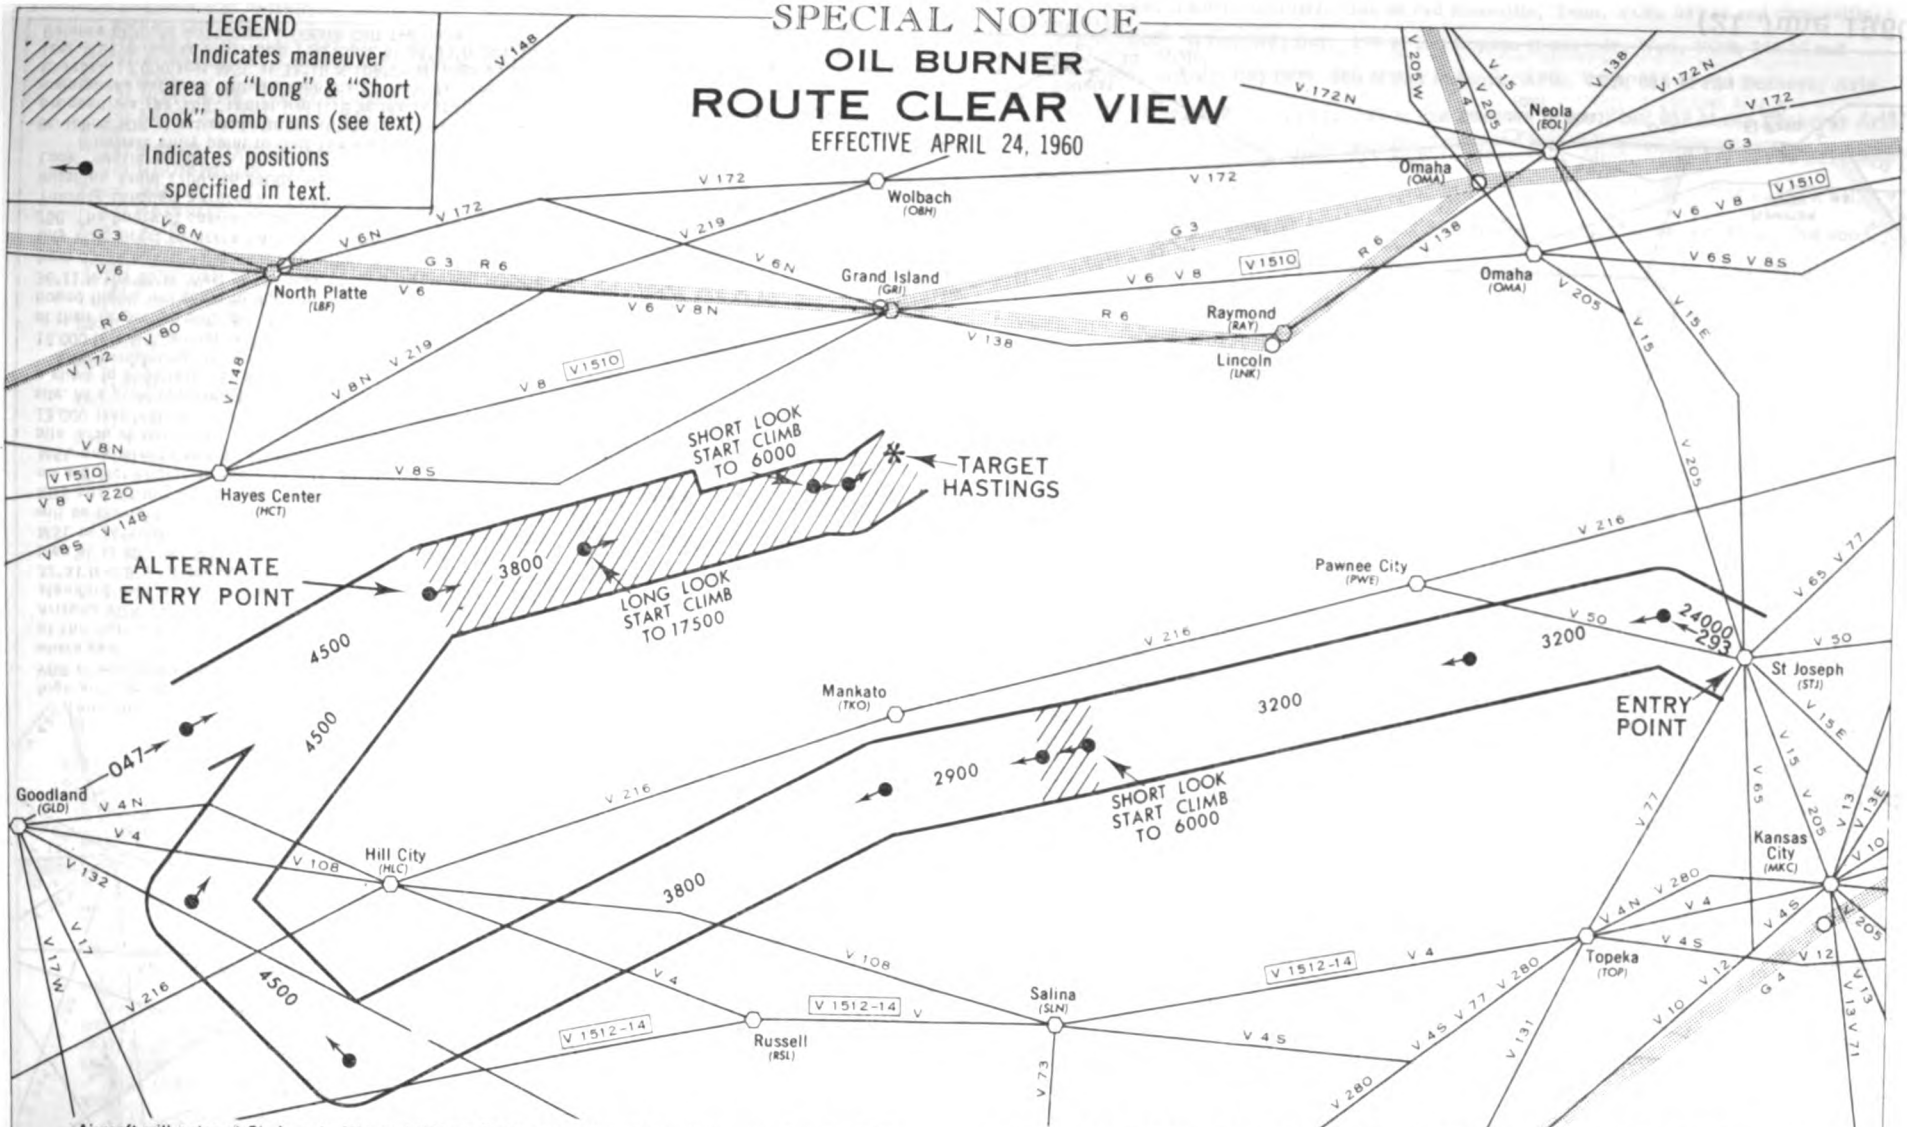
Indicates maneuver area of "Long" & "Short Look" bomb runs (see text)

Indicates positions specified in text.

Aircraft will enter at the Muscle Shoals, Alabama VOR at 23,000 feet MSL; then proceed via the 323° radial of the Muscle Shoals VOR maintaining 23,000 feet MSL until 15 nautical miles northwest; then descend on the 323° radial of the Muscle Shoals VOR so as to reach 4,000 feet MSL at a point 47 nautical miles northwest of the Muscle Shoals VOR; then proceed direct to a point 49 nautical miles north of Jacks Creek, Tennessee on the 360° radial of the Jacks Creek VOR descending so as to cross the 234° radial of the Graham, Tennessee VOR at 2000 feet MSL; then direct to a point 21 nautical miles North on the Malden, Missouri VOR 350° radial maintaining 2000 feet MSL with a "Short Look" mission at 4700 feet MSL between a point 24 nautical miles out on the Malden VOR 049° radial and another point 19 nautical miles out on the Malden 019° radial; then direct at 2000 feet MSL to a point 41 nautical miles South on the Farmington, Missouri VOR 182° radial; then direct at 2800 feet MSL to a point 17 nautical miles out on the Maples, Missouri VOR 200° radial; then direct at 2900 feet MSL to a point 27 nautical miles out on the Springfield, Missouri VOR 352° radial; then direct at 2800 feet MSL to a point 25 nautical miles out on the Springfield, Missouri VOR 300° radial.

At this point "Short Look" missions will proceed to the target at 37°14'N-94°34'W, maintaining 2800 feet MSL to a point 38 nautical miles out on the Neosho, Missouri VOR 013° radial, then climb so as to reach 3500 feet MSL by a point 32 nautical miles out on the Neosho, Missouri VOR 004° radial, to start a climb to 4700 feet MSL three miles north of the Joplin, Missouri low frequency beacon (Waco intersection) and cross the target at 4700 feet MSL.

"Long Look" missions will start a climb at a point 25 nautical miles out on the Springfield VOR 300° radial to a predetermined altitude, above the RBS site as filed in the flight plan. This altitude will never exceed 20,000 feet MSL.



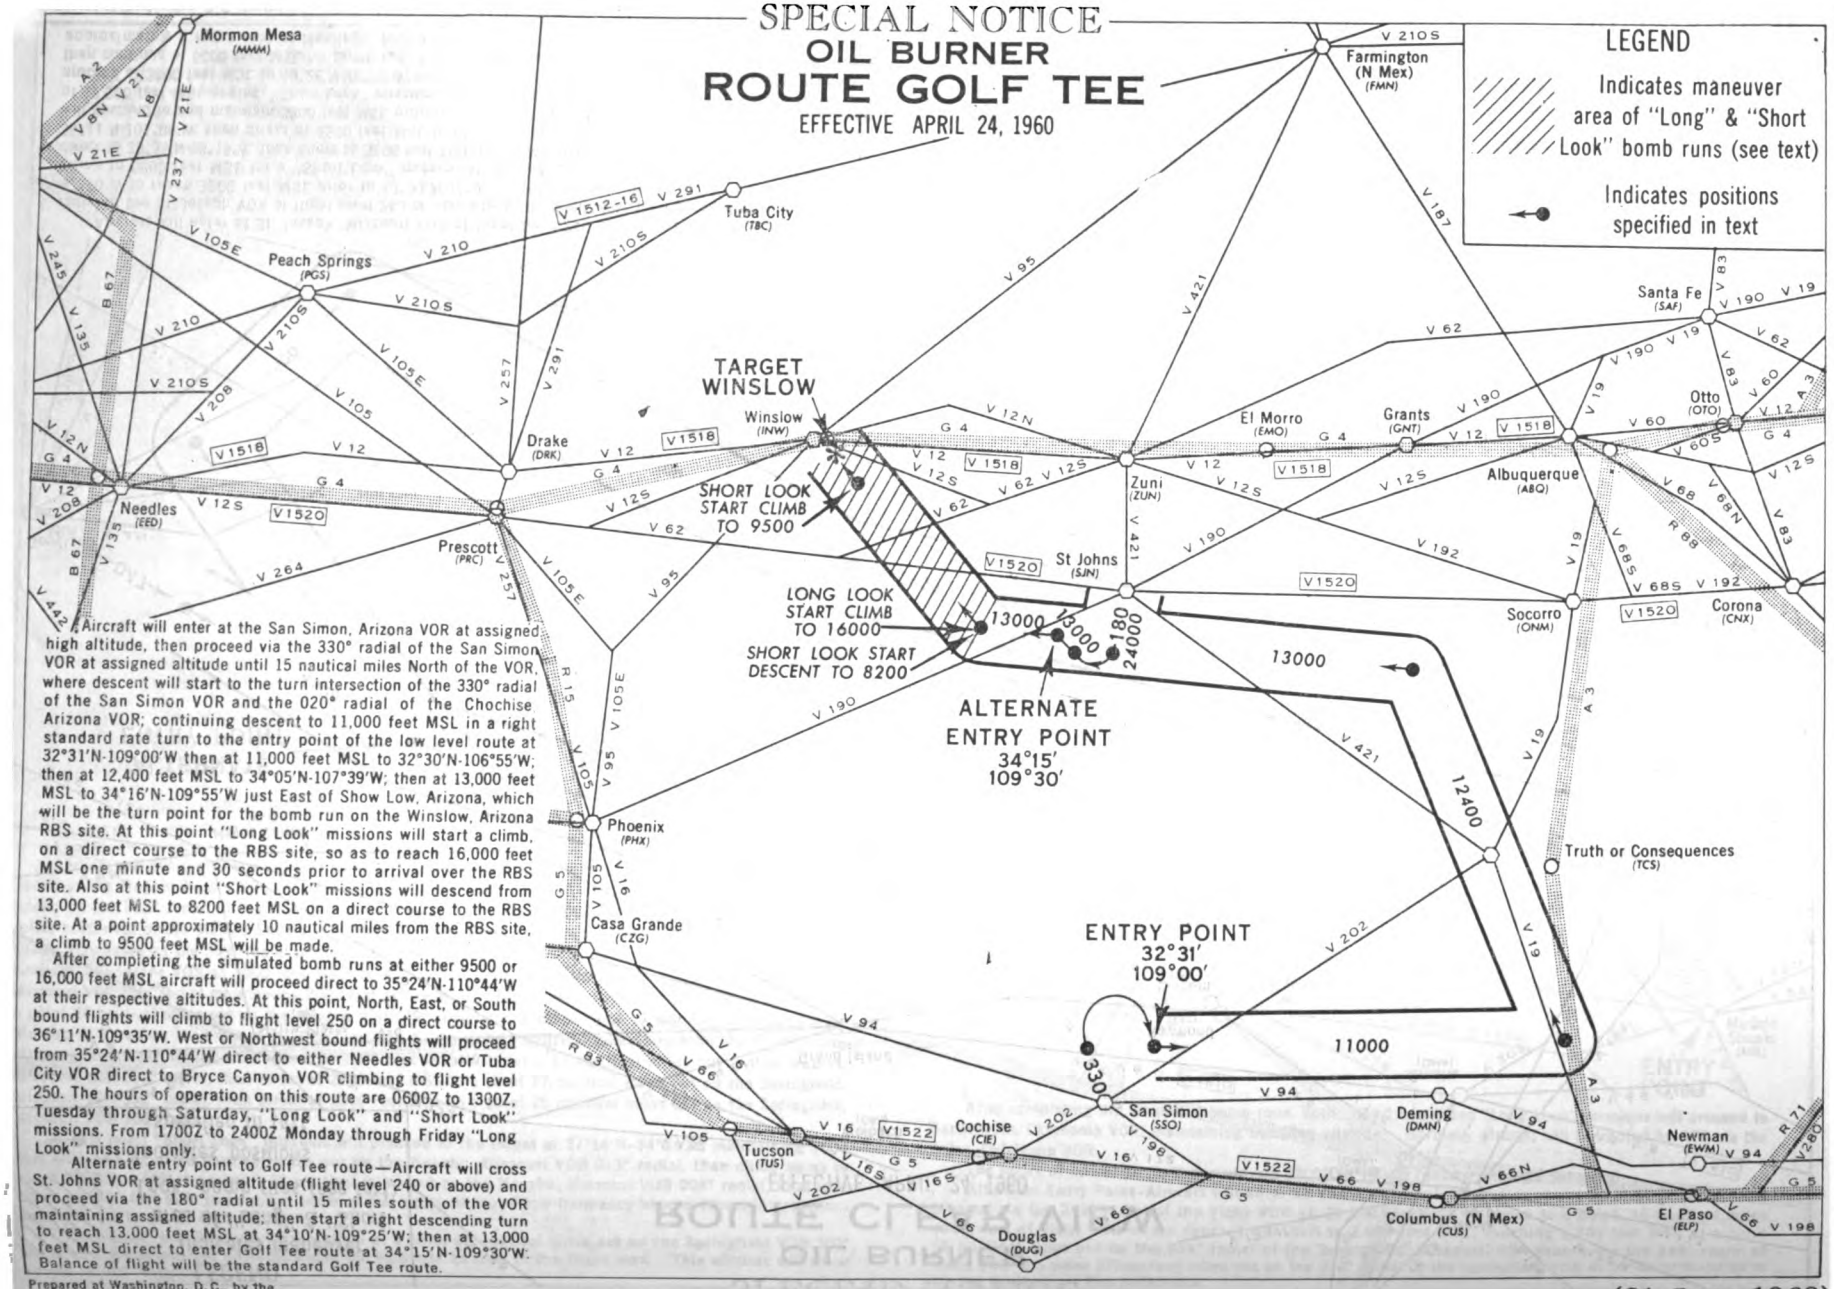
After completing the simulated bomb runs, both "Short Look" and "Long Look" missions will proceed to Bartlesville, Oklahoma VOR, maintaining bombing altitude. Normally aircraft will be routed by ATC via the Tulsa, Oklahoma VOR.

The hours of operation on this route are 0200Z to 1400Z Tuesday through Saturday.

Alternate Entry Point–Aircraft will enter at Vichy, Missouri, VOR at or above 20,000 feet MSL, then proceed via the 249° radial of the Vichy VOR at 20,000 feet MSL or above to a point 15 nautical miles southwest of Vichy VOR where descent will start to 2,800 feet MSL, reaching 2,800 feet MSL at a point 46 nautical miles out on the 034° radial of the Springfield, Missouri, VOR thence via the 249° radial of Vichy VOR to a point 27 nautical miles out on the 352° radial of the Springfield VOR at 37°48'30"N-93°20'W thence continue on Flat Rock route.

Prepared at Washington, D.C. by U. S. Coast and Geodetic Survey

(21 June 1960)



Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above; then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W, then proceed direct to 39°43'N-97°30'W, then climb to 6000 feet MSL for a "Short Look" mission at 39°41'N-97°41'W; then descend to 2900 feet MSL direct to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL; then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes; then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL; then maintain 20,000 feet MSL direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR. "Short Look" missions, after passing the RBS site, will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial; then proceed direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center. The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.

Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL; then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route.

Prepared at Washington, D. C., by the
U. S. Coast and Geodetic Survey

SPECIAL NOTICE
OIL BURNER
ROUTE GOLF TEE
EFFECTIVE APRIL 24, 1960

Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Chochise, Arizona VOR; continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31′N-109°00′W then at 11,000 feet MSL to 32°30′N-106°55′W; then at 12,400 feet MSL to 34°05′N-107°39′W; then at 13,000 feet MSL to 34°16′N-109°55′W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs at either 9500 or 16,000 feet MSL aircraft will proceed direct to 35°24′N-110°44′W at their respective altitudes. At this point, North, East, or South bound flights will climb to flight level 250 on a direct course to 36°11′N-109°35′W. West or Northwest bound flights will proceed from 35°24′N-110°44′W direct to either Needles VOR or Tuba City VOR direct to Bryce Canyon VOR climbing to flight level 250. The hours of operation on this route are 0600Z to 1300Z, Tuesday through Saturday, "Long Look" and "Short Look" missions. From 1700Z to 2400Z Monday through Friday "Long Look" missions only.

Alternate entry point to Golf Tee route—Aircraft will cross St. Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude; then start a right descending turn to reach 13,000 feet MSL at 34°10′N-109°25′W; then at 13,000 feet MSL direct to enter Golf Tee route at 34°15′N-109°30′W. Balance of flight will be the standard Golf Tee route.

(21 June 1960)

LOW ALTITUDE AIRWAYS

The following air traffic service routes have been established, changed or removed as indicated effective 28 July 1960.

(1) BELLTON, GA(VHF) INT: 230 M rad Toccoa, Ga. VOR; 328 M rad Athens, Ga. VOR.
(2) FORMAN, N. J.(VHF) INT: 208 M rad Robbinsville, N.J. VOR; 267 M rad Coyle

(21) BASAR, TENN(VHF) INT: 155 M rad Knoxville, Tenn. VOR; 097 M rad Cressville, Tenn. VOR.
(22) HUDSON, WYO(VHF) INT: 170 M rad Boysen Reservoir, Wyo. VOR; 246 M rad Casper, Wyo. VOR.

✓ ON REQUEST REPORTING POINTS: The following on-request reporting points have been established, modified, cancelled or renamed as indicated effective 28 July 1960:

ESTABLISHED:

(1) BELLTON, GA(VHF) INT: 230 M rad Toccoa, Ga. VOR; 328 M rad Athens, Ga. VOR.

(2) FORMAN, N. J.(VHF) INT: 208 M rad Robbinsville, N.J. VOR; 267 M rad Coyle, N.J. VOR.

(3) NORCROSS, GA VOR(Change to on-request when cancelled as compulsory.)

(4) MONTEZUMA, GA(VHF) INT: 227 M rad Macon, Ga. VOR; 285 M rad Vienna, Ga. VOR.

(5) FLINT, GA(VHF) INT: 163 M rad Atlanta, Ga. VOR; 266 M rad Macon, Ga. VOR.

(6) BLUE RIDGE, GA(VHF) INT: 008 M rad Atlanta, Ga. VOR; 105 M rad Chattanooga, Tenn. VOR.

(7) RAINBOW, N C(VHF) INT: 166 M rad Knoxville, Tenn. VOR; 087 M rad Chattanooga, Tenn. VOR.

(8) BANNING, CALIF(VHF) INT: 076 M rad Ontario, Calif. VOR; 046 M rad March, Calif. VOR. (Change to on-request when cancelled as compulsory.)

(9) BUFORD, GA(VHF) INT: 025 M rad Norcross, Ga. VOR; 288 M rad Athens, Ga. VOR.

(10) SPRING BAY, UTAH(VHF) INT: 183 M rad Malad City, Utah VOR; 303 M rad Salt Lake City, Utah VOR.

(11) AVANT, ARK(VHF) INT: 268 M rad Little Rock, Ark. VOR; 340 M rad El Dorado, Ark. VOR.

(12) CLEO SPRINGS, OKLA(VHF) INT: 180 M rad Anthony, Kans. VOR; 255 M rad Vance, Okla. VOR. (MRA 2800. Depict flag)

(13) HORLICK, WIS(VHF) INT: 017 M rad Chicago(O'Hare), Ill. VOR; 120 M rad Milwaukee, Wis. VOR.

(14) SKIPPER, MASS(VHF) INT: 103 M rad Boston, Mass. VOR; 149 M rad Manchester, N.H. VOR.

(15) VALLEY, CALIF(LF) INT: 253 M brg from Burbank, Calif. LFR; 323 M brg from Los Angeles, Calif. Rbn.

(16) STEPHEN, S. DAK(VHF) INT: 094 M rad Pierre, S. Dak. VOR; 244 M rad Huron, S. Dak. VOR.

(17) CANOVA, S. DAK(VHF) INT: 130 M rad Huron, S. Dak. VOR; 279 M rad Sioux Falls, S. Dak. VOR.

MODIFIED:

(1) GWYNN, VA(VHF) INT: 320 M rad Cape Charles, Va. VOR; 008 M rad Norfolk, Va. VOR.

(2) MATHEWS, VA(VHF) INT: 297 M rad Cape Charles, Va. VOR; 008 M rad Norfolk, Va. VOR.

(3) BRYCELAND, LA(VHF) INT: 261 M rad Monroe, La. VOR; 109 M rad Shreveport, La. VOR.

(4) WALNUT, KANS(VHF) INT: 019 M rad Oswego, Kans. VOR; 091 M rad Chanute, Kans. VOR.

(5) McCUNE, KANS(VHF) INT: 019 M rad Oswego, Kans. VOR; 108 M rad Chanute, Kans. VOR.

(6) JAMESTOWN, LA(VHF) INT: 261 M rad Monroe, La. VOR; 121 M rad Shreveport, La. VOR.

(7) CUPPLES, LA(VHF) INT: 146 M rad Shreveport, La. VOR; 083 M rad Gregg Co., Tex. VOR.

(8) LUCIEN, LA(VHF) INT: 168 M rad Shreveport, La. VOR; 083 M rad Gregg Co., Tex. VOR.

(9) BETHANY, LA(VHF) INT: 198 M rad Shreveport, La. VOR; 083 M rad Gregg Co., Tex. VOR.

(10) BRONWOOD, GA(VHF) INT: 348 M rad Albany, Ga. VOR; 238 M rad Vienna, Ga. VOR.

(11) AMERICUS, GA(VHF) INT: 348 M rad Albany, Ga. VOR; 259 M rad Vienna, Ga. VOR.

(12) JUNCTION CITY, GA(VHF) INT: 178 M rad Atlanta, Ga. VOR; 084 M rad Columbus, Ga. VOR.

(13) CONCORD, GA(VHF) INT: 178 M rad Atlanta, Ga. VOR; 080 M rad La Grange, Ga. VOR.

(14) BOBBY JONES, GA(VHF) INT: 033 M rad Atlanta, Ga. VOR; 332 M rad McDonough, Ga. VOR.

(15) CRABAPPLE, GA(VHF) INT: 008 M rad Atlanta, Ga. VOR; 294 M rad Norcross, Ga. VOR.

(16) NELSON, GA(VHF) INT: 008 M rad Atlanta, Ga. VOR; 273 M rad Royston, Ga. VOR.

(17) TALLASSEE, TENN(VHF) INT: 197M rad Knoxville, Tenn. VOR; 103 M rad Crossville, Tenn. VOR.

(18) COLLEGE, GA(VHF) INT: 010 M rad Norcross, Ga. VOR; 273 M rad Royston, Ga. VOR.

(19) CLERMONT, GA(VHF) INT: 025 M rad Norcross, Ga. VOR; 273 M rad Royston, Ga. VOR.

(20) FONTANT, TENN(VHF) INT: 181 M rad Knoxville, Tenn. VOR; 110 M rad Crossville, Tenn. VOR.

(4) HENDERSON, COLO FM: direction of holding - N on N crs. Denver, Colo. LFR; direction of turns-left; time - 1 min; MHA - 7000'.

RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective on 28 July 1960:

(Part 608)

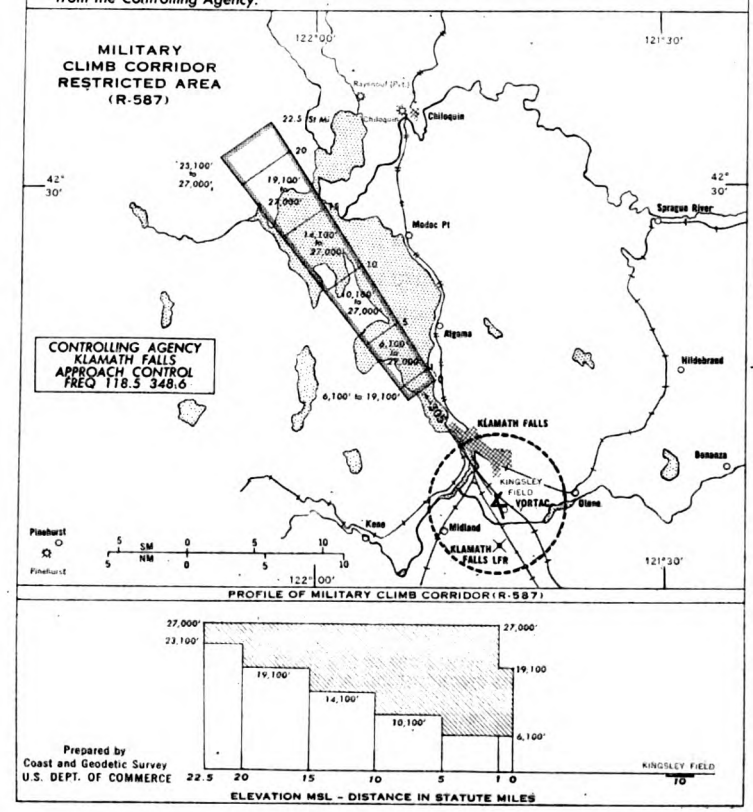
(1) In Section 608.30, Mount Clemens, Mich., (Selfridge AFB) Restricted Area/Military Climb Corridor (R-579) add the following: Description - That area based on the 336° T radial of the Selfridge AFB TVOR beginning 5 smi NW of the airbase and extending 32 smi NW of the airbase, having a width of 1 smi W and 3 smi E of the 336°T radial at the beginning and a width of 2.3 smi on each side of the 336°T radial at the outer extremity. Designated altitudes - 2, 600' MSL to 15, 600' MSL from 5 smi NW of the airbase to 6 smi NW of the airbase. 2, 600' MSL to 24, 600' MSL from 6 to 7 smi NW of the airbase. 2, 600' MSL to 27, 000' MSL from 7 to 10 smi NW of the airbase. 6, 600' MSL to 27, 000' MSL from 10 to 15 smi NW of the airbase. 10, 600' MSL to 27, 000' MSL from 15 to 20 smi NW of the airbase. 15, 600' MSL to 27, 000' MSL from 20 to 25 smi NW of the airbase. 19, 600' MSL to 27, 000' MSL from 25 to 32 smi NW of the airbase. Time of designation - continuous. Controlling agency - Selfridge AFB Apch Ctl.
(2) In Section 608.33, the Fort Leonard Wood, Mo., Restricted Area (R-199) amended by deleting "surface to 50, 000' MSL." and substituting therefor "Surface to 6, 000' MSL."

RADAR - On page 30 of Flight Information Manual Volume 13, dated December 1959, add subtopic No-Gyro Vector or Approach - Aircraft Under Radar Control: A pilot under radar control will occasionally experience circumstances wherein his directional gyro or other stabilized compass is inoperative or inaccurate. When this occurs, he should so advise air traffic control and request a no-gyro vector or approach. Pilots of aircraft not equipped with a directional gyro or other stabilized compass who desire radar handling may also request a no-gyro vector or approach. Prior to commencing such vector/approach the pilot will be advised to make all turns at standard rate, and that turn instructions should be executed immediately upon receipt. For example, "Turn Right"; "Stop Turn." When a surveillance or precision approach is made the pilot will be advised after his aircraft has been turned onto final approach to make turns at half standard rate.

RADAR WEATHER ADVISORY SERVICE- On pages 31 and 32 of Flight Information Manual Volume 13 dated December 1959, under Radar Advisory Service Air Defense Command delete listings under Michigan, Oregon and Washington.

GOOD OPERATING PRACTICES-IFR RADAR DEPARTURE SERVICE AVAILABLE- On page 53 of Flight Information Manual Volume 13 dated December 1959, delete paragraph 12.

SPECIAL NOTICE



OREGON

KLAMATH FALLS (KINGSLEY FIELD) MILITARY CLIMB CORRIDOR

EFFECTIVE 0001 E.S.T. JUNE 30. 1960

(This Special Notice will not normally be revised or reissued.)
(Refer to Aeronautical Charts for current information)

Pilots of Century Series aircraft on active air defense missions are unable to see and safely avoid other aircraft during the climb phase of a scramble. In the interest of safety, the Dept. of Defense and the FAA have agreed to establish restricted corridors to segregate such operations from other air traffic. ALL FLIGHTS through these areas must obtain prior approval from the Controlling Agency.

AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60.23(A) of part 60 of the Civil Air Regulations has been granted to the Air Defense Command and they are conducting Interceptor Training against target acft without navigation lights at and above flight level 400 within the continental limits of the U. S. A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.

(21 June 1960)

INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Station, leased telephones services are provided to the nearest	New London-Groton, Conn.	GI 3-3345	Providence, R.I.	Hillsboro Arpt., Oreg.	Portland, Oreg.
				Lockheed Air Terminal, Burbank	Los Angeles, Calif.

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Stations, leased telephones services are provided to the nearest FAA station. One such service, entitled "Foreign Exchange" (FX), permits dialing a local number which will connect to the distant FSS at the cost of a local call Another is "Interphones" a private line extension to the nearest FAA station and is normally located in the operations office at an airport where it is available to all pilots. Fixed base operators at the same airport may lease extension service on these lines for the convenience of pilots at the cost of a local telephone extension.

The locations provided with the above services follows:

IMPORTANT NOTICE - NEW FREQUENCY ASSIGNMENTS

Commensurate with FAA's efforts to improve the overall air traffic control communications system and to relieve congestion on the existing communications channels, an additional five megacycles of spectrum space is being made available to the aeronautical user effective July 1, 1960. In order to obtain maximum utilization of these additional radio frequencies, FAA is initiating a program of new frequency assignments within the band 118-135 MC/S at 0800 GMT on July 7, 1960.

This implementation invloves several hundred frequency changes throughout the United States, not including Alaska and Hawaii. To facilitate the users' transition to the new frequencies and to provide the greatest advance notice of the specific changes, we are presenting the following tabulation in terms of location, traffic control function, new frequency to be activated July 7, 1960, and existing frequency. Further, note also that many frequencies now assigned (shown in the "old frequency" column) have either been changed or will serve a different function.

LEGEND: H - High Altitude 24,000' and above
I - Non-Radar Sectors 23,000' and below
Ir - Radar Sectors 23,000' and below
A - Center Area Discrete 23,000' and below

(21 June 1960)

LIST OF PERSONS NOT PERMITTED TO FLY TO OR OVER CUBA IN PRIVATE PLANES: On November 1, 1959, the Secretary of State, under the powers delegated to him by Presidential Proclamation 3004 and pursuant to the provisions of Section 215 of the Immigration and Nationality Act and regulations and rules prescribed thereunder, requested the Attorney General to prevent the departure of certain persons to or over Cuba in private aircraft. Pursuant to this request, the Commissioner of Immigration and Naturalization Service has served "Notice of Prevention of Departure" on the below-listed individuals.

Section 215 of the Immigration and Nationality Act provides that if a plane is used as an instrument for the illegal departure of a person from the United States contrary to such an order, the plane is subject to confiscation in addition to criminal penalties which may be imposed on the violator or persons who aid and abet violators.

The Service continues investigation of all illegal activities in the United States in connection with the present situation in Cuba. From time to time additions to the list may be made. In the meantime, if a person seeking to rent a plane is not well known to you or there is any doubt as to whether he is in any way connected with illegal Cuban activities, you are requested to call the nearest Immigration and Naturalization Service office for advice. You may also obtain this information from the Flight Information Center, Miami, Florida, telephone FRanklin 7-1495, which is operated by the Immigration and Naturalization Service.

Your cooperation in this matter will materially aid the Immigration and Naturalization Service in carrying out its mission and possibly save you the loss of an aircraft.

✓ AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide Volume 15, Number 6 dated 24 May 1960, as follows:

(1) On-Request Reporting Points - Modified - Effective 30 June 1960:
(a) Page 54, correct item (18) to read: ALBACORE, CALIF (LF) INT: 038 M rad Santa Catalina, Calif. VOR; 342 M brg to Long Beach, Calif. LFR.

(2) On-Request Reporting Points - Renamed - Effective 30 June 1960:
(a) Page 55, correct item (4) to read: ALMA CITY, MINNESOTA.

(3) Flight Advisory Service in Specified Areas:
(a) Page 49, correct item (24 c.) to read: Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif. 264° M radial; to Int. of Palmdale, Calif. 264° M radial and J-1-V.

✓ MEA, MCA, MOCA, MRA, INTERSECTIONS AND REPORTING POINTS: (1) Until further advised effective June 21, 1960, the following MEAs are established due to the decommissioning of the Thermal, Calif. LFR: G-5, from Riverside, Calif. LFR to Blythe, Calif. LFR 13,000'; Banning, Calif. FM to Riverside LFR, westbound only 10,000', MCA 11,000' Riverside LFR, eastbound. R-65 from Julian, Calif. Rbn to Hayfield Lake, Calif. Rbn 9,000'. The Salton Int, Calif LF is cancelled. (2) Effective 6/30/60, the following MEAs are established: V-171, from Nodine, Minn. VOR to Elba Int, Minn 2800'; Elba Int. to Goodhue Int, Minn MEA 3800', MOCA 2200'; Goodhue Int to Farmington, Minn VOR 2200'.
(21 June 1960)

the USAF, with conditions likely to include flights at low altitudes to avoid detection by the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly heavy traffic patterns. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

✓ AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY
New editions of the charts listed below will be published in about 1 month, making former prints obsolete for aviation use. Keep orders to a minimum until new edition is printed.

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by the USAF when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 43-22-30N, 94-04-00W, (entry-call Mason City Radio), 43-28N, 91-00W, 42-21N, 90-54-30W; 40-25N, 92-07-30W; 40-22N, 92-31W(end nav. leg) to target 40-14N, 93-36W. Note: for a bomb run only, entry reporting will be 41-00N, 91-45W(call Ottumwa Radio); remainder of route is identical with above.

Route 2-M-1: Start at 31-45N, 91-49W (entry-call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N, 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg). 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N, 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-R-2: Start at 35-38N, 99-11W; to start climb point 36-12N, 98-14W; to termination 36-45N, 98-11W. Entry reporting point- Sayre Radio.

Route 2-R-3: Start at 36-22N, 92-14W; to 36-26N, 93-50W. Entry reporting point-Springfield Radio.

Route 2-S-1: Start at 29-29, 91-46, (entry reporting point-Baton Rouge VOR); to turning point 28-00, 91-30; to turning point 27-00, 92-30; to turning point 27-50, 94-00; to navigation termination point, bomb run entry point, and LONG LOOK start climb (if applicable) 27-50, 95-45; to SHORT LOOK start climb (if applicable) 28-11, 96-34; to target at Matagorda Island 28-13-30, 96-39-00. After bombs away, proceed to 28-21-30, 96-42-00, then right turn to Palacios VOR. On SHORT LOOK mission do not exceed 5000' MSL until past Port O'Connor, Texas. On LONG LOOK do not descend below 18,000' MSL until past Port O'Connor, Texas.

Route 2-T-1: Start at 42-00N, 96-12W; to target 42-51N, 97-29W. (Entry reporting point-Sioux City Radio).

Route 2-T-2: Start at 42-30N, 97-49W to target 41-26.5N, 96-36W. (Entry reporting point Point-O'Neil Radio).

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N, 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15 - A - 3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-D-3: Start descent at Hudspeth VOR, Texas to start low level point at 31-08N, 105-10W to start climb at 30-48N, 104-46W to target at 30-18N, 104-02W.

Route 15-E-1: Start descent 44-28N, 100-40W, entry point 44-34 1/2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1/2N, 103-36W.

Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-G-1: Cross Ukiah, California VOR at flight altitude (entry point) - (Call Ukiah Radio), descend to start low level 39-06N, 124-17W to 39-08N, 124-45W; 40-24N, 125-29W; 42-20N, 125-35W; 43-08N, 126-00W to climb point 43-32N, 124-48W to start climb for Long Look at 43-43N, 124-17W or to start climb for Short Look at 43-54N, 123-20W to target 43-58N, 123-05W, S of Eugene, Oregon.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.

Route 15-M-2: 36-18 1/2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.

Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEOGETIC SURVEY

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

TRANSITION				CEILING AND VISIBILITY MINIMUMS

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE Terminal VOR

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE ILS (Continued)

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
From	To	Course and Distance	Minimum Altitude	Condition	Two Engine or Less: 65 Knots or Less	Two Engine or Less: More Than 65 Knots	More Than Two Engine, More Than 65 Knots

FEDERAL AVIATION AGENCY

AIRMAN'S GUIDE

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and/or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Inportant or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and/or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below.

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction; or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.

adjt	adjacent	dptr	departure	jctn	junction
awy	airway	efctv	effective	nmi	nautical miles

ALWAYS CHECK NOTICES TO AIRMEN SECTION

RADAR - RADIO LISTINGS

FSS = Flight Service Station (FAA) (Formerly ATCS)

VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:
Category I = Course alignment and signal level are monitored continuously. Category II = (No longer in use; formerly applied to VAs). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an FSS, and located too distant from an FSS to be monitored with a VHF receiver will fall into Category III. NOTE: Category I, II, III shown by (1), (2), (3) before name in Location Column.

LEGEND

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities.

(A) = Air Force facility
(N) = Navy facility
(P) = Private facility
(S) = State facility
(0700-2300) = Hours of operation local time
(3) = Monitoring category
→ = New or revised data
[redacted] = Information deleted

RADIO CLASS DESIGNATIONS

Identification of VOR/VORTAC/TACAN Stations by Class: (Operational Limitations)

Class	Normally Anticipated Altitude Service	Normally Anticipated Interference-free Distance Service
H-VOR	75,000' MSL	180 smi (156.31 nmi)
M-VOR	30,000' MSL	90 smi (78.16 nmi)
L-VOR	15,000' MSL	45 smi (39.08 nmi)

AC . . . . . Approach Control Tower, FAA (transmits on voice channel or associated ranges and ILS in addition to frequencies listed
B . . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, FAA
CI . . . . . Control Tower (City, County, Private, etc.)
CM . . . . . Control Tower (Military, listing only civil frequencies available)
CONSOLAN . . . LF/MF long range navigation aid; aircraft must have BFO oscillator
D . . . . . Distantly controlled
DME . . . . . Distance Measuring Equipment
DMET . . . . . TACAN collocated DME
FM . . . . . VHF fan marker (100 watts)
GCA . . . . . Ground Controlled Approach System
H . . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH . . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . . . . Instrument Landing System (voice or localizer channel)
J . . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM . . . . . VHF fan marker, low power (5 watts)
LMM . . . . . Compass locator station when installed at middle marker site
LOM . . . . . Compass locator station when installed at outer marker site
MA . . . . . Range (adcock, vertical radiators), power less than 50 watts
MH . . . . . Non-directional radio beacon (homing) power less than 50 watts
ML . . . . . Range (loop radiators), power less than 50 watts
MM . . . . . VHF middle marker
MRA . . . . . Range (adcock, vertical radiators) power 50 watts or more, but less than 150 watts
MRL . . . . . Range (loop radiators), power 50 watts or more, but less than 150 watts
OM . . . . . VHF outer marker
RA . . . . . Range (adcock, vertical radiators), power 150 watts or more
RL . . . . . Range (loop radiators), power 150 watts or more
S . . . . . Simultaneous range, homing signal and/or voice
T . . . . . Teletype
TACAN . . . . . UHF omni-directional bearing and distance type facility
TX . . . . . Principal teletype
V . . . . . Additional VHF voice feature on other than range frequency
VOR . . . . . VHF omni-directional range (omni-range)
VORTAC . . . . Combination of VOR and TACAN
W . . . . . Without voice facilities on range frequency
Z . . . . . VHF station locator marker at a range station

NOTES

1. Range courses are magnetic in-bearings.
2. All FAA MH facilities operate continuously unless cited as follows: (on req)
3. All FAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF/LMF ranges listed with the same identifier are controlled by the same FSS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility.

RADAR AVAILABLE

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar.
ARSR = Air Route Surveillance Radar

FAA RADAR UNITS - Operate continuously at the locations listed below. Available to all pilots, civil and military. Contact associated FAA control tower on any frequency guarded for initial instructions, or in an emergency any FAA facility for information on nearest Radar Control. Weather minimums, associated runway and GCA procedures are listed in the Airman's Guide.

RADAR APPROACH CONTROL (RAPCON) - At certain USAF locations, approach control and the ASR portion of RAPCONS is operated by the FAA and service is available to all aircraft.

RADAR AIR TRAFFIC CONTROL CENTER (RATCC) - At certain US Navy locations, approach control and the ASR portion of the RATCCS is operated by the FAA and service is available to all aircraft.

RADAR BEACONS - Secondary radar beacon ground equipment is normally associated with a surveillance radar system and is used for target reinforcement and identification of aircraft equipped with a radar beacon transponder, either military or civil. One of two types of ground equipment is now available for operation at all FAA operated RAPCON facilities, some FAA air route traffic control centers, and at all ADC long range radar facilities.

AIR TRAFFIC CONTROL RADAR BEACON SYSTEM (ATCRBS) - ATCRBS is similar to and compatible with the military coded radar beacon equipment (Mark X (SIF)). Civil Mode A is identical to military Mode 3. Civil and Military transponders will be adjusted to reply in Mode A (military Mode 3) as follows:

1. Civil turbojet aircraft transponders - reply on Code 40 at all times while in flight, unless otherwise advised.
2. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 02 when operating on IFR flight plan unless otherwise advised by ground radar facilities.
3. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 62 while operating VFR or VFR-on-top unless advised otherwise by air traffic control (ATC). Code 62 will also be used by such aircraft when operating VFR or VFR-on-top within radar advisory areas between flight levels 240 and 390, inclusive. (See ACIC En Route - High Altitude charts for radar advisory areas and procedures relating thereto.)
4. Under no circumstances shall civil aircraft operate on Code 00.
5. Civil and military transponders will be operated in "STANDBY" while taxiing for take-off and after landing, or when requested by ATC. This action is necessary to eliminate undesirable interference and clutter on certain radar displays. Therefore, departing pilots should turn transponder to "ON" as late as practicable before commencing take-off, and landing pilots should turn transponder to "STANDBY" as soon as practicable after completing landing roll.
6. Civil and military pilots, when filing a domestic IFR flight plan, shall make known the fact that their aircraft are equipped with a functioning transponder by adding the word "transponder" immediately following the aircraft identification. An aircraft with a transponder not having coding capability (Basic Mark X) will be indicated by adding the words "no code" in the "Remarks" section of the flight plan.
7. Aircraft departing from within a United States domestic control area to points outside the United States will comply with 6 above. Transponder equipped aircraft entering a United States domestic control area from outside the United States will, when making the first radio report to the United States air traffic control center, advise of availability of such equipment by adding the word/s "transponder" or "no code transponder," as appropriate, to its identification.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach glide path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide slope desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with GCA which is an instrument approach aid, NOTE: Radar arrival and departure control available all locations, unless otherwise cited.

FAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 1180mc are not guarded; others listed plus 3023.5 kc are guarded unless otherwise shown under Remarks. Frequency 122.5 mc is guarded unless either 122.6 mc or 122.7 mc is shown. (Guarding frequencies not applicable to ARSR facilities) Emergency frequency 121.5 mc transmits and guards at all locations.

ILS localizer identifier is preceded by International Morse Code "I" (two dots). Time interval between the "I" designator and the first letter of the assigned characteristic will be 0.6 second. * -Automatic voice identification. **-Distance from markers to approach end ILS runway. NOTE: The service area of compass locators is 15 miles.
(L5) - Instrument Approach (neon) (L7) - Hi-intensity Approach Lights W - Without voice BC - Back course BC-restricted = Not suitable for approaches

V = 122.2, 126.7, , 135.9 mc transmitted. ϕ = Guards same VHF and UHF freqs facility transmits except 122.2, 120.7 mc. (1) = 3023.5 kc guarded. (2) = 3023.5 kc; 122.5 mc. (3) = 3023.5 kc; 122.1, 126.7, 135.9 mc. e.g. (3)-135.9 guards every frequency in group (3) except 135.9 mc. (g) = Tower equipped with 121.9 mc or (g.7) = Tower equipped with 121.7 mc for control of ground traffic. EMERGENCY FREQUENCY (121.5 mc) transmits and guards at all ATCS, Towers (FAA and Military), Centers and DF Stations; this frequency is not tabulated in the list above. * = Automatic voice identification. NOTE: FIRST FREQUENCY LISTED IS THE NAVIGATIONAL AID CHANNEL; OTHERS ARE COMMUNICATIONS CHANNELS.

✓ CITY AND AIRPORT NAME

City or Airport Name followed by:

(AF) - A civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above citation of A, N, CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, Marine Corps and National Guard Fields, respectively.

(P) - A civil airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) - Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

● - Indicates Scheduled Airline Stop.

NOTES:
1. Where lights are owned or maintained by FAA the site number and airway abbreviation are included in the city and airport name column ie: Chadron, 15, CYS-HON.
2. USAF aircraft are permitted to use only those fields with AF, A, N, MC, NG, CG, P, PC, after airport name.
3. When city and airport names are identical, the airport name is omitted to conserve space.
4. When city is part of airport name, a dash will appear between city and airport, such as Venice-State.

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is from the center of referenced city to airport and carried in statute miles.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Elevation is given in feet above mean sea level and is based on highest usable portion of landing area.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY AND FACILITIES

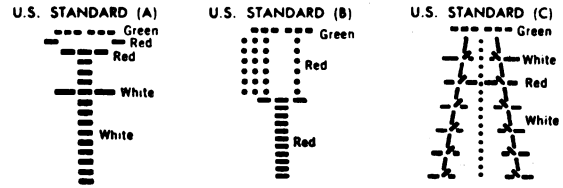
In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, weather reports, and unicom available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet, using 70 as division point. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h -runway is paved (concrete, asphalt or similar type of paving)

aw -allway field



LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise)

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Portable lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or Strip
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

7a, 7b, 7c - High intensity instrument approach, U.S. Nat. Stand.configuration A, B, or C. as below:

*An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor airframe repairs
S3: Storage, minor airframe & minor powerplant repairs
S4: Storage, major airframe & minor powerplant repairs
S5: Storage, major airframe & major powerplant repairs

NOTE: Any S combination without parentheses indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parentheses-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or FAA communications station on field.

UNICOM

Unicom (Aeronautical Advisory Station transmitting and receiving, during the airport hours only, as follows):
U - 122.8 mc (for airports without a control tower; and
X - 123.0 mc (for airports with a control tower).

FUEL

F1: 80 oct., at least	F5: 115/145 oct., and lower
F2: 80/87 oct., and lower	F6: Kerosene
F3: 91/96 oct., and lower	F7: JP-4
F4: 100/130 oct., and lower	F8: JP-5

Any combination without parentheses indicates full time day attendant, in parentheses is part-time or irregular attendant.

REMARKS

(a) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.
(b) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.
(c) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

NOTES

1. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
2. The Federal Government disclaims responsibility for non-Federal airports.

Elevation is given to feet above mean sea level and is based on highest usable portion of landing area.

*An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the facility is operated on a part-time basis. Hours of operation are shown in parentheses.

NOTES

1 OBSTRUCTIONS Because of space limitations only the most dangerous obstructions are listed. Pilots should assume that all trees are 50 feet high and all towers are 500 feet high unless otherwise specified.

Procedure does not apply to VFR acft deptg OAK for SFO due short distance--these VFR flts call SFO twr freq 120.5 mc. Preferential rnwy system under VFR conditions in effect as follows: TAKE-OFFS: (a) Use rnwys 1 when operationally feasible. (b) When rnwys 28 are used-climb to 1500' MSL as rapidly as practical. Acft making rgt turn, do so as soon as possible after passing arpt bndry unless otherwise instructed by twr. No left turns should be made prior to reaching San Francisco Gap Marker and 1500' MSL. (c) When rnwys 19 are used, large acft, under normal conditions, shall make left turn as soon as practicable after passing arpt bndry unless otherwise instructed by twr. LANDINGS: Normally use rnwys 28. Inbnd acft normally maintain 3000' MSL until past the shoreline and over San Francisco Bay, unless making ILS apch. Acft lndg rnwys 1 shall make a turn on to final as close to arpt and as high as is practical within limitations of acft.

DUNOIR RADIO: DMET operg on test basis; channel 81. (4-17) Soon, VOR voice ctl will be provided from Worland FSS. (6-17)
EVANSTON ARPT: New arpt reported 5 mi NNW, elev 6600' one dirt strip N S 2800' in length, soft when wet. (3-2)
[redacted]: ROCK SPRINGS MUN ARPT: Rnwy 3-21, 200' SW end clsd, flagged, unlgtd, rnwy 7-25, 800' W end from threshold lgts and 500' from W end of hard surface clsd, unflagged due to 6' lgtd FAA detector obstn 50' inside of threshold lgts on W end of rnwy 7-25, to permit 40 to 1 safety glide margin; full length avbl for tkof. (5-16) Present usable length rnwy 3-21 is 5013' and rnwy 7-25 is 6188'. (6-3)
ROCK SPRINGS RADIO: ILS glide slope has light to moderate roughness between OM and LFR. (1-16) June 14, TACAN shut down until aprx July 13, reconstr. (5-17) During this period, following route structure and MEAs in efct: Unusable awys: V6N FBR-CKW; V4 MLD-CKW; V4N, V6N RKS-CKW; V187 RKS-Yampa Int; J32V, J84V SLC-RKS; J84V RKS-BFF Unusable reporting point: Superior, South Pass, Sweetwater, Green River, Hiway, Dinosaur and Yampa. Usable awys: V6 between FBR and CKW with an MEA of 11,000'. (5-13) June 28, VOR/DME shut down until aprx July 11 -reconstr. About July 18, ILS lclzr and glide slope will be shut down until aprx Aug 6, reconstr. (6-23)
THERMOPOLIS MUN ARPT: Hvy eqpmt will be using 20' of the apron on W side of rnwy 36-18 July 10 thru aprx July 30. (6-27)
PUERTO RICO: SAN JUAN AIR ROUTE TRAFFIC CONTROL CENTER: Soon, freq 126.9 mc will be chgd to 130.4 mc El Yunque peripheral site. (6-20)
**SAN JUAN, ISLA GRANDE ARPT SPECIAL NOTICE: Effective 0400 July 1, 1960, altimeter setting procedures within 100 nmi are revised as follows: A QNH altimeter setting and a system of alts shall be used below 24,000'MSL. At and above 24,000' the standard altimeter setting of 29.92 inches 1013.2 millibars and a system of flight levels shall be used. (5-17)
SAN JUAN, ISLE GRANDE ARPT: Tmpry twr located on NW corner of old trml bldg, due non-visibility tmpry twr unable to observe tfc on extreme S portion CG Navy ramp, ramp area E of CG hangar, extreme E end rnwy 9, ramp on N side J Mack Aero hangar, & apch area of rnwy 27. Pilots will assume full responsibility for avoiding tfc in blind areas. 174' metal bldg located aprx 1000' SE of threshold rnwy 27, lgtd ngts by two steady red lgts. (6-9)
SAN JUAN-ISLA GRANDE ARPT TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc. (5-6) May 13, twr tmpryly relctd on NW corner of old trml bldg, renovation of tower structure.
SAN JUAN, PUERTO RICO INTNL ARPT: Access txwy to ANG parking apron lgtd; ditch at W side of ANG access txwy; use extreme caution while taxiing day and ngt. Transient facils avbl 1130-2000Z Mon-Fri but no parking space avbl. Caution, unlgtd perm jet blast fence 8' high, 20' long, erected 10' W of W side of txwy to ANG ramp. Hi-intensity rnwy end identifier lgts lctd aprx 30' each side of apch end rnwy 7 comsnd. Men, eqpmt working in vcnty of apch end rnwy 25; 20' derricks erected, area obstn lgtd. (1-7) Due to extsn of eastern end rnwy and txwy, 39' lgtd dredge eqpmt operg 600' from end of rnwy, top of dredge 32.5' above rnwy at mean high water. (5-25)
SAN JUAN RAMEY AFB RADIO: Soon, CM twr tsmtg freq 278 kc and rcvr 3023.5 kc will be decmsnd. (8-10)
VIRGIN ISLANDS: ST CROIX, CHRISTIANSTED HAMILTON ARPT: Caution, acft making rgt hand turn after tkof to E. Men, eqpmt on E end of rnwy where 1200' extsn under constr; rnwy lgts E end tmpry lctd with exposed electric cables across E end on surface of rnwy. No runoff area avbl on E end.
ST THOMAS, CHARLOTTE AMALIE, TRUMAN RADIO: No coverage possible from N and E quads all VHF and UHF voice air gnd channels, due terrain. (3-10)

POSTDEADLINE DATA

ALABAMA: FORT MORGAN ARPT: Clsd, constr of paved rnwy. (6-27)

ARKANSAS: EL DORADO RADIO: About July 15, H facil will be decmsnd. (6-29)

CALIFORNIA: CARLSBAD, PALOMAR ARPT: Caution, men & eqpmt working on rnwy & txwys. LONG BEACH ARPT TOWER: About Aug 1, dptr ctl svc will be implemented, utilizing radar separation standards for the purpose of expediting tfc svc will be cont.(6-29)

**MERCED, CASTLE AFB SPECIAL NOTICE: Effective 1 July surveillance and precision radar not avbl Sats and Suns and 0700Z-1500Z Mon thru Fri. (6-28)

OAKLAND, METROPOLITAN-OAKLAND INTL ARPT TOWER: About July 15, freq 121.1 mc will be comsnd; & twr will transmit on VOR freq 116.8 mc. (6-29)

**SACRAMENTO MUN ARPT: Sequence flasher apch lgt lane comsnd 16 lgts starting 1000' from the end of the rnwy and extending to 2500' from end of rnwy. (6-27)

COLORADO: DENVER, STAPLETON AIRFLD: Acph lgt system will be shut down for modernization & installation of flasher system. (6-27)

DELAWARE: ★WILMINGTON NEW CASTLE CO. ARPT TOWER: About July 18, freq 136.80 mc will be decmsnd. (6-29) July 1, freq 126.20 mc replaced 126.18 mc. Too late for ANRA

GEORGIA: **ATLANTA ARPT: Sequence flasher No 2 serving rnwy 33 & operg btn stn 5 & 30 comsnd. (6-20)

INDIANA: ANGOLA, TRI-STATE ARPT: Clsd, constr. NE/SW rnwy being hard-surfaced.

**GREENFIELD, POPE FLD SPECIAL NOTICE: Flgt Test Area described as follows: SE of Greenfield, Ind., lat 39-46-30, long. 85-45-00; thence to 39-46-30, 85-39-00; to 39-44-30, 85-35-00; to 39-39-00, 85-35-00; to 39-42-00, 85-45-00; to pt of bgng. Time: dalgt hrs. Altitude: surface to 2000' above gnd. Used by: Ralph R. Denien. Expires 8-30-60. (6-30)

INDIANAPOLIS AIR ROUTE TRAFFIC CONTROL CENTER: About July 25, ARSR-1 and IFF bcn will be shut down until aprx Sept 9- improvement project. (7-1)

**MUNCIE, REESE ARPT SPECIAL NOTICE: Flgt Test Area described as follows: S Selma, Ind., lat 40-11, long. 85-17; thence to Farmland 40-11, 85-08; to Modoc 40-03, 85-08; to Losantville 40-02, 85-11; to 40-06, 85-17. Time: dalgt hrs. Altitude: surface to 2000' above gnd. Used by: Charles T. Scott. Expires 8-30-60. (6-30)

TERRE HAUTE, HULMAN FLD: Sw rnwy clsd daily for tkofs and the NE rnwy clsd daily for lndg, bgng July 24 btn the hrs of 1200 to 2130GMT until Feb 8, 1961, due to extension constr of the SW rnwy. Threshold lgts on the NE rnwy inop. (6-24)

LOUISIANA: **SHREVEPORT, GREATER SHREVEPORT ARPT: Apch lgt system flt check ILS rnwy 13; Apch lgt sequence flasher flt checked and comsnd. (7-1)

MAINE: ★PORTLAND MUN ARPT TOWER: July 1, ILS glide slope freq chgd to 333.8 mc.

WISCASSET ARPT: New arpt reported. Lctd. 3.0 mi SE; elev 62'; one turf strip 2400; Rmks: Soft when wet. (7-1)

MICHIGAN: DETROIT AIR ROUTE TRAFFIC CONTROL CENTER: About Aug 8, LaGrange, Ind ARSR will be comsnd. Enroute radar air tfc ctl svc will be provided by ARTCC utilizing radar separation standards and will be applied as necessary for expediting tfc. Svc will be cont within Detroit Center Area along the following awys: V30, 170, 116, 10, 84, 55 and 30S within an 80 nmi radius of LaGrange, Ind site. (6-28)

SAULT STE, MARIE ARPT: Caution, constr in progress on NW/SE rnwy durg dalgt hrs, rnwy surfacing, duration 25 Aug. (6-28)

MISSOURI: ST. JOSEPH, ROSECRANS MEML ARPT: About July 20, ILS lclzr & glide slope will be shut down until aprx Aug 3- to narrow the lclzr course width 4° & antenna modernization. (7-1)

ST. LOUIS, LAMBERT-ST. LOUIS MUN ARPT: First 700' apch end rnwy 6 and txwy C clsd, duration aprx Sept 16. Men & eqpmt on rnwy and txwy. Constr in progress last 2000' apch zone of rnwy 6; constr areas flagged and flared. Two silo 65' AGL lctd aprx 1600' from end rnwy 30 & 300' N of cntrline rnwy 30 unlgtd. Due non-visibility twr unable ctl tfc on ramps and txwys SE of new admn bldg, air freight trml bld, TWA & Young Aviation hangars. Tmpry bldgs & eqpmt lctd 100' SE of first 1000' rnwy 6, constr area mrkd. Shoulders soft; rnwy apchs ruf and unusable; grass area clsd. Bright mercury vapor lgts on highway 70 aprx 3000' from apch end of rnwy 6 may be mistaken for rnwy when breaking clear of overcast from lake apch durg hrs of darkness. (6-28)

NEBRASKA: **OMAHA, EPPLEY AIRFLD: (Formerly Omaha Mun Arpt) Hi-intensity sequence flashers in conjunction with configuration A apch lgt system comsnd rnwy 14L; flush type lgts 300 and 400' from rnwy threshold not installed. (6-30)

NEVADA: **FALLON SPECIAL NOTICE: Intsv mil jet hi speed low level bombing flts being conducted daily in accordance visual flt rules btn surface and 8000' MSL within an area bounded by coordinated 39-42, 118-55; 32-22, 118-51; 39-24, 118-56; 39-24, 119-00; 39-00, 119-04. These operns considered hazardous to non participating acft and in the interest of safety acft are requested to avoid this area below 8000' MSL. (6-29)

NEVADA: ★MORMON MESA RADIO: June 30, VOR/DME freqs chgd to 114.3 mc/Channel 63; & VORTAC comsnd. TACAN channel 90. Class: L-VORTACW. TACAN courses restricted to 055°-100°, 30 nmi; 100°-135°, 20 nmi; 280°-340°, 25 nmi.

NEW JERSEY: ATLANTIC CITY (POMONA) NAFEC ARPT: June 30 until aprx Aug 5 RAE visual glide path indicator operated 24 hrs daily on test basis; consists of short bars of lgts each side rnwy 13 750' & 1250' from threshold; when below correct glide path lgts appear red, when above glide path all lgts appear white, on glide slope indication shows near lgts white and far lgts red; system is adjusted to conform to ILS glide slope .(6-30)

★BELMAR, FT. MONMOUTH USAF ARPT RADIO: July 1, CM twr freq 126.3 mc decmsnd. (6-30)Too late for ANRA Page.

NEW YORK: ★NEW YORK-FLOYD BENNETT NAS RADIO: Navy H facil decmsnd.(7-30) Too late for ANRA Page.

★NEW YORK INTL (IDLEWILD) ARPT TOWER: July 1 freqs 132.30 and 134.64 mc decmsnd. Too late for ANRA Page.

★NIAGARA FALLS MUN ARPT TOWER: July 5, freq 126.20 mc comsnd. Too late for ANRA Page.

★SYRACUSE, HANCOCK ARPT TOWER: July 1, CS/T freq 126.2 mc replaced 126.18 mc. Too late for ANRA Page.

**WALDEN, NEWBURG-WALDEN ARPT: Perm clsd. (7-4)

NORTH CAROLINA: WINSTON-SALEM RADIO: About July 15 LF rng will be perm decmsnd.

NORTH DAKOTA: FARGO-HECTOR FLD TOWER: About July 20, ILS lclzr & glide slope will be shut down until aprx Nov 20 - lclzr relctn. (6-29)

OHIO: ★CINCINNATI, LUNKEN ARPT TOWER: July 1, freq 126.20 mc replaced 126.18 mc. Too late for ANRA Page.

★DAYTON MUN ARPT TOWER: July 1, freq 126.20 mc comsnd. Too late for ANRA page.

★DAYTON, WRIGHT PATTERSON RADAR APPROACH CONTROL: July 1, freq 126.18 mc chgd to 126.20 mc & 139.32 chgd to 138.42 mc. Too late for Radar Page.

FINDLAY RADIO: DMET operg test basis; channel 19. (4-29)

MANSFIELD MUN ARPT TOWER: About Aug 5, CS/T will discontinue voice on LF 278 kc.

★YOUNGSTOWN MUN ARPT TOWER: July 1, freq 126.20 mc comsnd. Rcvd too late for ANRA page.

OKLAHOMA: TULSA MUN ARPT TOWER: July 5, ILS glide slope shutdown - arpt constr.

OREGON: **PENDLETON ARPT: Configuration A apch lgt system apch end rnwy 25R flt checked and comsnd. (6-30)

PENNSYLVANIA: ALLENTOWN-BETHLEHEM-EASTON ARPT TOWER: About Aug 8, ILS lclzr & glide slope will be shut down until aprx Aug 22- freqs chg to 110.7/330.2 mc. (6-29)

★PITTSBURGH, ALLEGHENY CO ARPT TOWER: July 1, freq 126.20 mc comsnd. Rcvd too late for ANRA page.

★PITTSBURGH, GRTR PITTSBURGH ARPT-TOWER: July 1, freq 126.20 mc comsnd. Rcvd too late for ANRA Page.

TIDIOUTE RADIO: About Aug 8, VOR will be shut down until aprx Aug 13 - freq chg to 117.6 mc/TACAN channel will be 123. See page 121 for substitute route structure & tmpry MEAs durg shutdown. (6-29)

WILLIAMSPORT-LYCOMING CO ARPT TOWER: About Aug 1, Enroute ctl svc will be provided. This svc will apply at alts 5,000' and below, between IPT and ELM, IPT and AVP, IPT and HAR. (6-29)

TENNESSEE: BRISTOL TRI-CITY ARPT: Rnwy 9-27 clsd June 30 for aprx 5 days; 4500' SW end rnwy 4-22 temp open; 500' of SW end txwy to rnwy 4-22 not visible from ctl twr; flare pots avbl and all lndg acft must have visibility of at least 2 mi for ngt operns. (6-29)

TEXAS: ABILENE MUN ARPT: Sequence flashers in conjunction with configuration A apch lgt system operg on test basis pending flt check; stations one thru 25 inclusive to be comsnd. (6-29)

CARIZO SPRINGS, DIMMIT COUNTY ARPT: E/W turf strip clsd. fence across cntr of strip. (6-27)

**LUBBOCK MUN ARPT: Tetrahedron perm removed. (6-29)

Youngstown Mun. Arpt., Ohio	Youngstown Apch Ctl	125.5;122.5G;257.8

G - Guards

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission; Army Air Fields are open to civil aircraft on authorization of the Air Field Commander.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS/O, Hqs USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, Item 9 and page 73 - Position Reporting, in the Flight Information Manual. Volume 13, dated December 1959.
Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flgt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE(General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

WASHINGTON, D.C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D.C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U.S. Route 29 until past Falls Church. Departures proceed well right of U.S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Penetration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

JET ACROBATIC AREAS - VICINITY WASHINGTON, D.C. - Acrobatic maneuvers by jet aircraft are conducted daily, VFR daylight hours only, between the altitudes of 10,000' and 20,000' MSL inclusive, within the following areas:

Area #1: The uncontrolled portion of that airspace which is bounded on the N by V-174; on the E and SE by B-47 and V-140; and on the S by V-156.

Area #2: The uncontrolled portion of that airspace which is bounded on the N by V-156; on the E by V-140; on the S by V-290; and on the W by V-103.

REGULATIONS OF THE ADMINISTRATOR PART 570: Rules of Washington National Airport-"570. 49 - No pilots other than those possessed of at least a private pilot rating or the equivalent shall operate aircraft on the airport."

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York FSS controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

PENETRATION OF RESTRICTED AREAS: Unauthorized flight is not permitted within a Restricted Area during the time of use and between the altitudes noted in the tabulation on the back of Sectional Aeronautical Charts issued by the U.S. Coast and Geodetic Survey or in the Flight Information Manual. Application for flight authorization should be made to the controlling agency.

"SHUT DOWN" OR "UNUSABLE" NAVIGATIONAL FACILITIES: Navigational Facilities which are notamed as being "shut down," or radials of a VOR notamed as "unusable" should not be utilized for navigational purposes. Pilots planning IFR flights should check all available information during pre-flight planning to ensure their proposed flight plan will not require use of facilities during the period of "shut down," as Air Traffic Control will be unable to approve such flight plans. During periods of prolonged "shut down," "revised MEA's and/or alternate routes are established for designated airways, utilizing adjacent facilities. This information is contained in appropriate NOTAMS and the Airman's Guide.

INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT: Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D. C. (Attention: W-200). (This does not apply to hearing aids)

TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meterological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-frequency (200-400 kc) navigational aid (L/MF range or H facility.)

Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Boise, Idaho	359 kc
Boston, Mass.	382 kc

(5 July 1960)

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route" published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

1. Radar Advisory Areas
   a. No additional operational restriction, control or communication requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operated within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Basic Mark X equipped military flights operating within radar advisory areas will adjust transponders to operate on Mode 3. Unless otherwise instructed by air traffic control, Mark X SIF equipped flights will adjust transponder to Mode 3, Code 62, except that ADC flights will adjust transponder to Mode 3, Code 00. Those military flights operating on a mode other than Mode 3 will adjust transponder to operate on Mode 3 and the assigned mode simultaneously. Civil turbojet transponders will be adjusted to reply on Mode A, Code 40. Other civil aircraft will adjust transponder to reply on Mode A, Code 62.
   b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.
   c. In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.

2. Nonradar Advisory Areas
   The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.
   a. Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.
   b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information and radar vectors to avoid observed traffic. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
2. In the event of loss of communication with a USAF(ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR/VORTAC Jet Route #1 (Los Angeles, Calif., to Seattle, Washington)
2. VOR/VORTAC Jet Route #2 (Houston, Texas to Lake Charles, La.) Houston, Texas to New Orleans, La. Effective 5 May 1960.)
3. VOR/VORTAC Jet Route #3 (Oakland, Calif., to Spokane, Wash.)
4. VOR/VORTAC Jet Route #4 (Los Angeles, Calif., to Phoenix, Ariz.
5. VOR/VORTAC Jet Route #8 (Tulsa, Okla., to New York, N.Y.)
6. VOR/VORTAC Jet Route #12 (Baltimore, Md., to Pittsburgh, Pa.)
7. VOR/VORTAC Jet Route #14 (Cleveland, Ohio to Idlewild, N.Y.)
8. VOR/VORTAC Jet Route #16 (Portland, Ore., to Pullman, Mich.,; Albany, N.Y. to Boston, Mass.) Nonradar advisory area from 60 nmi W of Dillon, Mont., VOR to 90 nmi E of Dillon.
9. VOR/VORTAC Jet Route #21 (Omaha, Neb., to Duluth, Minn.) (Dallas, Tex., to San Antonio, Tex.)
10. VOR/VORTAC Jet Route #22 (Lake Charles, La., to intersection with J55V).
11. VOR/VORTAC Jet Route #24 (Phoenix, Ariz., to Albuquerque, N.M.)
12. VOR/VORTAC Jet Route #25 (Dallas, Tex., to Tulsa, Okla.)
13. VOR/VORTAC Jet Route #26 (Amarillo, Tex., to Appleton, Ohio.)
14. VOR/VORTAC Jet Route #29 (Houston, Tex., to Memphis, Tenn and Dayton, Ohio to Cleveland, Ohio.)
15. VOR/VORTAC Jet Route #31 (Dallas, Tex., to Chicago, Ill.)
16. VOR/VORTAC Jet Route #33(Shreveport, La., to the Int. with J31V and Kansas City, Mo., to Des Moines, Iowa.)
17. VOR/VORTAC Jet Route #34 (Cleveland, Ohio to Pittsburgh, Pa.)
18. VOR/VORTAC Jet Route #35 (New Orleans, La., to St. Louis, Mo.)
19. VOR/VORTAC Jet Route #37 (New Orleans, La., to Spartanburg, S.C.)
20. VOR/VORTAC Jet Route #41 (Miami, Fla. VOR to St. Petersburg, Fla. VOR.)
21. VOR/VORTAC Jet Route #42 (Dallas, Tex., to New York, N.Y.)
22. VOR/VORTAC Jet Route #45 (Alma, Ga., to St. Louis, Mo.)
23. VOR/VORTAC Jet Route #49 (Alma, Ga., to Spartanburg, S.C.)
24. VOR/VORTAC Jet Route #52 (Dallas, Tex., to Atlanta, Ga.) via Texarkana, Ark., VOR; Greenwood, Miss., VOR; Birmingham, Ala., VOR. (Dallas, Tex-Birmingham, Ala,, extension to J52V.
25. VOR/VORTAC Jet Route #53 (Miami, Fla., to the Int. of J53V and J81V; Spartanburg, S.C., to Pittsburgh, Pa.)
26. VOR/VORTAC Jet Route #55 (From the intersection with J22V to Kenton, Del.)
27. VOR/VORTAC Jet Route #58 (San Francisco, Calif., to New Orleans, La.) Non-radar advisory area from 20 nmi W of Pioche, Nev., VOR to 90 nmi SE of Alamosa, Colo., VOR.)
28. VOR/VORTAC Jet Route #60 (Los Angeles, Calif., to New York, N.Y.) Nonradar advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb., VOR.
29. VOR/VORTAC Jet Route #62 (Idlewild, N.Y., to Nantucket VOR.)
30. VOR/VORTAC Jet Route #64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory area from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
31. VOR/VORTAC Jet Route #67 (Idlewild, N.Y., to U.S. -Canadian Border.)
32. VOR/VORTAC Jet Route #69 (Spartanburg, S.C., to Gordonsville, Va.)

(Continued)

33. VOR/VORTAC Jet Route #71 (Appleton, Ohio to Front Royal, Va.)
34. VOR VORTAC Jet Route #75 (Miami, Fla., to U.S.-Canadian Border)
35. VOR/VORTAC Jet Route #77 (Miami, Fla., to U.S. Canadian Border)
36. VOR/VORTAC Jet Route #78 (Los Angeles, Calif., to New York, N.Y.)
37. VOR/VORTAC Jet Route #79 (Miami, Fla., to Idlewild, N.Y.)
38. VOR/VORTAC Jet Route #80 (Denver, Colo., to New York, N.Y.) Nonradar advisory area that portion of JR-80 from 120 nmi ESE of Denver, Colo., VOR to 25 nmi W of Hill City, Kansas VOR.
39. VOR/VORTAC Jet Route #81 (The intersection of J81V and J53V to Barracuda Int.)
40. VOR/VORTAC Jet Route #82 (Chicago, Ill., to Boston, Mass.)
41. VOR VORTAC Jet Route #84 (Oakland, Calif., to the U.S. Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 40 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr. Advisory Service on Jet 84 Victor will be provided flight level 270 and above from 100 nmi W to 40 nmi E of Scottsbluff, Nebr.
42. VOR/VORTAC Jet Route #85 (Miami, Fla., to the U.S.-Canadian Border.)
43. VOR VORTAC Jet Route #87 (Houston, Tex., to Northbrook, Ill.)
44. VOR VORTAC Jet Route #89 (Northbrook, Ill., to Miami, Fla.)
45. Control 1150 (West Palm Beach, Fla., to Wilmington, N.C.)
46. VOR/VORTAC Jet Route #90 (Seattle, Wash., to Chicago, Ill.)

AREAS

1. That area 20 n mi either side of a line from Des Moines, Iowa VOR; intersection of Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.
2. Duluth, Minnesota to the U.S.-Canadian Border via the Duluth 047° M radial(direct route between Duluth & Lakehead, Canada.)
3. Spokane, Washington to the U.S.-Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)
4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif., 208° M radials; thence via the Long Beach, Calif 208° M radial(Control Area Extension 1177) for a distance of 180 n mi.
5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif. 236° M radial (Control Area Extension 1316) for a distance of 180 n mi.
6. Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 n mi.
7. Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 n mi.
8. Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial(Control Area Extension 1173 over Francis Intersection) for a distance of 150 n mi.
9. Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 n mi.
10. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 n mi.
11. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 n mi.
12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 n mi.
13. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 250° M radial for a distance of 87 n mi.
14. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 n mi.
15. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 168° M radial for a distance of 99 n mi.
16. Honolulu, Hawaii LFR; thence NW via Red Airway 87 to a point 40 nmi NW of Point Allen rbn.
17. Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.
18. Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 n mi (boundary of the Miami Oceanic Control Area)
19. Seattle, Washington VOR to the U.S.-Canadian Border via the Seattle VOR direct. radial to the Victoria (Patricia Bay), B.C., Canada RR.
20. Boston, Mass., Terminal Area-- That area within 20 nmi to either side of J-16-V between Albany, N.Y., & Boston, Mass.
21. New York City, N.Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Bridgeport, Conn. Int. via Poughkeepsie, N.Y., VOR to Albany, N.Y., VOR.
    b. Idlewild, N.Y., VORTAC via Huguenot, N.Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.
22. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOR
    Baltimore, Md., Terminal Area-- Effective 5 May 1960
    a. That area within 20 nmi from the sides and within the triangle formed by a direct course from the Baltimore, Md., VOR to the Idlewild, N.Y., VOR to the Salisbury, Md., VOR; to the Baltimore, Md., VOR.
    b. That area within 20 nmi to either side of the center line of Control Area Extension 1148.
23. St. Louis, Mo., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Int. of J-80-V & Terre Haute, Ind., 268° M radial: via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
    b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
    c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.
    d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
    e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.
    Effective 17 December 1959.
24. Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
    b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
    c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 265° M radial; to Int. of Palmdale, Calif., 265° M radial and J-1-V.
    d. Los Angeles, Calif., VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 336° M radial and J-1-V
    e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.
25. Oakland, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. San Francisco, Calif., VOR via V-199 to Red Bluff, Calif., VOR.
    b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
    c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.
26. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
    b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
    c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.
    d. Dallas, Tex., VOR via the Int. of the Dallas VOR 230° and the Waco, Tex., VOR 344° M radials; to the Waco, Tex., VOR.
    e. Dallas, Tex., VOR via the Int. of the Dallas VOR 178° and the Waco, Tex., VOR 028° M radials; to the Waco, Tex., VOR.
27. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
    b. Spartanburg, S.C., VOR via V-20-N to Norcross, Ga., VOR.
    c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S.C., VOR.

(Continued)

28. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.
b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne, Bay, Fla., VOR.
c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR.

29. Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S. - Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.

30. Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V.
d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

31 From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi--bndry of the Havana, Cuba Ctl Area.

32. Houston, Tex., Terminal Area--That area within 20 nmi to either side of a direct crs from the:
a. Houston, Tex., VOR via the Int of the Houston 036° and the Lake Charles, La, 265° M radials to the Lake Charles VOR (V-222N).
b. Houston, Tex., VOR via the Int of the Houston VOR 082° and the Lake Charles, La., VOR 233° M radials to the Lake Charles VOR (V20S).
c. Houston, Tex., VOR via the Int of the Houston VOR 315° and the Leona, Tex., VOR 162° M radials; to the Leona, Tex., VOR.
d. Houston, Tex., VOR via the Int of the Houston VOR 345° and the Leona, Tex., VOR 132° M radials; to the Leona, Tex., VOR.

33. San Antonio, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Antonio, Tex., VOR via the Int of the San Antonio VOR 048° and the Austin, Tex., VOR 166° M radials to the Austin, Tex., VOR.
b. San Antonio, Tex., VOR via the Int of the San Antonio VOR 353° and the Austin, Tex., VOR 248° M radials; to the Austin, Tex., VOR.

34. New Orleans, La., Terminal Area-- That area within 20 nmi to either side of a direct course from the:
a. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 320° and the Alexandria, La., VOR 098° M radials; to the Alexandria, La., VOR. (Overlies V-114-N.)
b. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 030° and the McComb, Miss., VOR 142° M radials; to the McComb, Miss., VOR. (Overlies V-9-E).
c. McComb, Miss., VOR to the Int. of the McComb, Miss., VOR 222° and the New Orleans, La., VOR 320° M radials. (Overlies V-194).
d. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 094° and the Mobile, Ala., VOR 219° M radials; to the Mobile, Ala., VOR. (Overlies V-240).
e. Mobile, Ala., VOR to the Int. of the Mobile, Ala., VOR 258° and the New Orleans La., VOR 030° M radials. (Overlies V-20-N.).
f. Alexandria, La., VOR to the Baton Rouge, La., VOR. (Overlies V-114).
g. Baton Rouge, La., VOR via the Int. of the Baton Rouge, La., VOR 126° and the New Orleans, La., VOR 269° M radials; to the New Orleans, La., VOR.

35. Tampa, Fla., Terminal Area - That area within 20 nmi to either side of a direct course from the:
1. St. Petersburg, Florida VOR direct to the Orlando, Fla., VOR. (Overlies V-152).
2. St. Petersburg, Fla., VOR via the Int. of the St. Petersburg, Fla., VOR 038° and the Orlando, Fla., VOR 257° M radials; to the Orlando, Fla., VOR. (Overlies V152N).
3. St. Petersburg, Fla., VOR via the Lakeland, Fla., VOR; to the Orlando, Fla., VOR. (Overlies V-152S).

36. ✓ From the St. Petersburg, Fla., VOR to the Int. of the St. Petersburg, Fla., VOR 274° M radial with Control Area Extension 1226.

(Continued)

37. ✓ From the Egmont Key, Fla., NDB via Control Area Extension 1226 to the Grand Isle, La, NDB.
38. From the Grand Isle, La., NDB via direct to the New Orleans, La., VOR.
39. ✓ From the Int. of J85-V and J41-V direct to the Egmont Key, Fla, NDB.

FREQUENCY CHANGE - 126.18 MC to 126.20 MC: FAA will change all existing 126.18 mc frequency assignments to 126.20 mc during the month of July 1960. The individual locations affected will be NOTAMED as the changes are accomplished. The military services have advised their commands to make the change not later than July 1, 1960.

DISCONTINUANCE OF CONTINUOUS GUARD ON 3023.5 kc: Effective July 1, 1960 at the following locations, 3023.5 kc will be available "on request".

Glens Falls, New York
Martinsburg, West Virginia
Philipsburg, Pennsylvania
Youngstown, Ohio
Utica, New York
Dalhart, Texas
Memphis, Tennessee
Butler, Missouri
Cedar Rapids, Iowa
Chanute, Kansas
Des Moines, Iowa
Jackson, Michigan
Jamestown, North Dakota
Russell, Kansas
St. Louis, Missouri
Columbus, New Mexico
Crescent City, California
Idaho Falls, Idaho
Laramie, Wyoming
Oakland, California
Redmond, Oregon
Sacramento, California

VOR/DMET or TACAN EQUIPPED AIRCRAFT: The FAA has implemented new procedures and separation standards for the control of VOR/DMET or TACAN equipped aircraft. In order that ATC can apply these standards, pilots of aircraft so equipped are requested to include the statement "TACAN (or DMET) Equipped" in the remarks section of their flight plan.

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue.
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included. Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

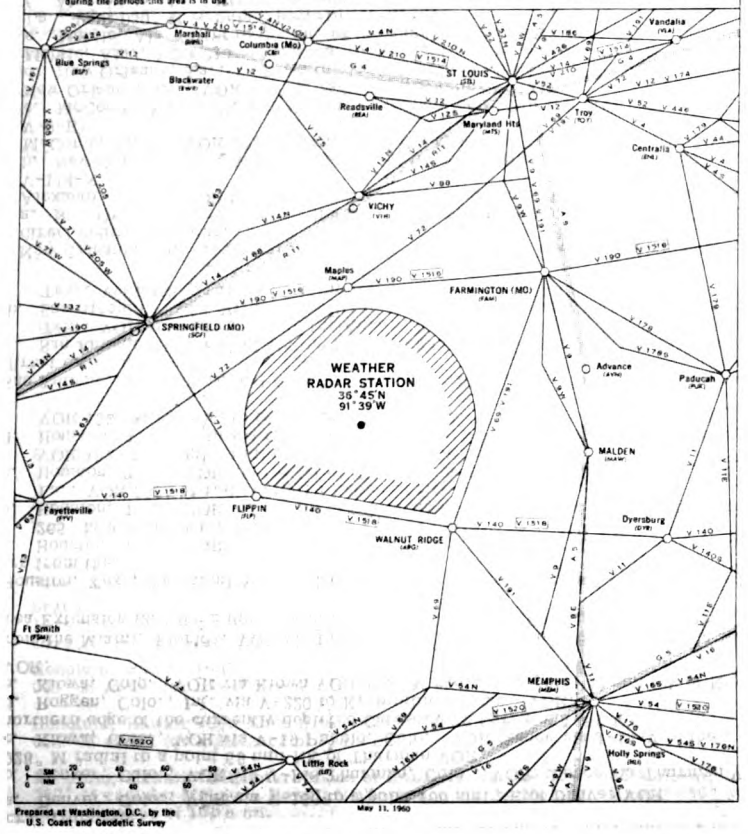
VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight Information Manual Corrections." Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time.

SPECIAL NOTICE

CUMULUS CLOUD RESEARCH PROJECT

EFFECTIVE MAY 15 THROUGH AUGUST 31 ANNUALLY

Beginning May 15 and ending August 31 annually, a cumulus cloud research operation will be conducted within a 50 statute mile radius of a weather radar station located 11 statute miles east of West Plains, Missouri at 36°45'N, 91°39'W, excluding airways.



All flight operations will be conducted outside of controlled airspace. Hours of operation will be from 1300Z to 0300Z. Three Cessna 172 aircraft will operate VFR in the western portion of the area at selected altitudes between the surface and 10,000 feet MSL. One Beechcraft D-18 will operate VFR or IFR throughout the area between the surface and 23,000 feet MSL, generally within a selected group of five altitudes.

Flight operations will be conducted on days selected at random during the three and one-half month period each year. Specific information concerning those operations will be issued by NOTAM on each day the flights will operate.

Other aircraft proposing flight within the designated area may obtain current information concerning these operations from the following FAA facilities:

St. Louis, Mo. FSS — Springfield, Mo. CS/T — Malden, Mo. FSS — Walnut Ridge, Ark. FSS — Memphis, Tenn. ARTCC
Vichy, Mo. FSS — Farmington, Mo. FSS — Flippin, Ark. FSS — St. Louis, Mo. ARTCC

The flight service stations listed above will broadcast appropriate information concerning the operation following regular weather broadcasts during the periods this area is in use.

NEW AIR TRAFFIC CONTROL ADVISORY SERVICE: IFR aircraft operating in accordance with an ATC authorized cruising level of VFR conditions-on-top are required by CAR 60.44 to be flown at the altitudes/flight levels specified in CAR 60.32 for VFR flight. Noncompliance by pilots with the cruising level requirements of CAR 60 compromises intended segregation between aircraft operating at VFR and IFR altitudes/flight levels. Beginning April 5, 1960, pilots of IFR aircraft operating in accordance with an air traffic control authorized cruising level of VFR conditions-on-top and reporting at an altitude/flight level incorrect for direction of flight will be advised by air traffic control facilities of the appropriate level/s for direction of flight. Controllers will provide this advisory service on a "workload permitting" basis. The provision, or lack of provision of this service should not be construed to relieve or diminish pilot responsibility for operation at the correct altitudes/flight levels for direction of flight.

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC/TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future. Effective date of changes (which are indicated by ✓) is July 3, 1960.

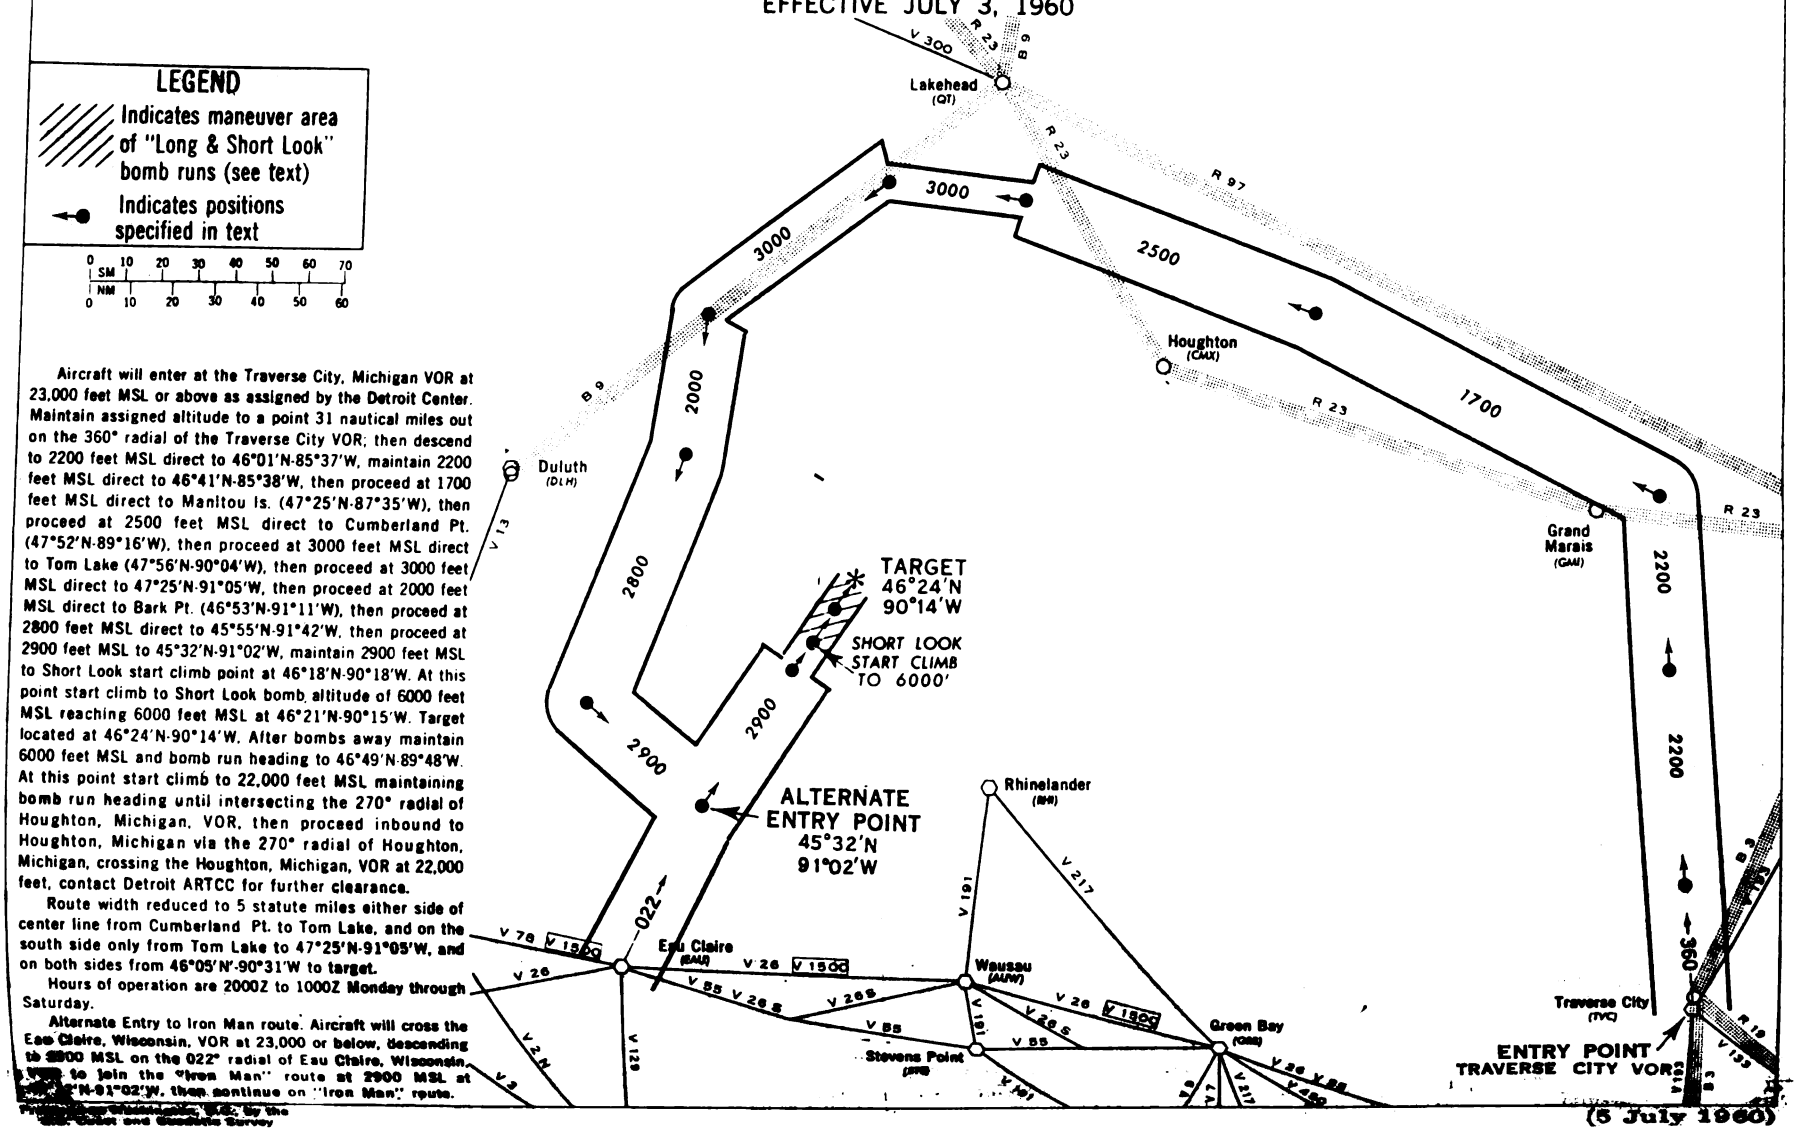
SECOND ANNUAL GENERAL AVIATION FLY-IN: All pilots are invited to attend the second annual general aviation "fly in" to be held October 1, 1960 at the Federal Aviation Agency's National Aviation Facilities Experimental Center at Atlantic City, New Jersey."

CAUTION-AIRCRAFT ARRESTING BARRIERS AT JOINT USE MILITARY/CIVIL AIRPORTS: Aircraft Arresting Barriers are installed at some joint use military/civil airports. Pilots, particularly those of the light propeller driven category of aircraft are advised to operate with caution while operating near or over a lowered barrier. Aircraft operations at minimum practical power settings and taxi speeds are recommended until clear of the arresting barrier system.



ILS SENSITIVITY ADJUSTMENTS: At a number of facilities in the United States, ILS localizer course width will be reduced from 5 degrees to 4 degrees in the near future. Individual facility NOTAM's will be published as these changes occur.

NAVIGATIONAL WARNING-USAF OPERATION "OIL BURNER". USAF (Strategic Air Command) is conducting low level navigational flights in jet aircraft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following pages, and at the alts specified therein. At the termination of the low level flights, the acft climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during times specified for each route.

Effective July 3, 1960

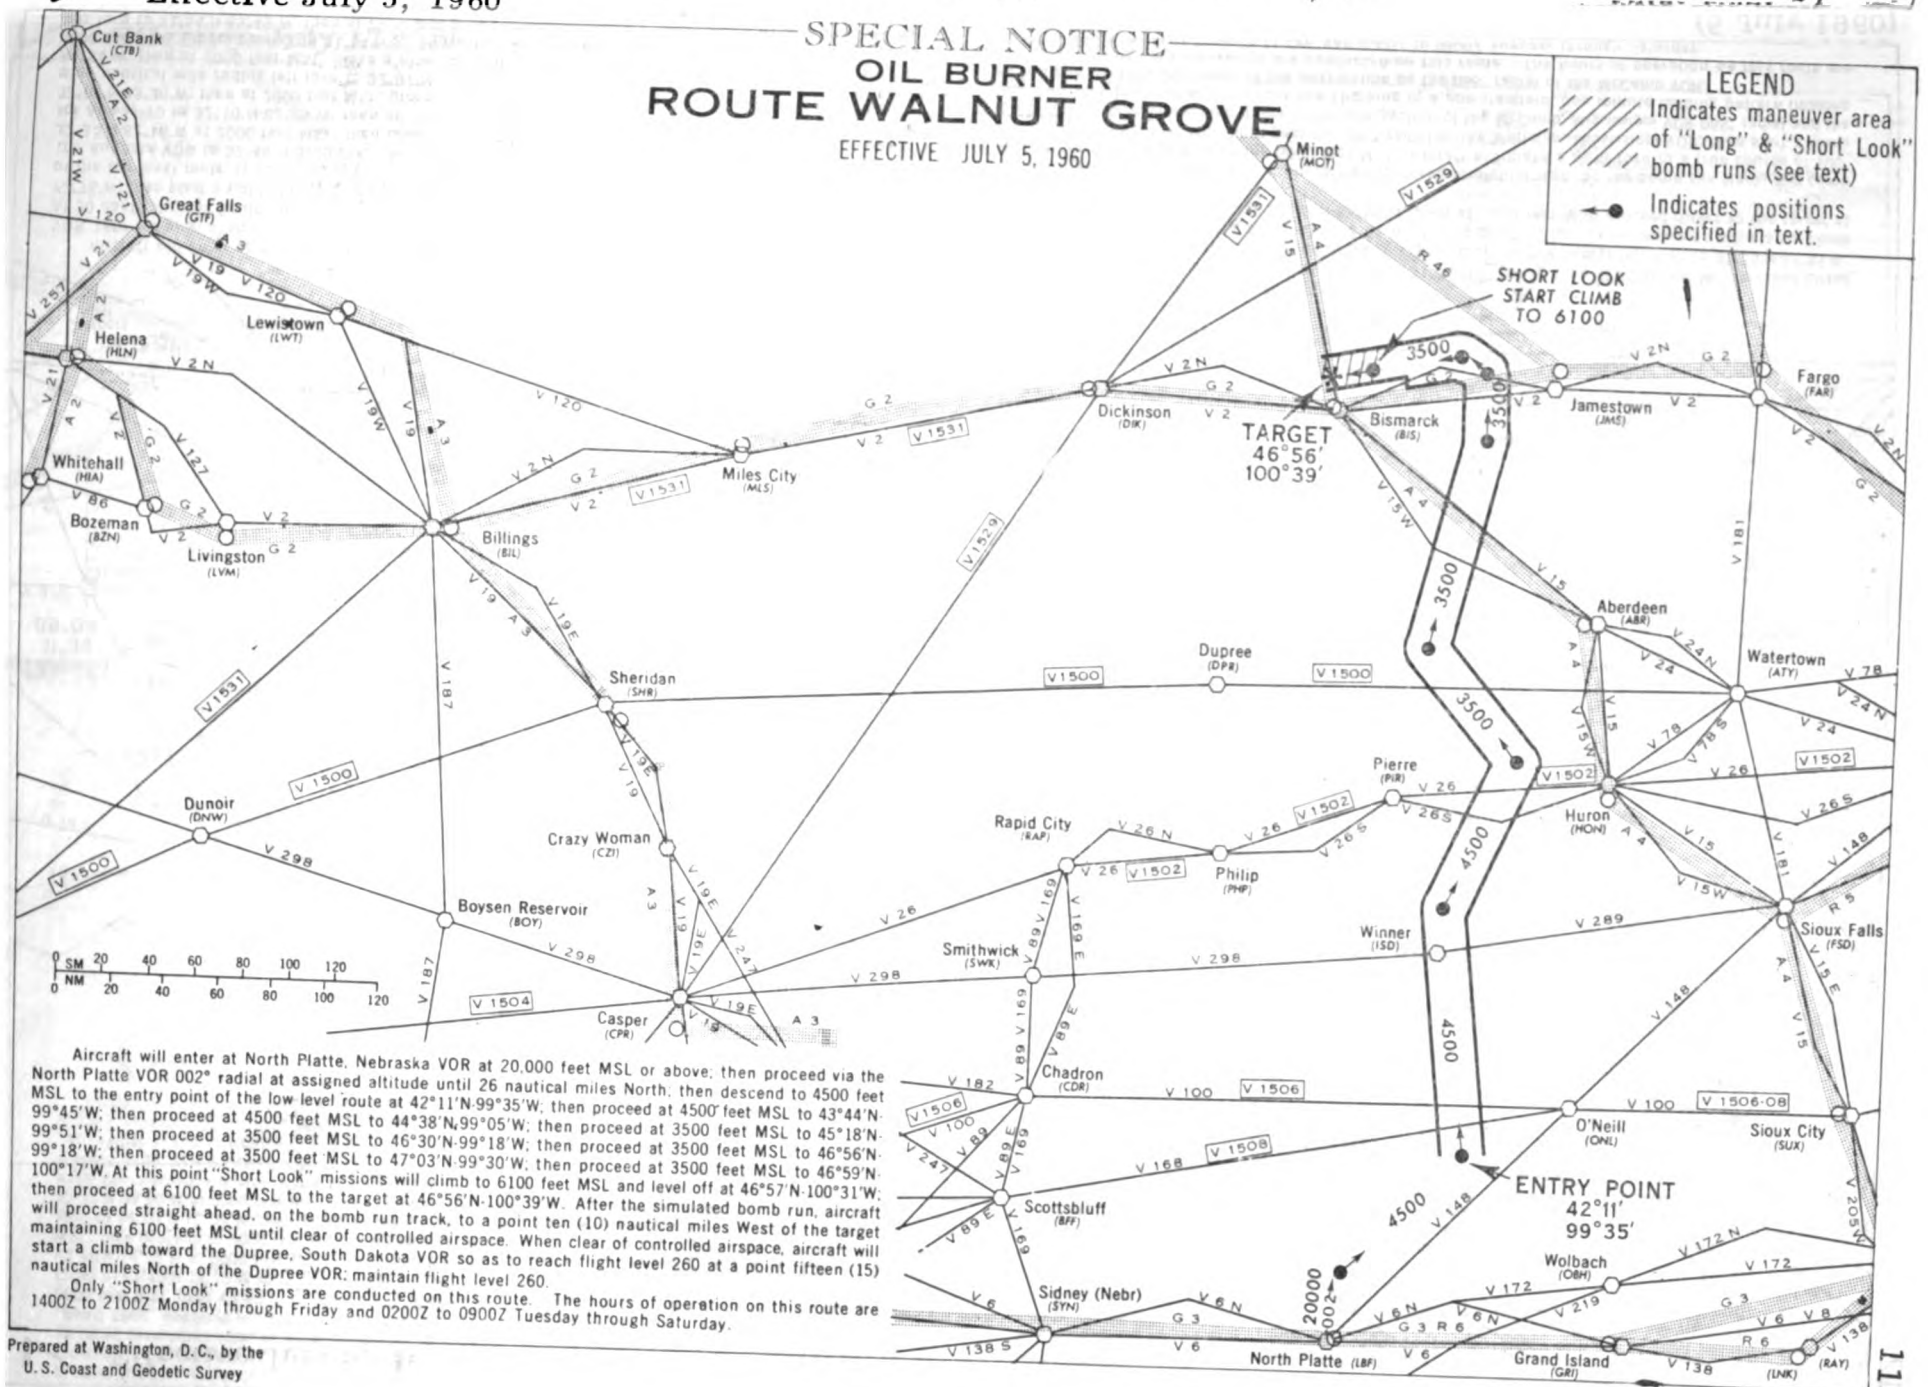
SPECIAL NOTICE

OIL BURNER
ROUTE IRON MAN
EFFECTIVE JULY 3, 1960

Aircraft will enter at the Traverse City, Michigan VOR at 23,000 feet MSL or above as assigned by the Detroit Center. Maintain assigned altitude to a point 31 nautical miles out on the 360° radial of the Traverse City VOR; then descend to 2200 feet MSL direct to 46°01'N-85°37'W, maintain 2200 feet MSL direct to 46°41'N-85°38'W, then proceed at 1700 feet MSL direct to Manitou Is. (47°25'N-87°35'W), then proceed at 2500 feet MSL direct to Cumberland Pt. (47°52'N-89°16'W), then proceed at 3000 feet MSL direct to Tom Lake (47°56'N-90°04'W), then proceed at 3000 feet MSL direct to 47°25'N-91°05'W, then proceed at 2000 feet MSL direct to Bark Pt. (46°53'N-91°11'W), then proceed at 2800 feet MSL direct to 45°55'N-91°42'W, then proceed at 2900 feet MSL to 45°32'N-91°02'W, maintain 2900 feet MSL to Short Look start climb point at 46°18'N-90°18'W. At this point start climb to Short Look bomb altitude of 6000 feet MSL reaching 6000 feet MSL at 46°21'N-90°15'W. Target located at 46°24'N-90°14'W. After bombs away maintain 6000 feet MSL and bomb run heading to 46°49'N-89°48'W. At this point start climb to 22,000 feet MSL maintaining bomb run heading until intersecting the 270° radial of Houghton, Michigan, VOR, then proceed inbound to Houghton, Michigan via the 270° radial of Houghton, Michigan, crossing the Houghton, Michigan, VOR at 22,000 feet, contact Detroit ARTCC for further clearance.

Route width reduced to 5 statute miles either side of center line from Cumberland Pt. to Tom Lake, and on the south side only from Tom Lake to 47°25'N-91°05'W, and on both sides from 46°05'N-90°31'W to target.

Hours of operation are 2000Z to 1000Z Monday through Saturday.



Alternate Entry to Iron Man route. Aircraft will cross the Eau Claire, Wisconsin, VOR at 23,000 or below, descending to 2900 MSL on the 022° radial of Eau Claire, Wisconsin, VOR to join the "Iron Man" route at 2900 MSL at 45°32'N-91°02'W, then continue on "Iron Man" route.

SPECIAL NOTICE

OIL BURNER
ROUTE WALNUT GROVE

EFFECTIVE JULY 5, 1960

Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 002° radial at assigned altitude until 26 nautical miles North; then descend to 4500 feet MSL to the entry point of the low level route at 42°11′N-99°35′W; then proceed at 4500 feet MSL to 43°44′N-99°45′W; then proceed at 4500 feet MSL to 44°38′N-99°05′W; then proceed at 3500 feet MSL to 45°18′N-99°51′W; then proceed at 3500 feet MSL to 46°30′N-99°18′W; then proceed at 3500 feet MSL to 46°56′N-99°18′W; then proceed at 3500 feet MSL to 47°03′N-99°30′W; then proceed at 3500 feet MSL to 46°59′N-100°17′W. At this point "Short Look" missions will climb to 6100 feet MSL and level off at 46°57′N-100°31′W; then proceed at 6100 feet MSL to the target at 46°56′N-100°39′W. After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, to a point ten (10) nautical miles West of the target maintaining 6100 feet MSL until clear of controlled airspace. When clear of controlled airspace, aircraft will start a climb toward the Dupree, South Dakota VOR so as to reach flight level 260 at a point fifteen (15) nautical miles North of the Dupree VOR; maintain flight level 260.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday and 0200Z to 0900Z Tuesday through Saturday.

OIL BURNER

ROUTE IVORY TOWER

EFFECTIVE JULY 5, 1960

Aircraft will enter at Augusta, Georgia VOR at 23,000 feet MSL or above; then proceed via the Augusta VOR 180° radial at assigned altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49'N-82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N-82°30'W to the entry point of the low level route at 33°05'N-82°14'W, and at 2000 feet MSL, turn right to intercept the 180° radial of the Augusta VOR to 32°46'N-82°08'W. Aircraft will then make a nine nautical mile radius right turn to 32°35'N-82°16'W at 2000 feet MSL; then proceed at 2000 feet MSL Southwest along the South edge of Victor Airway 70 to 32°10'N-83°25'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 32°09'N-83°30'W; then at 2000 feet MSL, proceed direct to 32°09'N-84°25'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 32°07'N-84°32'W, then at 2000 feet MSL proceed direct to 31°53'N-84°54'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 31°51'N-85°01'W, then at 2000 feet MSL proceed direct to 31°54'N-85°46'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 31°54'N-85°49'W; then at 2000 feet MSL proceed direct to 31°34'N-87°18'W; then at 2000 feet MSL make a nine nautical mile radius right turn to 31°36'N-87°28'W; then at 2000 feet MSL proceed direct to 31°53'N-87°46'W; then at 2000 feet MSL make a nine nautical mile radius left turn to 31°55'N-87°55'W; then proceed at 2000 feet MSL to 31°43'N-88°43'W. At this point, "Short Look" missions will start a climb so as to reach 5000 feet MSL at 31°39'N-88°55'W; then at 5000 feet MSL proceed direct to the target at 31°36'N-89°04'W.

After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, and climb to 6000 feet MSL. Upon reaching 6000 feet MSL, aircraft will make a right turn to a true course of 106° and maintain 6000 feet MSL until past the 180° radial of the Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding direct to the intersection of the McComb, Mississippi VOR 068° radial and the Meridian VOR 160° radial; then continue climbing in a non-standard, one minute holding pattern (making all turns to the left) Southwest of the intersection on the 068° radial of the McComb VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 2000Z to 2400Z Monday through Friday, and 0000Z to 0800Z Tuesday through Saturday.

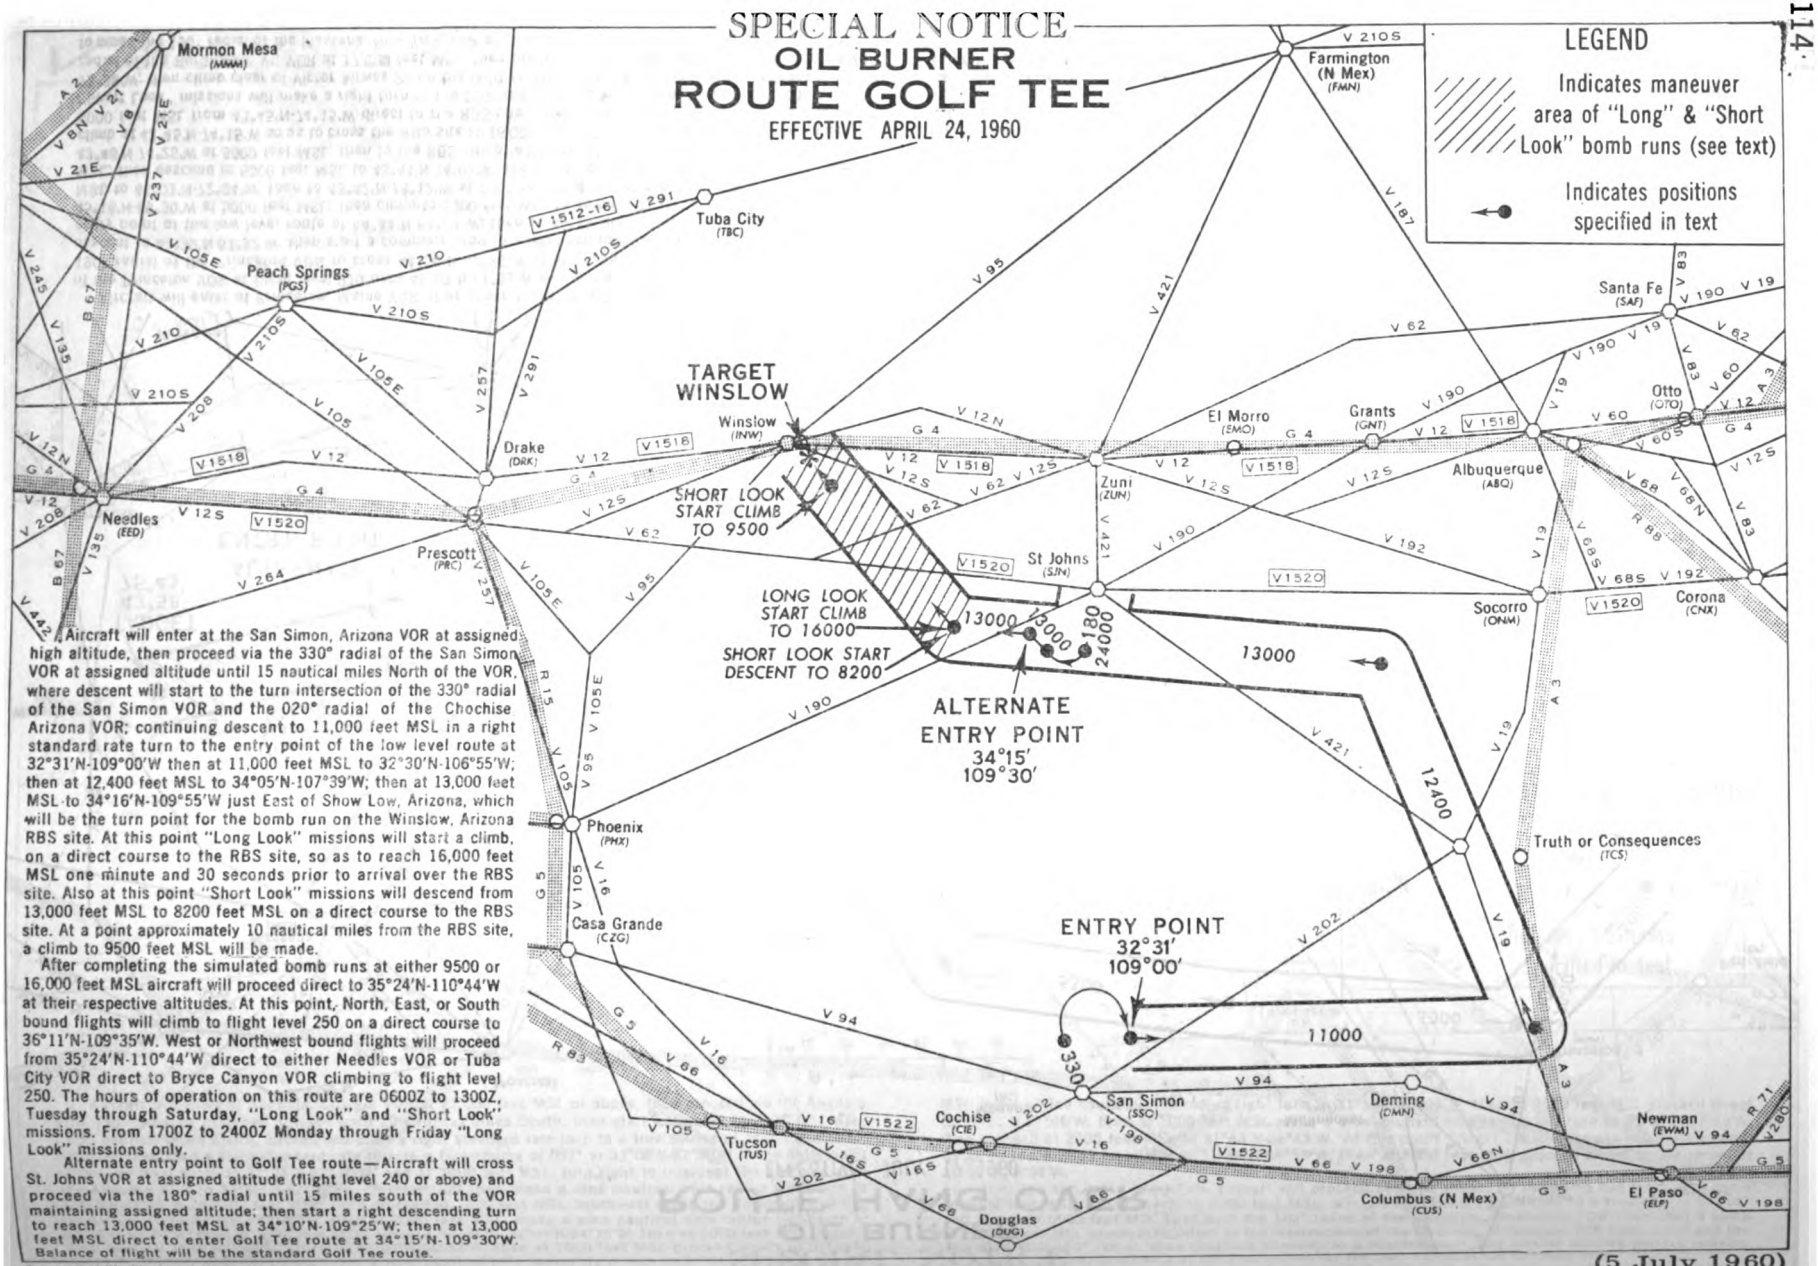
SPECIAL NOTICE

Effective July 17, 1960

SPECIAL NOTICE
OIL BURNER
ROUTE HANG OVER
EFFECTIVE JULY 17, 1960



Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08′N-67°39′W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56′N-67°36′W at or above 20,000 feet MSL; then continuing descent to 44°39′N-67°32′W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44′N-67°07′W; then to 45°19′N-67°49′W at 5000 feet MSL; then to 45°16′N-69°30′W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08′N-71°09′W; then climb to 7000 feet MSL to 44°03′N-72°04′W; then to 43°42′N-73°12′W at 7000 feet MSL; then to 43°45′N-73°45′W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44′N-74°07′W; then to 43°45′N-74°15′W at 5000 feet MSL; then to 43°46′N-74°25′W at 5000 feet MSL; then to the RBS site at 43°58′N-75°43′W. "Long Look" missions will start climb at 43°45′N-74°15′W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45′N-74°15′W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial of the Burlington VOR to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL, turn right to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday, and 0000Z-0630Z Tuesday through Saturday.

Alternate entry to "Hang Over" route - Aircraft will enter at Massena, N.Y. VOR at flight level 230, then proceed via the 160° radial of the Massena VOR maintaining flight level 290, after crossing the 280° radial of the Burlington, Vermont VOR descent will be started to 5,000 feet MSL; continue on the 160° radial of the Massena VOR and cross the Burlington VOR 267° radial at 23,500 feet MSL, cross the Burlington VOR 250° radial at 14,500 feet MSL; at this point turn right to intercept the 010° radial of the Albany, New York VOR; continue descent on the Albany VOR 010° radial to its intersection with the Benson, Vermont VOR 287° radial; at this point make a standard right turn to intercept the "Oil Burner" "Hang Over" route at 43°46′N-74°25′W. Aircraft will be at 5,000 feet MSL prior to crossing the 74°W longitude. Remainder of flight via the "Hang Over" route.

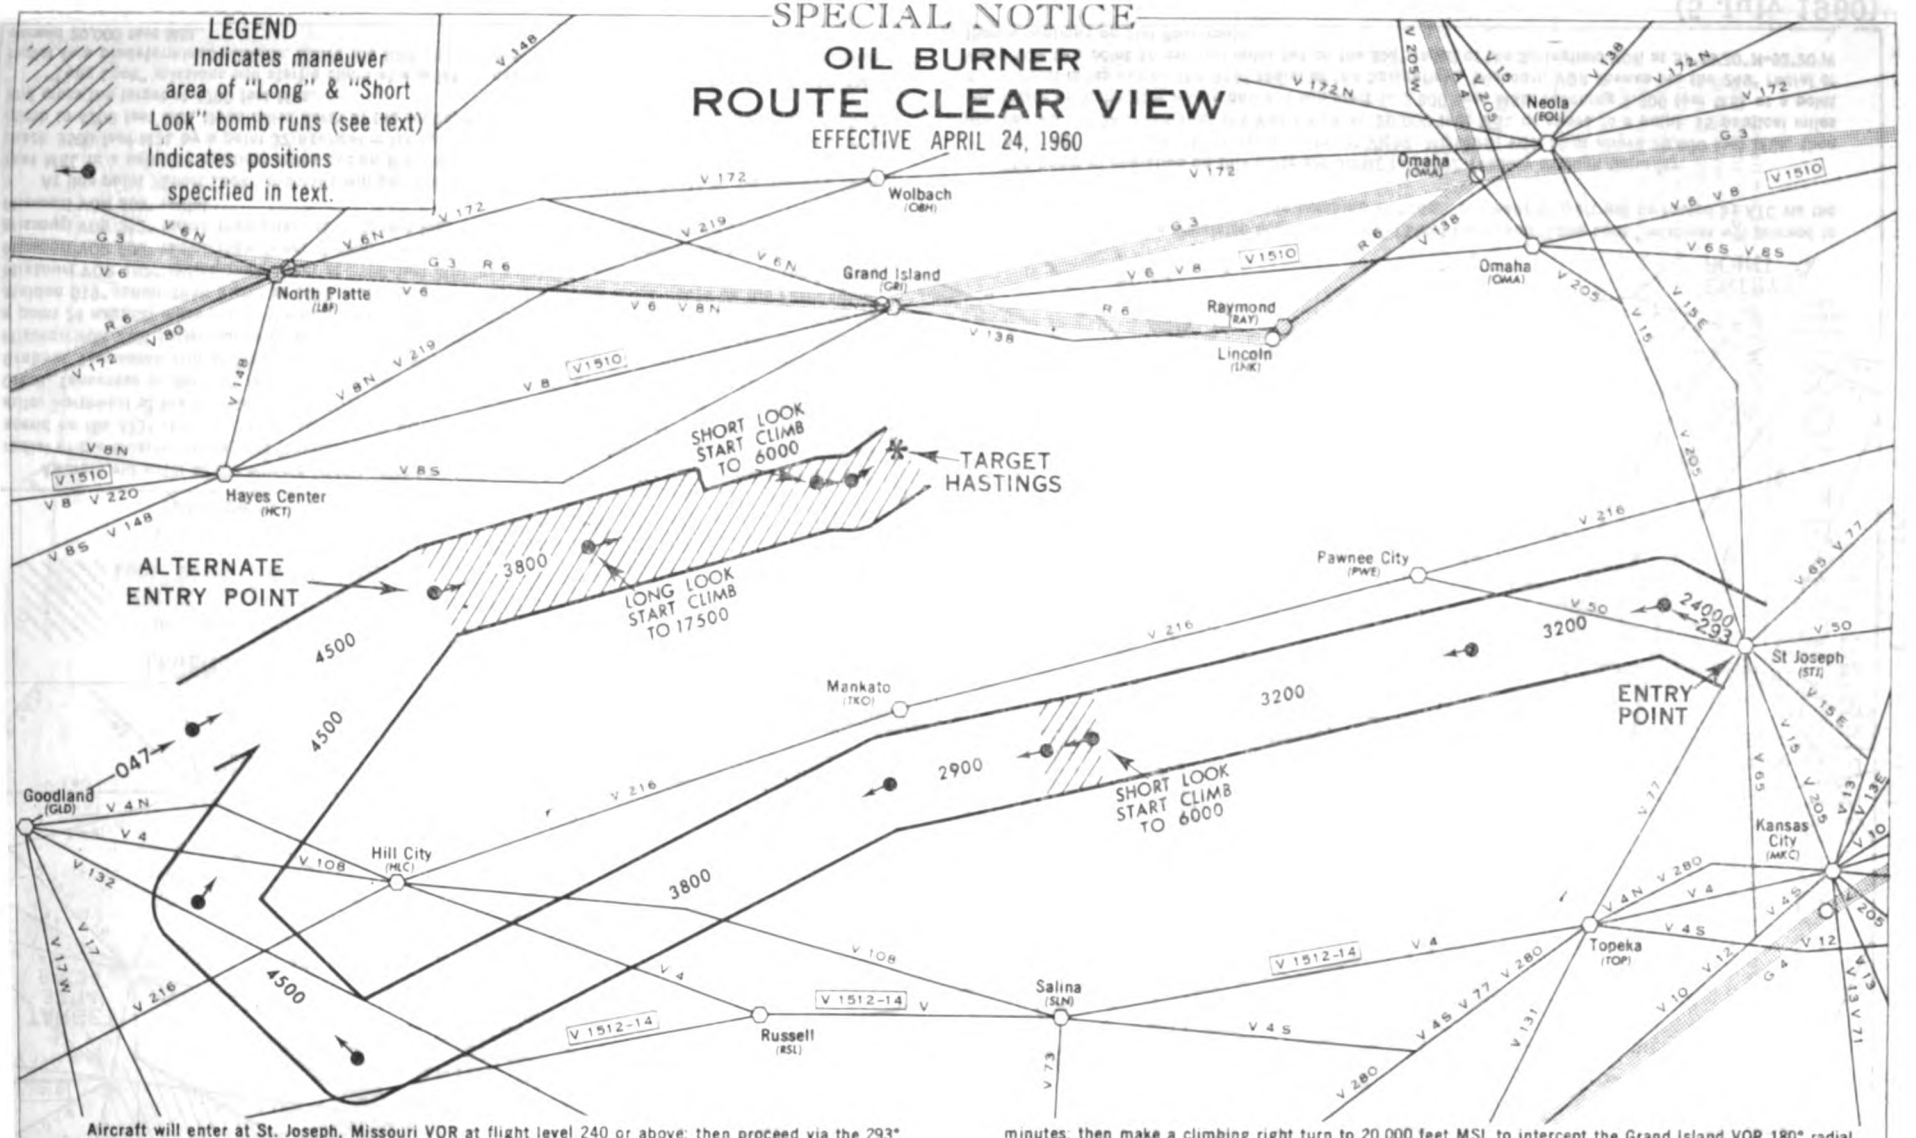
ROUTE GOLF TEE
EFFECTIVE APRIL 24, 1960

Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Chochise Arizona VOR; continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31'N-109°00'W then at 11,000 feet MSL to 32°30'N-106°55'W; then at 12,400 feet MSL to 34°05'N-107°39'W; then at 13,000 feet MSL to 34°16'N-109°55'W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs at either 9500 or 16,000 feet MSL aircraft will proceed direct to 35°24'N-110°44'W at their respective altitudes. At this point, North, East, or South bound flights will climb to flight level 250 on a direct course to 36°11'N-109°35'W. West or Northwest bound flights will proceed from 35°24'N-110°44'W direct to either Needles VOR or Tuba City VOR direct to Bryce Canyon VOR climbing to flight level 250. The hours of operation on this route are 0600Z to 1300Z, Tuesday through Saturday, "Long Look" and "Short Look" missions. From 1700Z to 2400Z Monday through Friday "Long Look" missions only.

Alternate entry point to Golf Tee route—Aircraft will cross St. Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude; then start a right descending turn to reach 13,000 feet MSL at 34°10'N-109°25'W; then at 13,000 feet MSL direct to enter Golf Tee route at 34°15'N-109°30'W. Balance of flight will be the standard Golf Tee route.



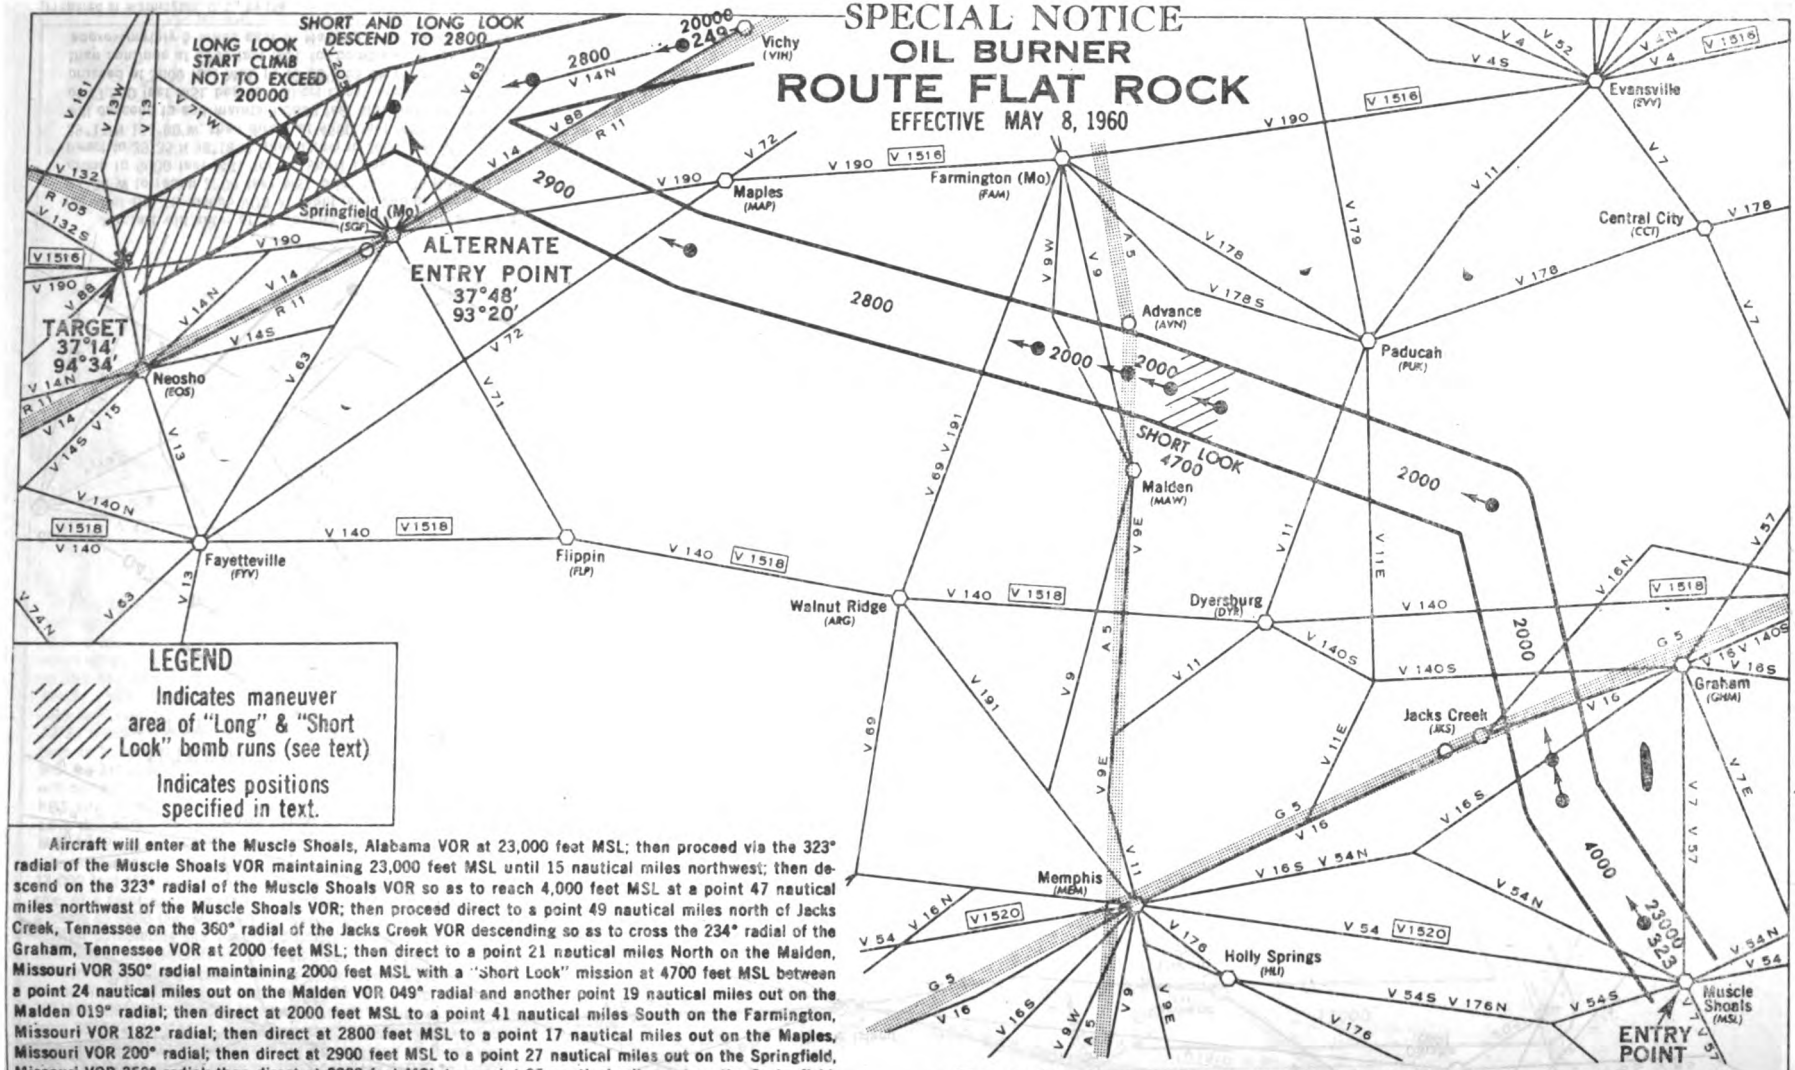
Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(5 July 1960)

SPECIAL NOTICE

OIL BURNER
ROUTE CLEAR VIEW

EFFECTIVE APRIL 24, 1960



Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above; then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W, then proceed direct to 39°43'N-97°30'W, then climb to 6000 feet MSL for a "Short Look" mission at 39°41'N-97°41'W; then descend to 2900 feet MSL direct to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL; then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes; then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL; then maintain 20,000 feet MSL direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR. "Short Look" missions, after passing the RBS site, will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial; then proceed direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center. The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.

Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL; then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route.

ROUTE FLAT ROCK
EFFECTIVE MAY 8, 1960

LEGEND

Indicates maneuver area of "Long" & "Short Look" bomb runs (see text)

Indicates positions specified in text.

Aircraft will enter at the Muscle Shoals, Alabama VOR at 23,000 feet MSL; then proceed via the 323° radial of the Muscle Shoals VOR maintaining 23,000 feet MSL until 15 nautical miles northwest; then descend on the 323° radial of the Muscle Shoals VOR so as to reach 4,000 feet MSL at a point 47 nautical miles northwest of the Muscle Shoals VOR; then proceed direct to a point 49 nautical miles north of Jacks Creek, Tennessee on the 360° radial of the Jacks Creek VOR descending so as to cross the 234° radial of the Graham, Tennessee VOR at 2000 feet MSL; then direct to a point 21 nautical miles North on the Malden, Missouri VOR 350° radial maintaining 2000 feet MSL with a "Short Look" mission at 4700 feet MSL between a point 24 nautical miles out on the Malden VOR 049° radial and another point 19 nautical miles out on the Malden 019° radial; then direct at 2000 feet MSL to a point 41 nautical miles South on the Farmington, Missouri VOR 182° radial; then direct at 2800 feet MSL to a point 17 nautical miles out on the Maples, Missouri VOR 200° radial; then direct at 2900 feet MSL to a point 27 nautical miles out on the Springfield, Missouri VOR 352° radial; then direct at 2800 feet MSL to a point 25 nautical miles out on the Springfield, Missouri VOR 300° radial.

At this point "Short Look" missions will proceed to the target at 37°14'N-94°34'W, maintaining 2800 feet MSL to a point 38 nautical miles out on the Neosho, Missouri VOR 013° radial, then climb so as to reach 3500 feet MSL by a point 32 nautical miles out on the Neosho, Missouri VOR 004° radial, to start a climb to 4700 feet MSL three miles north of the Joplin, Missouri low frequency beacon (Waco intersection) and cross the target at 4700 feet MSL.

"Long Look" missions will start a climb at a point 25 nautical miles out on the Springfield VOR 300° radial to a predetermined altitude, above the RBS site as filed in the flight plan. This altitude will never exceed 20,000 feet MSL.

After completing the simulated bomb runs, both "Short Look" and "Long Look" missions will proceed to Bartlesville, Oklahoma VOR, maintaining bombing altitude. Normally aircraft will be routed by ATC via the Tulsa, Oklahoma VOR.

The hours of operation on this route are 0200Z to 1400Z Tuesday through Saturday.

Alternate Entry Point-Aircraft will enter at Vichy, Missouri, VOR at or above 20,000 feet MSL, then proceed via the 249° radial of the Vichy VOR at 20,000 feet MSL or above to a point 15 nautical miles southwest of Vichy VOR where descent will start to 2,800 feet MSL, reaching 2,800 feet MSL at a point 46 nautical miles out on the 034° radial of the Springfield, Missouri, VOR thence via the 249° radial of Vichy VOR to a point 27 nautical miles out on the 352° radial of the Springfield VOR at 37°48'30"N-93°20'W thence continue on Flat Rock route.

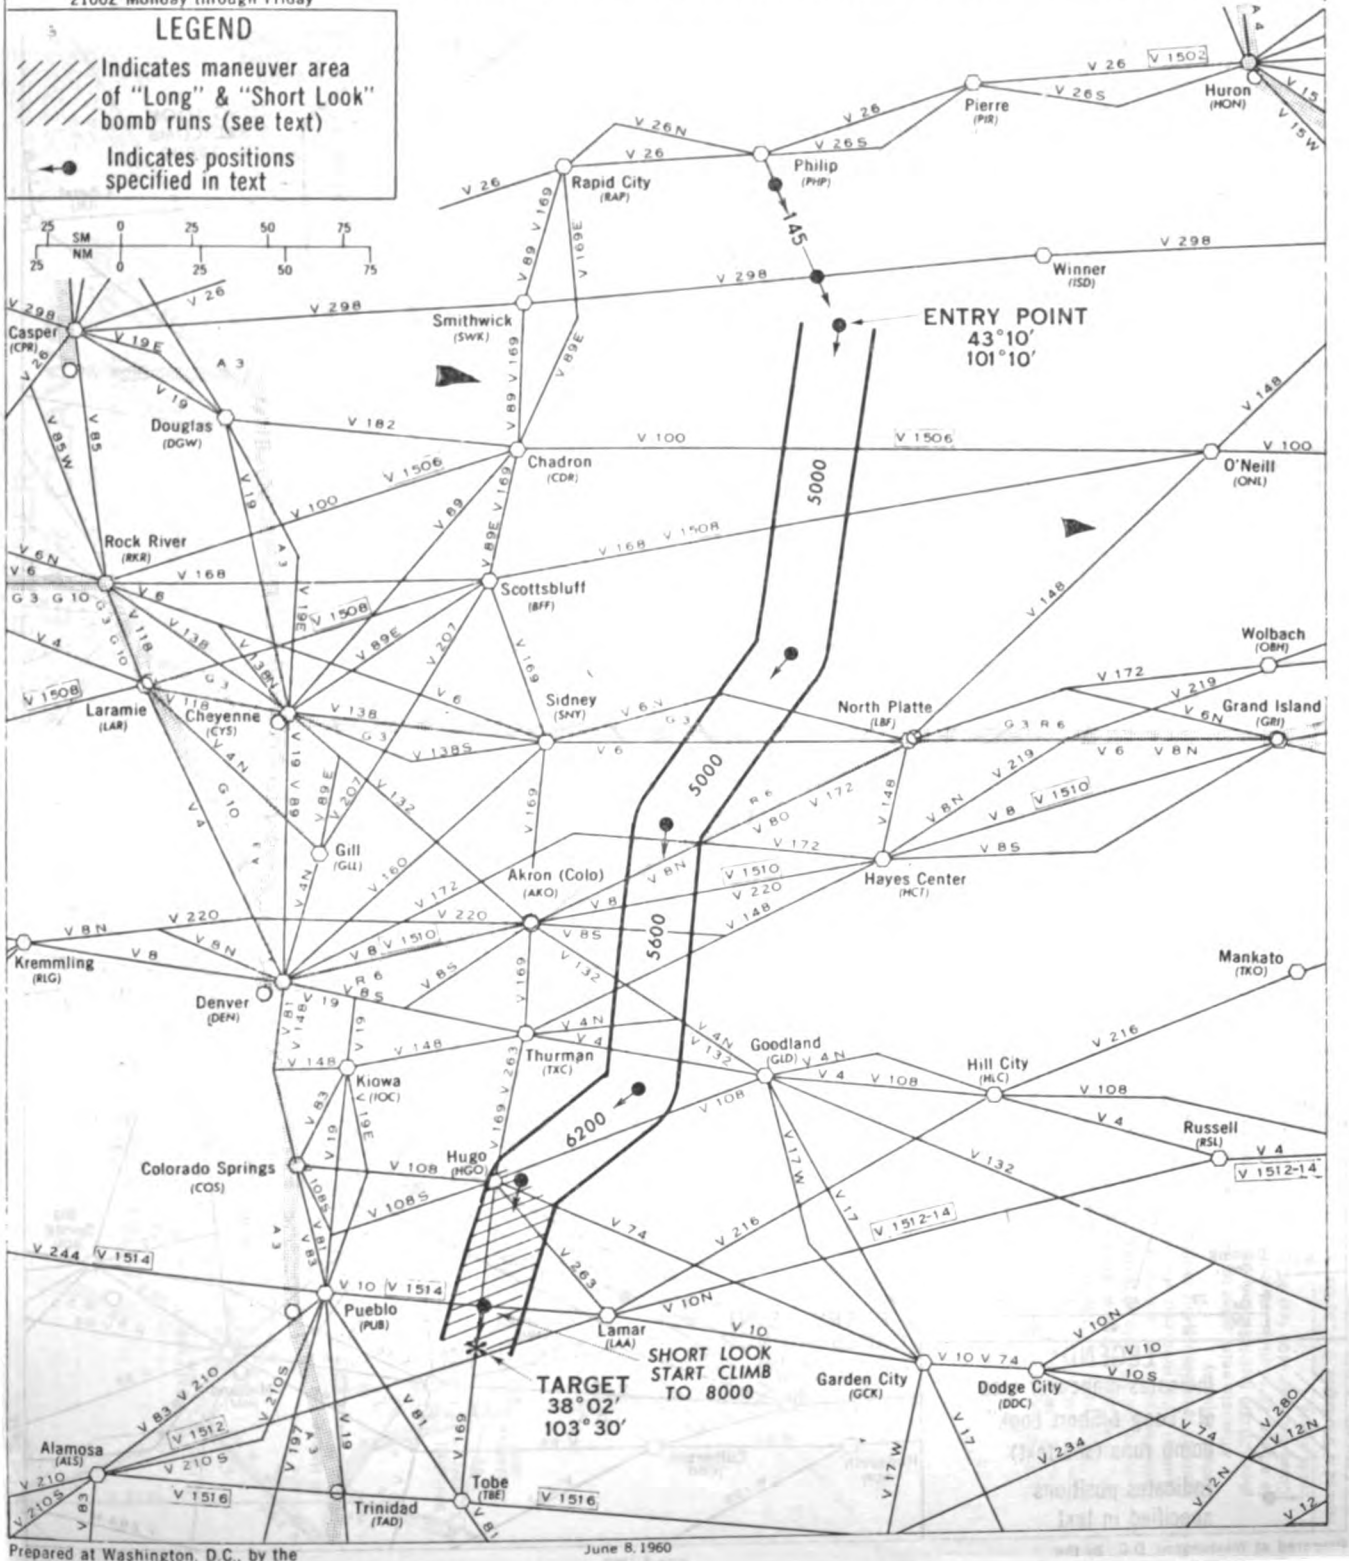
SPECIAL NOTICE



OIL BURNER

ROUTE ROUGH WOOD

EFFECTIVE JUNE 19, 1960

Aircraft will enter at Philip, South Dakota, VOR at assigned altitude/flight level (between 20,000 feet MSL and flight level 250); then proceed via the Philip VOR 145° radial, maintaining assigned altitude until 10 nautical miles southeast of the Philip VOR where descent will start to 5,000 feet MSL, crossing 43°26'N-101°20'W at or below 13,000 feet MSL, proceeding direct to low-level entry point at 43°10'N-101°10'W; then at 5,000 feet MSL direct to 41°30'N-101°30'W, then at 5,000 feet MSL direct to 40°40'N-102°20'W, then at 5,600 feet MSL direct to 39°19'N-102°29'W, then at 6,200 feet MSL direct to 38°52'N-103°13'W, then at 6,000 feet MSL direct to the La Junta, Colorado RBS site at 38°02'N-103°30'W; aircraft will start climb when crossing the Lamar, Colorado VOR 252° radial and reach 8,000 feet MSL when crossing the Lamar VOR 247° radial; maintain 8,000 feet MSL over the La Junta, Colorado RBS Site; turn left to a direct course to Walsh, Colorado, maintain 8,000 feet until five nautical miles southeast of Victor Airway 169, then climb on a direct course to Walsh, Colorado so as to reach 23,000 feet MSL five miles north of Victor Airway 1516, maintain 23,000 feet MSL direct to Dalhart, Texas, VOR

"Short Look" missions only authorized over this route. Hours of operation are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

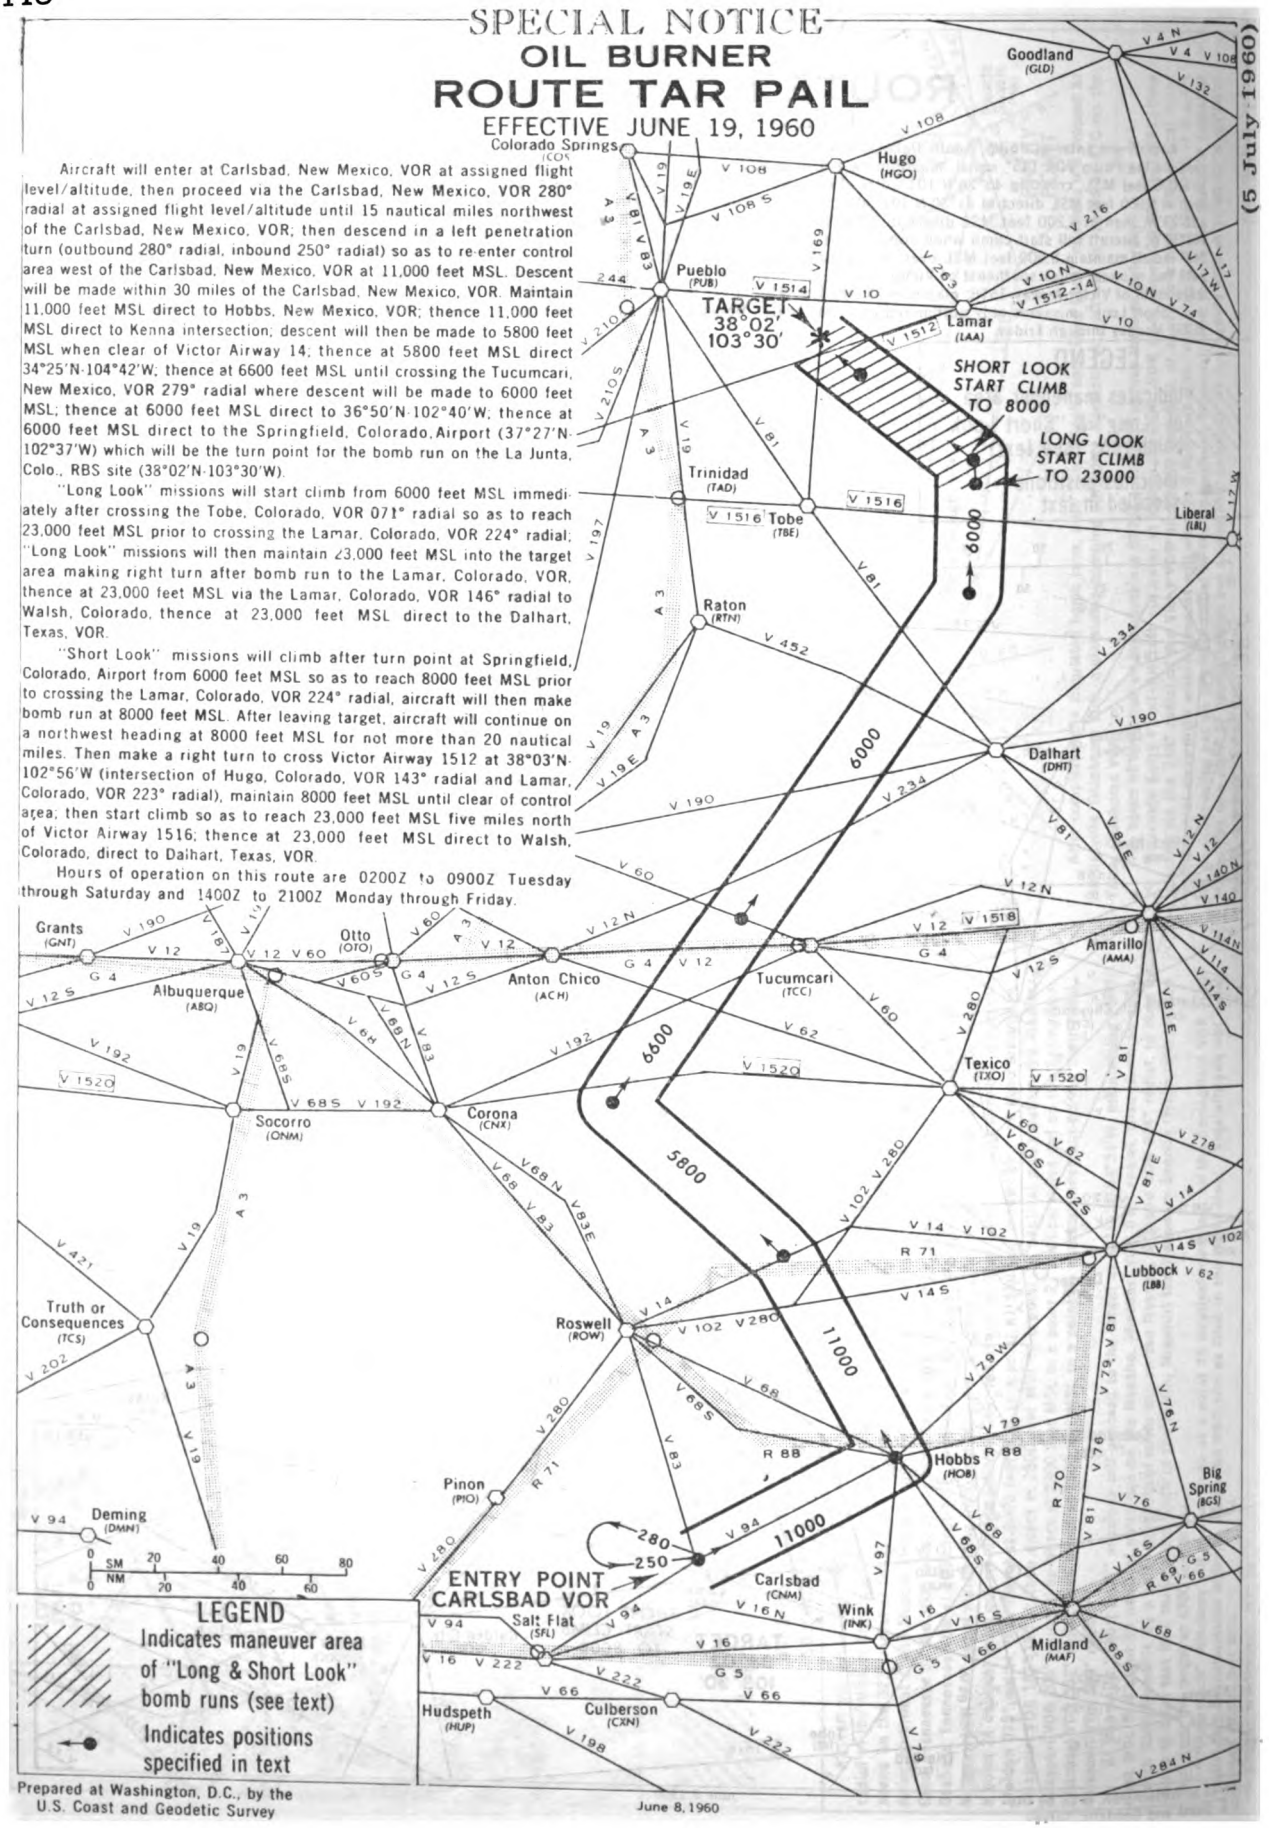
June 8, 1960

SPECIAL NOTICE

OIL BURNER

ROUTE TAR PAIL

EFFECTIVE JUNE 19, 1960



(5 July 1960)

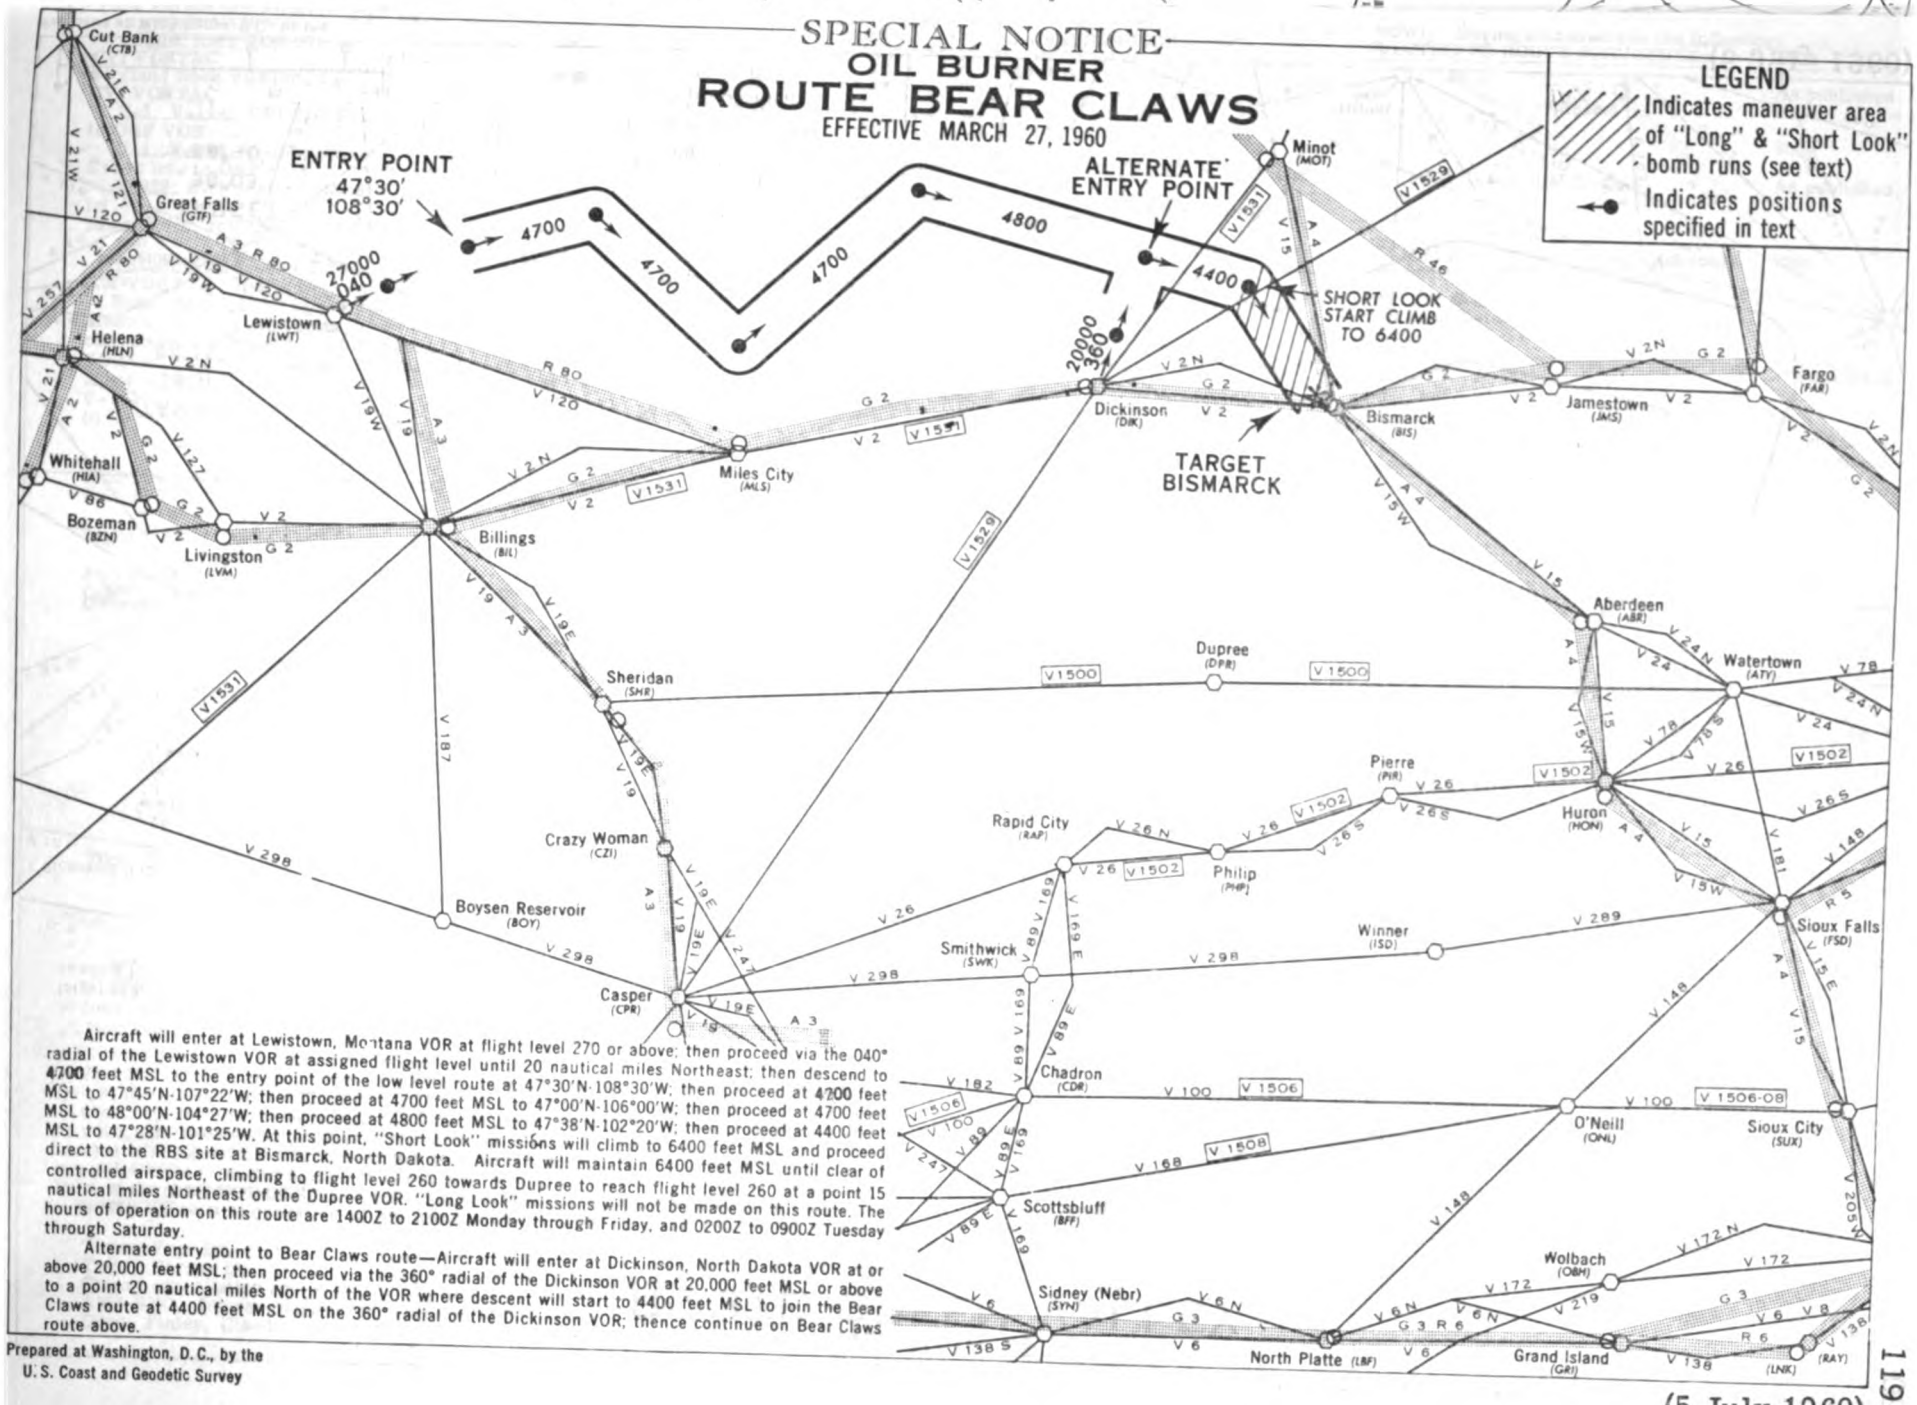
Aircraft will enter at Carlsbad, New Mexico, VOR at assigned flight level/altitude, then proceed via the Carlsbad, New Mexico, VOR 280° radial at assigned flight level/altitude until 15 nautical miles northwest of the Carlsbad, New Mexico, VOR; then descend in a left penetration turn (outbound 280° radial, inbound 250° radial) so as to re-enter control area west of the Carlsbad, New Mexico, VOR at 11,000 feet MSL. Descent will be made within 30 miles of the Carlsbad, New Mexico, VOR. Maintain 11,000 feet MSL direct to Hobbs, New Mexico, VOR; thence 11,000 feet MSL direct to Kenna intersection; descent will then be made to 5800 feet MSL when clear of Victor Airway 14; thence at 5800 feet MSL direct 34°25'N-104°42'W; thence at 6600 feet MSL until crossing the Tucumcari, New Mexico, VOR 279° radial where descent will be made to 6000 feet MSL; thence at 6000 feet MSL direct to 36°50'N-102°40'W; thence at 6000 feet MSL direct to the Springfield, Colorado, Airport (37°27'N-102°37'W) which will be the turn point for the bomb run on the La Junta, Colo., RBS site (38°02'N-103°30'W).

"Long Look" missions will start climb from 6000 feet MSL immediately after crossing the Tobe, Colorado, VOR 071° radial so as to reach 23,000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial; "Long Look" missions will then maintain 23,000 feet MSL into the target area making right turn after bomb run to the Lamar, Colorado, VOR, thence at 23,000 feet MSL via the Lamar, Colorado, VOR 146° radial to Walsh, Colorado, thence at 23,000 feet MSL direct to the Dalhart, Texas, VOR.

"Short Look" missions will climb after turn point at Springfield, Colorado, Airport from 6000 feet MSL so as to reach 8000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial, aircraft will then make bomb run at 8000 feet MSL. After leaving target, aircraft will continue on a northwest heading at 8000 feet MSL for not more than 20 nautical miles. Then make a right turn to cross Victor Airway 1512 at 38°03'N-102°56'W (intersection of Hugo, Colorado, VOR 143° radial and Lamar, Colorado, VOR 223° radial), maintain 8000 feet MSL until clear of control area; then start climb so as to reach 23,000 feet MSL five miles north of Victor Airway 1516; thence at 23,000 feet MSL direct to Walsh, Colorado, direct to Dalhart, Texas, VOR.

Hours of operation on this route are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey



June 8, 1960

SPECIAL NOTICE

OIL BURNER

ROUTE BEAR CLAWS

EFFECTIVE MARCH 27, 1960

Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast; then descend to 4700 feet MSL to the entry point of the low level route at 47°30'N-108°30'W; then proceed at 4700 feet MSL to 47°45'N-107°22'W; then proceed at 4700 feet MSL to 47°00'N-106°00'W; then proceed at 4700 feet MSL to 48°00'N-104°27'W; then proceed at 4800 feet MSL to 47°38'N-102°20'W; then proceed at 4400 feet MSL to 47°28'N-101°25'W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

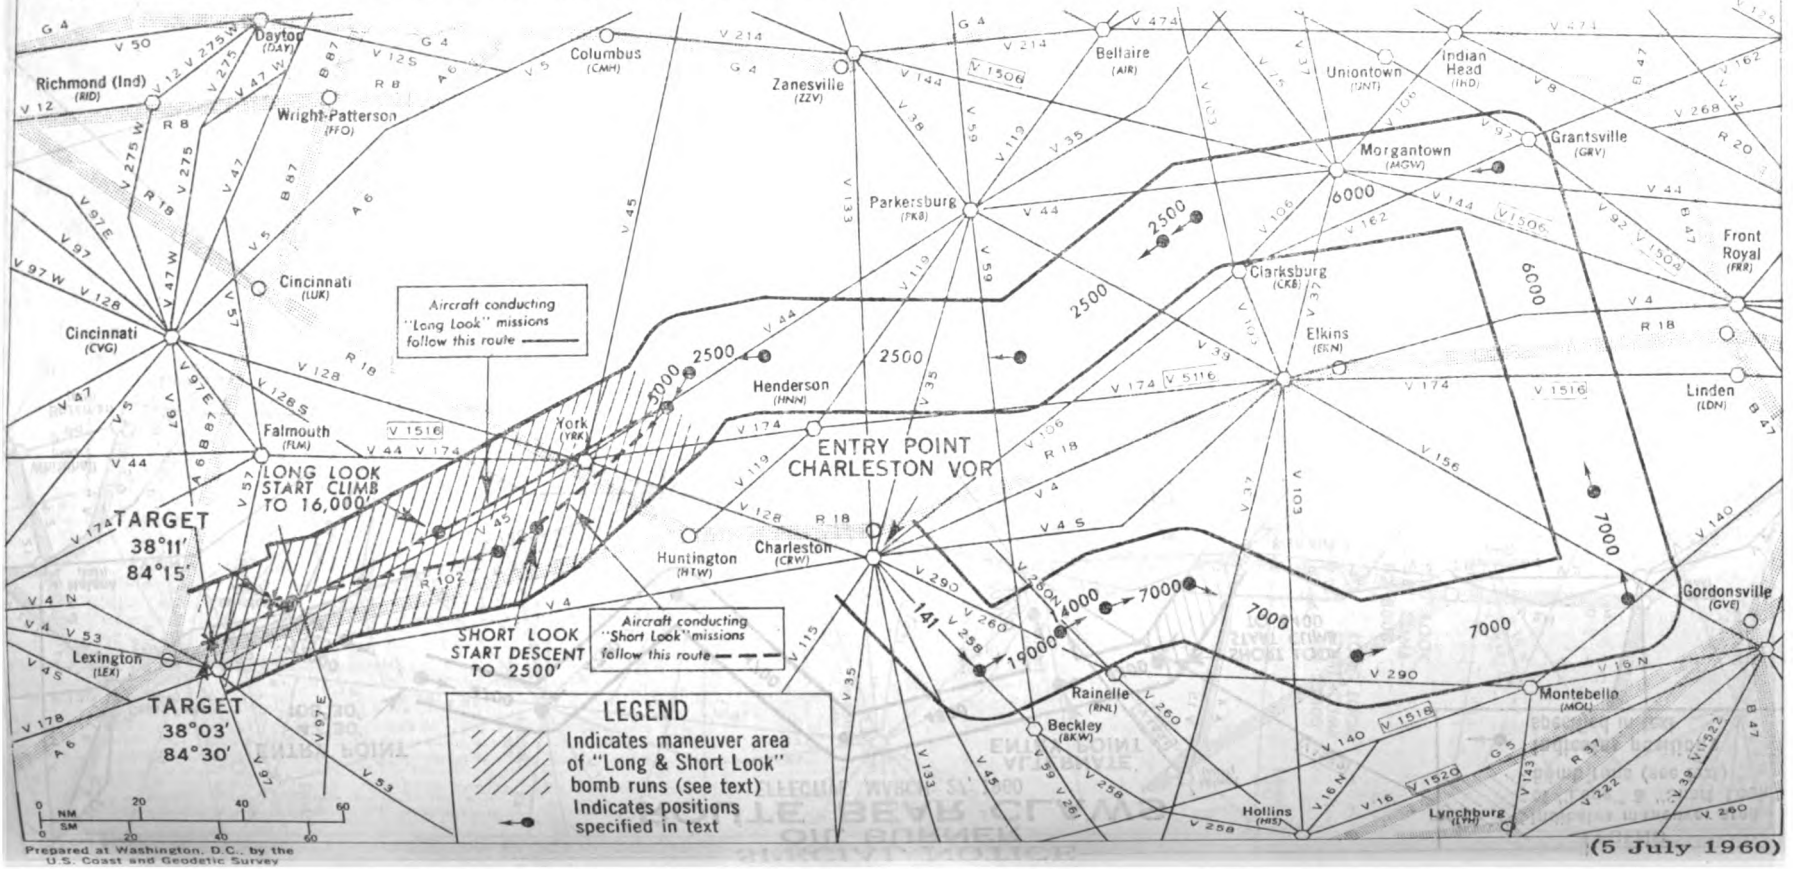
Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL; then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above.

Prepared at Washington, D.C., by the
U.S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER

ROUTE GREEN VALLEY



EFFECTIVE JUNE 19, 1960

Aircraft will enter at Charleston, W. Va., VOR at or above Flight Level 240; and proceed via the 141° radial of the Charleston VOR to 37°59'N-81°22'W, descending to cross this point at 19,000' MSL. Aircraft will then proceed to 38°08'N-81°00'W at 19,000' MSL. Aircraft will then continue descent to cross 38°12'N 80°49'W at 14,000' MSL; and to cross 38°16'N-80°30'W at 7,000' MSL; then proceeding to 38°01'N-79°49'W at 7,000' MSL; then to 38°11'N-78°41'W at 7,000' MSL; then to 38°32'N-78°49'W at 7,000' MSL; descend to 6,000' MSL immediately after passing 38°32'N-78°49'W, then at 6,000 feet MSL to 39°33'N-79°10'W; then to 39°25'N-80°27'W at 6,000' MSL, then descending to cross 39°21'N-80°34'W at 2,500' MSL; then to 38°59'N-81°11'W at 2,500' MSL; then to 38°59'N-82°14'W at 2,500' MSL; then to 38°51'N-82°33'W at 2,500' MSL; then climbing to cross 38°49'N-82°38'W at 5,000' MSL.

"Short Look" Missions will maintain 5,000' MSL from 38°49'N-82°38'W to 38°26'N-83°09'W; then descend to cross 38°22'N-83°18'W at 2,500' MSL (end of navigation leg). Aircraft will then proceed to cross the target at 38°11'N-84°15'W at 5,000' MSL. After the simulated bomb run, the aircraft will proceed via a 270° heading to cross the Lexington, Ky., VOR 024° radial at 6,000' MSL; then continuing via a 270° heading, cross Lexington VOR 322° radial at 6,000' MSL. The aircraft will then climb on the Lexington VOR 322° radial to cross Louisville, Ky., VOR 070° radial at 11,000' MSL; cross Louisville VOR 050° radial at 17,000' MSL; maintaining this altitude until after crossing Louisville VOR 015° radial, then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 310.

"Long Look" Missions will proceed from 38°49'N-82°38'W; maintaining 5,000' to 38°25'N-83°34'W, then climb to cross 38°10'N-84°11'W at 16,000' MSL; then to the target at 38°03'N-84°30'W at 16,000' MSL. After the simulated bomb run, the aircraft will make a right turn to intercept the Lexington, Ky., VOR 332° radial, still at 16,000' MSL; then climb on the Lexington VOR 332° radial so as to cross Louisville VOR 070° radial at 17,000' MSL and the Louisville VOR 050° radial at 21,000' MSL; maintaining 21,000' MSL until after crossing the Louisville VOR 018° radial; then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 310.

The hours of operation on this route are 0100Z to 1300Z, Tuesday through Saturday.

(Part 608)

(1) In Section 608.13, (a) Fort Chaffee, Arkansas Restricted Area (R-215) is revoked.

(2) In Section 608.13, (b) Fort Chaffee, Arkansas, Restricted Area (R-215A) is added to read: Description by geographical coordinates - beginning at lat 35-17-30, long. 94-12-17; thence S to 35-14-30, 94-12-15; SW to 35-14-00, 94-13-00; W to 35-14-00, 94-15-00; NW to 35-14-45, 94-16-30; N to 35-18-15, 94-17-00; E to point of beginning. Designated altitudes - surface to 6,000' MSL. Time of designation - From 0500-2200 lcl time, Mon thru Sat., July 1 thru Aug 31. From 0500-1800 lcl time, Sat and Sun., Sept 1 thru June 30. Controlling agency - FAA St. Louis ARTC Center.

(3) In Section 608.13, (c) Fort Chaffee, Arkansas, Restricted Area (R-215B) is added to read: Description by geographical coordinates - beginning at lat 35-17-30, long. 94-12-17; thence E to 35-16-00, 94-01-30; S to 35-11-30, 94-01-30; W to 35-11-30, 94-10-00; N to 35-14-00, 94-10-00; W to 35-14-00, 94-13-00; NE to 35-14-30, 94-12-15; N to point of bebinning. Designated altitudes - surface to 26,000' MSL. Time of designation - From 0500 to 2200 lcl time, Mon thru Sat July 1 thru Aug 31. From 0500 to 1800 lcl time, Sat and Sun., Sept 1 thru June 30. Controlling agency: FAA St. Louis ARTC Center.

(4) In Section 608.22, the Camp Atterbury, Ind., Restricted Area (R-65) is amended by deleting "Continuous." and substituting therefor "Sunrise to sunset."

(5) In Section 608.29, the Camp Edwards, Mass., Restricted Area (R-14) is amended by deleting "Surface to 26,000' ", and substituting therefor "surface to 13,000' MSL."

(6) In Section 608.57, the Volk Field, Wisconsin, Restricted Area (R-468) is amended as follows: In the text delete "Designated altitudes- 12,000'. Time of designation - day and night." and substitute therefor "Designated altitudes - surface to 12,000' MSL. Time of designation - sunrise to sunset, June 1 to Aug 31, annually, and on Fri, Sat., and Sun, Sept. 1 thru May 31, annually, excepting Jan and Feb."

Effective 0001 EST 25 August 1960:

(7) In Section 608.14, the Complex, California, Restricted Area (R-484) is amended as follows: Description by geographical coordinates - In the text delete "thence to lat 35-00-00; long. 118-35-00;" and substitute therefor "thence to lat 34-56-00N., long. 118-21-00W; thence to lat 35-15-00N, long. 118-35-00W.;". Controlling agency is amended to read: The FAA, Los Angeles ARTC Center.

(8) In Section 608.14, the Camp Irwin, Calif., Restricted Area (R-276) Controlling agency is amended to read: The FAA, Los Angeles ARTC Center.

(9) In Section 608.14, the Cuddeback Dry Lake, California, Restricted Area (R-447) Controlling agency is amended to read: The FAA, Los Angeles ARTC Center.

(10) In Section 608.14, the Trona, California, Restricted Area (R-277) Controlling agency is amended to read: The FAA, Los Angeles ARTC Center.

(11) In Section 608.14, the Muroc Lake, California Restricted Area (R-279) Controlling agency is amended to read: The FAA, Los Angeles ARTC Center.

(12) In Section 608.14, the Saline Valley, California, Restricted Area (R-485) is revoked.

(13) In Section 608.14, the Bullion Mountains, California, Restricted Area (R-344) is amended as follows: Description by geographical coordinates - In the text delete "thence to lat 34-31-00, long. 116-27-30; thence to lat 34-43-00, long. 116-32-45;" and substitute therefor "thence to lat 34-30-00N, long. 116-26-30W; thence to lat 34-40-30N, long. 116-29-40W; thence to lat 34-43-00N, long. 116-26-20W;". Designated altitudes is amended to read: surface to unlimited. Controlling agency is amended to read: The FAA, Los Angeles ARTC Center.

(14) In Section 608.14, Victorville, California (George AFB) Restricted Area/Military Climb Corridor (R-578) add the following: Description - That area centered on the 242°T radial of the George AFB terminal VOR extending from 5 smi W of the airbase to 30 smi W of the airbase having a width of 2 smi at the beginning and a width of 4.6 smi at the outer extremity. Designated altitudes - 4,900' MSL to 17,900' MSL from 5 smi W of the airbase to 6 smi W of the airbase. 4,900' MSL to 26,900' MSL from 6 to 7 smi W of the airbase. 5,900' MSL to 27,000' MSL from 7 to 8 smi W of the airbase. 6,900' MSL to 27,000' MSL from 8 to 9 smi W of the airbase. 7,900' MSL to 27,000' MSL from 9 to 10 smi W of the airbase. 8,900' MSL to 27,000' MSL from 10 to 11 smi W of the airbase. 9,900' MSL to 27,000' MSL from 11 to 12 smi W of the airbase. 10,900' MSL to 27,000' MSL from 12 to 13 smi W of the airbase. 11,900' MSL to 27,000' MSL from 13 to 15 smi W of the airbase. 12,900' MSL to 27,000' MSL from 15 to 20 smi W of the airbase. 17,900' MSL to 27,000' MSL from 20 to 25 smi W of the airbase. 21,900' MSL to 27,000' MSL from 25 to 30 smi W of the airbase. Time of designation - continuous. Controlling agency - Palmdale Apch Ctl.

(15) In Section 608.27, the Limestone, Maine (Loring AFB), Restricted Area/Military Climb Corridor (R-584) add the following: Description - That area centered on the 353° T radial of the Loring AFB TACAN extending from 5 smi N of the airbase to 32 smi N of the airbase having a width of 2 smi at the beginning and a width of 4.6 smi at the outer extremity. excluding that portion which lies outside of the United States. Designated altitudes - 2,750' MSL to 15,750' MSL from 5 smi N of the airbase to 6 smi N of the airbase. 2,750' MSL to 24,750' MSL from 6 to 7 smi N of the airbase. 2,750' MSL to 27,000' MSL from 7 to 10 smi N of the airbase. 6,750' MSL to 27,000' MSL from 10 to 15 smi N of the airbase, except that portion outside the United States. 10,750' MSL to 27,000' MSL from 15 smi N of the airbase northward to the United States/Canadian Border. Time of designation - continuous. Controlling agency - Loring AFB Apch Ctl.

(15) In Section 608.38, the Wrightstown(McGuire AFB), New Jersey, Restricted Area/ Military Climb Corridor (R-539) is amended to read: Description - That area centered on the 226°T radial of the McGuire TVOR extending from 5 smi SW of the airbase to 32 smi SW of the airbase having a width of 2 smi at the beginning and a width of 4.6 smi at the outer extremity. Designated altitudes - 2,100' MSL to 15,100' MSL from 5 smi SW of the airbase to 6 smi SW of the airbase. 2,100' MSL to 24,100' MSL from 6 to 7 smi SW of the airbase. 2,100' MSL to 27,000' MSL from 7 to 10 smi SW of the airbase. 6,100' MSL to 27,000' MSL from 10 to 15 smi SW of the airbase. 10,100' MSL to 27,000' MSL from 15 to 20 smi SW of the airbase. 15,100' MSL to 27, 000' MSL from 20 to 25 smi SW of the airbase. 19,100' MSL to 27,000' MSL from 25 to 32 smi SW of the airbase. Time of designation - continuous. Controlling agency - McGuire AFB Apch Ctl.

(16) In Section 608.40, the Rome (Griffiss AFB), New York., Restricted Area/Military Climb Corridor (R-544) is amended to read: Description - That area centered on 138°& 318°T radials of the Griffiss TVOR extending from 5 smi NW of the airbase to 32 smi NW of the airbase having a width of 2 smi at the beginning and a width of 4.6 smi at the outer extremity. Designated altitudes - 2,500' MSL to 15,500' MSL from 5 smi NW of the airbase to 6 smi NW of the airbase. 2,500' MSL to 24,500' MSL from 6 to 7 smi NW of the airbase. 2,500' MSL to 27,000' MSL from 7 to 10 smi NW of the airbase. 6,500' MSL to 27,000' MSL from 10 to 15 smi NW of the airbase. 10,500' MSL to 27,000' MSL from 15 to 20 smi NW of the airbase. 15,500' MSL to 27,000' MSL from 20 to 25 smi NW of the airbase. 19,500' MSL to 27,000' MSL from 25 to 32 smi NW of the airbase. Time of designation - continuous. Controlling agency - Griffiss AFB Apch Ctl.

(17) In Section 608.40 the Westhampton Beach, New York (Suffolk AFB), Restricted Area/ Military Climb Corridor (R-545) is amended to read: Description - That area centered on the 039°T radial of the Suffolk TVOR extending from 5 smi NE of the airbase to 32 smi NE of the airbase having a width of 2 smi at the beginning and 4.6 smi at the outer extremity. Designated altitudes - 2,100' MSL to 15,100' MSL from 5 smi NE of the airbase to 6 smi NE of the airbase. 2,100' MSL to 24,100' MSL from 6 to 7 smi NE of the airbase. 2,100' MSL to 27,000' MSL from 7 to 10 smi NE of the airbase. 6,100' MSL to 27,000' MSL from 10 to 15 smi NE of the airbase. 10,100' MSL to 27,000' MSL from 15 to 20 smi NE of the airbase. 15,100' MSL to 27,000' MSL from 20 to 25 smi NE of the airbase. 19,100' MSL to 27,000' MSL from 25 to 32 smi NE of the airbase. Time of designation - continuous. Controlling agency - Suffolk AFB Apch Ctl.

✓ WATKINS GLEN, NEW YORK VOR SHUT DOWN: During shutdown use the following:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA

LIST OF PERSONS NOT PERMITTED TO FLY TO OR OVER CUBA IN PRIVATE PLANES: On November 1, 1959, the Secretary of State, under the powers delegated to him by Presidential Proclamation 3004 and pursuant to the provisions of Section 215 of the Immigration and Nationality Act and regulations and rules prescribed thereunder, requested the Attorney General to prevent the departure of certain persons to or over Cuba in private aircraft. Pursuant to this request, the Commissioner of Immigration and Naturalization Service has served "Notice of Prevention of Departure" on the below-listed individuals.

Section 215 of the Immigration and Nationality Act provides that if a plane is used as an instrument for the illegal departure of a person from the United States contrary to such an order, the plane is subject to confiscation in addition to criminal penalties which may be imposed on the violator or persons who aid and abet violators.

The Service continues investigation of all illegal activities in the United States in connection with the present situation in Cuba. From time to time additions to the list may be made. In the meantime, if a person seeking to rent a plane is not well known to you or there is any doubt as to whether he is in any way connected with illegal Cuban activities, you are requested to call the nearest Immigration and Naturalization Service office for advice. You may also obtain this information from the Flight Information Center, Miami, Florida, telephone FRanklin 7-1495, which is operated by the Immigration and Naturalization Service.

Your cooperation in this matter will materially aid the Immigration and Naturalization Service in carrying out its mission and possibly save you the loss of an aircraft.

✓ AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide Volume 15 Number 6 dated 24 May 1960, as follows:

(1) On Request Reporting Points - Established - Effective 30 June 1960:
(a) HOMEDALE, CALIFORNIA should read: HOMEDALE, IDAHO.

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by the USAF when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 43-22-30N, 94-04-00W, (entry-call Mason City Radio), 43-28N, 91-00W, 42-21N, 90-54-30W; 40-25N, 92-07-30W; 40-22N, 92-31W(end nav. leg) to target 40-14N, 93-36W. Note: for a bomb run only, entry reporting will be 41-00N, 91-45W(call Ottumwa Radio); remainder of route is identical with above

Route 2-M-1: Start at 31-45N, 91-49W (entry-call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N, 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg). 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N, 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-R-2: Start at 35-38N, 99-11W; to start climb point 36-12N, 98-14W; to termination 36-45N, 98-11W. Entry reporting point - Sayre Radio.

Route 2-R-3: Start at 36-22N, 92-14W; to 36-26N, 93-50W. Entry reporting point - Springfield Radio.

Route 2-S-1: Start at 29-29, 91-46, (entry reporting point-Baton Rouge VOR); to turning point 28-00, 91-30; to turning point 27-00, 92-30; to turning point 27-50, 94-00; to navigation termination point, bomb run entry point, and LONG LOOK start climb (if applicable) 27-50, 95-45; to SHORT LOOK start climb (if applicable) 28-11, 96-34; to target at Matagorda Island 28-13-30, 96-39-00. After bombs away, proceed to 28-21-30, 96-42-00, then right turn to Palacios VOR. On SHORT LOOK mission do not exceed 5000' MSL until past Port O'Connor, Texas. On LONG LOOK do not descend below 18,000' MSL until past Port O'Connor, Texas.

Route 2-T-1: Start at 42-00N, 96-12W; to target 42-51N, 97-29W. (Entry reporting point-Sioux City Radio).

Route 2-T-2: Start at 42-30N, 97-49W to target 41-26.5N, 96-36W. (Entry reporting point Point-O'Neil Radio).

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N, 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15 - A - 3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-D-3: Start descent at Hudspeth VOR, Texas to start low level point at 31-08N, 105-10W to start climb at 30-48N, 104-46W to target at 30-18N, 104-02W.

Route 15-E-1: Start descent 44-28N, 100-40W, entry point 44-34 1/2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1/2N, 103-36W.

Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-G-1: Cross Ukiah, California VOR at flight altitude (entry point) - (Call Ukiah Radio), descend to start low level 39-06N, 124-17W to 39-08N, 124-45W; 40-24N, 125-29W; 42-20N, 125-35W; 43-08N, 126-00W to climb point 43-32N, 124-48W to start climb for Long Look at 43-43N, 124-17W or to start climb for Short Look at 43-54N, 123-20W to target 43-58N, 123-05W, S of Eugene, Oregon.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.

Route 15-M-2: 36-18 1/2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.

Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

POSTDEADLINE DATA - continued from page 102.

VERMONT: ★BURLINGTON MUN ARPT TOWER: July 1, freq 126.20 mc replaced 126.18 mc. Rcvd to late for ANRA Page.

VIRGINIA: ROANOKE, WOODRUM FLD: Rnwy 5-23 & txwy 23 clsd, constr; use rnwy 5 for taxiing only. (6-29)

**WEST POINT ARPT SPECIAL NOTICE: Flgt Test Area described as follows: Beginning at lat 37-34-30, long. 76-43-00 to a point 37-34-30, 76-37-00; 3 mi due E of Churchville, to 37-47-00, 76-46-00, to 37-47-00, 76-47-30, 37-34-30, 76-53-00, 37-34-30, 76-48-00. Hours: 9:00AM to 7:00PM or until official sunset. Altitudes: surface to 5,000' MSL. Users: L. W. Carter and J. E. Tyndall. Expires 19 June 1961. Note: The identical area to be used only until June 12, 1961 involving Druin Turbulent N-417M acft is also assigned individually to Mr. J. E. Tyndall. (6-24)

WASHINGTON: PASCO RADIO: About July 15, VOR will be comsnd. Freq: 108.4 mc. Ident: PSC. Lctd: lat 46-15-49, long. 119-06-55. Elev: 398' MSL. Montrg category (1). Mag var: 20°55' E. Class: L-VOR. (6-29)

Form FAA-398 (2-60)

(5 July 1960)

FLIGHT SERVICE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Station,

FOREIGN EXCHANGE Location	Number	FSS Providing Service
New London-Groton,	GI 3-3245	Providence, R.I.

INTERPHONE Location	FSS Providing Service
Half Moon Bay Arpt., Calif.	Oakland, Calif.

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Stations, leased telephones services are provided to the nearest FAA station. One such service, entitled "Foreign Exchange" (FX), permits dialing a local number which will connect to the distant FSS at the cost of a local call. Another is "Interphones" a private line extension to the nearest FAA station and is normally located in the operations office at an airport where it is available to all pilots. Fixed base operators at the same airport may lease extension service on these lines for the convenience of pilots at the cost of a local telephone extension.

The locations provided with the above services follows:

PREFERRED ROUTES

The following preferred routes were effective April 7, 1960. Generally, the route commences and terminates at fixes on or near the perimeter of the terminal area, unless the preferred route essentially overlies the airport and aircraft would normally be cleared directly on course. Terminal area charts should be consulted to determine the normal route between the airport and route starting/terminating fixes. At those locations where radar is utilized, the pilot may receive radar vectors to/from these fixes.

Official location identifiers are used in the route description for VOR's. L/MF facilities are identified by the identifier and type, e.g., HEM/LFR, SRL/RBN. Intersection names are spelled out. Where two facilities or an intersection and a facility follow in succession, the route is direct.

All preferred routes are listed alphabetically under the name of the departure metropolitan area. Where several airports are located within a metropolitan area and each airport requires a different preferred route, such listing is alphabetized in parentheses following the metropolitan area.

NOTE: This list will remain in effect until the next effective date which will be published approximately Sept. 27, 1960. Revisions to this list will be published in intervening issues of the Airman's Guide through Sept. 13, 1960.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about 1 month, making

AIRCRAFT MANEUVERS WITHIN CONTROL ZONES: To reduce the potential for in-flight conflict between aircraft operated in the vicinity of controlled airports in VFR weather conditions, FAA airport traffic control specialists will approve only those maneuvers considered necessary for the safe and expeditious movement of air traffic within the associated control zones. For this purpose, maneuvers such as operation of aircraft at speeds in excess of the minimum speed consistent with safe operational limitations of an aircraft, formation fly-bys, and unnecessary low passes, will be considered as unusual and will not be approved.

Maneuvers which will be approved, on a traffic permitting basis, include:

1. Normal take-offs and landings including 360° overhead approaches and those conducted in formation.
2. Practice instrument approaches including those conducted with a chase plane.
3. Touch-and-go landings.
4. Flight check activities such as short field take-offs and landings, engine out operations, checking of navigational aids, etc.
5. Simulated forced landing patterns including practice flame-out maneuvers.
6. Low passes for prearranged aircraft test or calibration purposes and visual equipment checks, such as gear checks, provided the flights are not conducted at an excessive speed.
7. Jettisoning of fuel tanks or other external stores.

✓ RADAR WEATHER ADVISORY SERVICE(STAR GAZER) - On page 31 of the Flight Information Manual Volume 13 dated December 1959, Radar Weather Advisory Service(Star Gazer) will be discontinued on August 1, 1960, in the geographical area bounded by the following coordinates: 41-25N, 120-47W; NW to 40-00N, 121-50W; N to 45-50N, 121-50W; NE to 46-30N, 121-00W; N to a point on the U.S.-Canadian Border at 121-00W; thence E along the U.S.-Canadian Border to a point 113-25W; S to 42-00N, 113-25W; W to 42-00N, 119-25W; SW to the point of beginning.

✓ PROHIBITED AREA REVOKED: Effective immediately the Clinton Engineering Works, Oak Ridge, Tenn., Prohibited Area (P78) (Chattanooga and Nashville Charts) is revoked.

RADAR - On page 30 of Flight Information Manual Volume 13, dated December 1959, add subtopic No-Gyro Vector or Approach - Aircraft Under Radar Control: A pilot under radar control will occasionally experience circumstances wherein his directional gyro or other stabilized compass is inoperative or inaccurate. When this occurs, he should so advise air traffic control and request a no-gyro vector or approach. Pilots of aircraft not equipped with a directional gyro or other stabilized compass who desire radar handling may also request a no-gyro vector or approach. Prior to commencing such vector/approach the pilot will be advised to make all turns at standard rate, and that turn instructions should be executed immediately upon receipt. For example, "Turn Right"; "Stop Turn." When a surveillance or precision approach is made the pilot will be advised after his aircraft has been turned onto final approach to make turns at half standard rate.

RADAR WEATHER ADVISORY SERVICE - On pages 31 and 32 of Flight Information Manual Volume 13 dated December 1959, under Radar Advisory Service Air Defense Command delete listings under Michigan, Oregon and Washington.

GOOD OPERATING PRACTICES-IFR RADAR DEPARTURE SERVICE AVAILABLE - On page 53 of Flight Information Manual Volume 13 dated December 1959, delete paragraph 12.

✓ AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about 1 month, making former prints obsolete for aviation use. Keep orders to a minimum until new edition is printed.

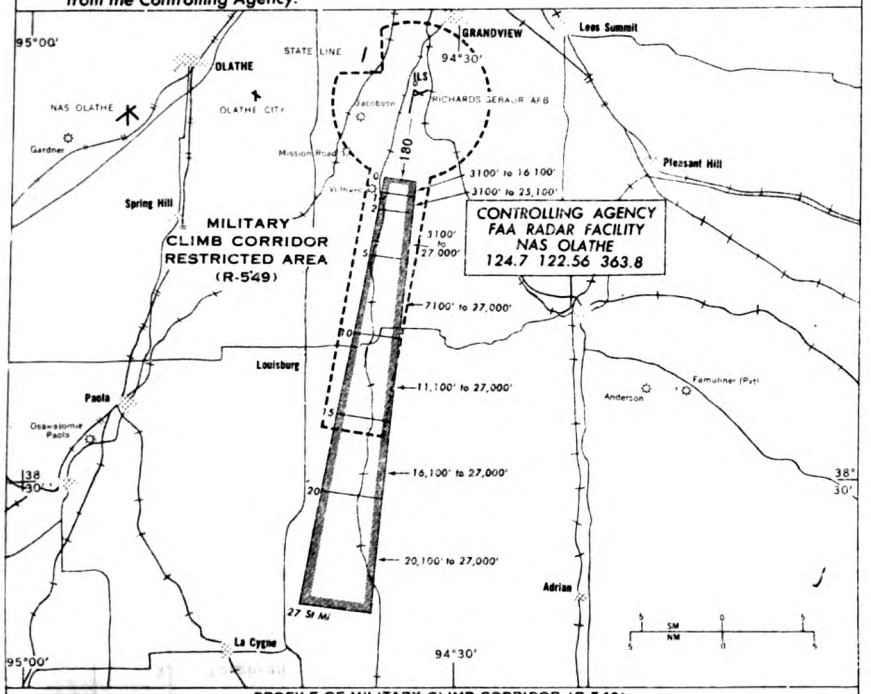
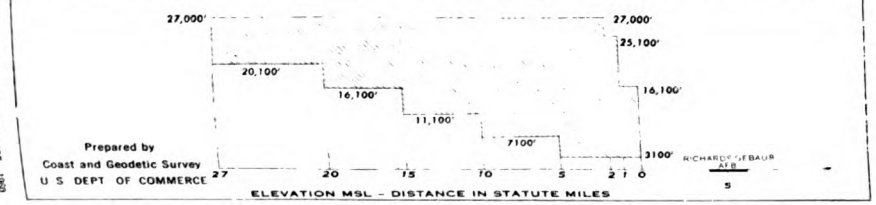
AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60.23(A) of part 60 of the Civil Air Regulations has been granted to the Air Defense Command and they are conducting Interceptor Training against target acft without navigation lights at and above flight level 400 within the continental limits of the U.S.A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.



SPECIAL NOTICE

MISSOURI
GRANDVIEW (RICHARDS-GEBAUR AFB) MILITARY CLIMB CORRIDOR



EFFECTIVE 0001 E.S.T. JULY 28, 1960

(This Special Notice will not normally be revised or reissued,)
Refer to Aeronautical Charts for current information)

Pilots of Century Series aircraft on active air defense missions are unable to see and safely avoid other aircraft during the climb phase of a scramble. In the interest of safety, the Dept. of Defense and the FAA have agreed to establish restricted corridors to segregate such operations from other air traffic. ALL FLIGHTS through these areas should obtain prior approval from the Controlling Agency.

NOTAMS page 3

Special Notices page 29

FEDERAL AVIATION AGENCY

AIRMAN'S GUIDE

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Important or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below.

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction; or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.

adjt	adjacent	dptr	departure	jctn	junction

LEGEND

NOTAMS

LEGEND

(7-21) -- Month and day the information was reported.

** -- New or revised airport or miscellaneous data. Pilots should inscribe this information on charts and records.

* -- New or revised radio or radar data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such "permanent" data will usually be cited only once. Temporary data, however, will be continuously cited until no longer in effect.

ALABAMA: BIRMINGHAM MUN ARPT: Due to comsng apch lgt system rnwy 5, ILS minimun day & ngt rnwy lowered to 200'-1/2.

BIRMINGHAM MUN ARPT TOWER: About July 18, freq 126.18 mc will be chgd to 126.2mc.

BIRMINGHAM RADIO: Caution - E course LF rng has severe multiples. TACAN shut down eqpmt installation. (7-12)

ELBA ARPT: New arpt reported. Lctn: 1.5 mi W; Lat 31-25, long. 86-05; No. of rnwys: 2; Lngst rnwy & facils: h30-B*L 4; Rmks: * Unattended. Trees E. (4-7)

FORT MORGAN ARPT: Clsd, constr of paved rnwy. (6-27)

**MOBILE, BATES FLD: Sequence flashers serving rnwy 14, lctd stns 10 thru 30 comsnd & flt checked. (6-22)

MOBILE, BATES FLD TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc.

MOBILE, BROOKLEY AFB RADAR APPROACH CONTROL: About July 18, freq 126.18 mc will be chgd to 126.2 mc. (4-25)

MOBILE, BROOKLEY AFB SPECIAL NOTICE: Due to concentrated opern of hi-performance jet acft, all tfc other than that for Brookley, should remain clear of the Brookely Ctl Zone during VFR flgt below 2700', unless otherwise cleared by the Brookley Ctl Twr.

MOBILE, BROOKLEY AFB RADIO: USAF VOR radials 212° thru 222° clockwise unusable-acct severe scalloping. (7-10)

MOBILE RADIO: VOR radials 018° clockwise thru 028° unusable. (6-29) DMET operg test basis; channel 80. (7-10)

MONTGOMERY SPECIAL NOTICE: Due to extsv jet tfc, all acft are cautioned to maintain cont rdo ctc with appropriate ctl twr when operg in Danelly Fld or Maxwell AFB ctl zone.

**MONTGOMERY, DANNELLY FLD: * Sequence flashers serving rnwy 9, operg on stns 1 thru 22 flt checked & comsnd. (6-23)

*MONTGOMERY-MAXWELL AFB RADIO: USAF LF rng decmsnd. (7-13)

MUSCLE SHOALS RADIO: DMET operg test basis; channel 112. (5-5)

OZARK, BLACKWELL FLD: Clsd, constr rnwy paving. (6-15)

ROANOKE MUN ARPT: Clsd, reconstr & paving. (6-14)

ST. ELMO ARPT: 250'(258'MSL) lgtd tmpry twr being erected 24 nmi ESE (132°T) at lat 30-13-54, long. 87-55-41. (4-18)

G - Guards

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission; Army Air Fields are open to civil aircraft on authorization of the Air Field Commander.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS O, Hqs USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, Item 9 and page 73 - Position Reporting, in the Flight Information Manual. Volume 13, dated December 1959.
Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flgt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE(General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

WASHINGTON, D.C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D.C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U.S. Route 29 until past Falls Church. Departures proceed well right of U.S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Penetration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

JET ACROBATIC AREAS - VICINITY WASHINGTON, D.C. - Acrobatic maneuvers by jet aircraft are conducted daily, VFR daylight hours only, between the altitudes of 10,000' and 20,000' MSL inclusive, within the following areas:

Area #1: The uncontrolled portion of that airspace which is bounded on the N by V-174; on the E and SE by B-47 and V-140; and on the S by V-156.

Area #2: The uncontrolled portion of that airspace which is bounded on the N by V-156; on the E by V-140; on the S by V-290; and on the W by V-103.

REGULATIONS OF THE ADMINISTRATOR PART 570: Rules of Washington National Airport-"570.49 - No pilots other than those possessed of at least a private pilot rating or the equivalent shall operate aircraft on the airport."

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York FSS. controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT: Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D. C. (Attention: W-200). (This does not apply to hearing aids)

TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meterological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-frequency (200-400 kc) navigational aid (L/MF range or H facility.)

Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Boise, Idaho	359 kc
Boston, Mass.	382 kc
Chicago, (Joliet), Ill.	350 kc, 257 kc
Cincinnati, Ohio	335 kc
Cleveland, Ohio	344 kc
Denver, Colo	379 kc
Fort Worth, Texas	365 kc
Indianapolis, Ind.	266 kc
Los Angeles, Calif.	332 kc
Milwaukee, Wisconsin	242 kc
Minneapolis, Minnesota	266 kc
New York, N.Y.	209 kc
Oakland, Calif.	362 kc
Pittsburgh, Pa.	254 kc
Washington, D.C.	332 kc
Wichita, Kans.	332 kc

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route " published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

1. Radar Advisory Areas
   a. No additional operational restriction, control or communication requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operated within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Basic Mark X equipped military flights operating within radar advisory areas will adjust transponders to operate on Mode 3. Unless otherwise instructed by air traffic control, Mark X SIF equipped flights will adjust transponder to Mode 3, Code 62, except that ADC flights will adjust transponder to Mode 3, Code 00. Those military flights operating on a mode other than Mode 3 will adjust transponder to operate on Mode 3 and the assigned mode simultaneously. Civil turbojet transponders will be adjusted to reply on Mode A, Code 40. Other civil aircraft will adjust transponder to reply on Mode A, Code 62.
   b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.
   c. In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.

2. Nonradar Advisory Areas
   The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.
   a. Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.
   b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information and radar vectors to avoid observed traffic. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

   1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
   2. In the event of loss of communication with a USAF(ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR/VORTAC Jet Route #1 (Los Angeles, Calif., to Seattle, Washington)
2. VOR/VORTAC Jet Route #2 (Houston, Texas to Lake Charles, La.) Houston, Texas to New Orleans, La.)
3. VOR VORTAC Jet Route #3 (Oakland, Calif., to Spokane, Wash.)
4. VOR/VORTAC Jet Route #4 (Los Angeles, Calif., to Phoenix, Ariz.
5. VOR/VORTAC Jet Route #8 (Tulsa, Okla., to New York, N.Y.)
6. VOR/VORTAC Jet Route #12 (Baltimore, Md., to Pittsburgh, Pa.)
7. VOR/VORTAC Jet Route #14 (Cleveland, Ohio to Idlewild, N.Y.)
8. VOR/VORTAC Jet Route #16 (Portland, Ore., to Pullman, Mich.; Buffalo, N.Y., to Boston, Mass.) Nonradar advisory area from 60 nmi W of Dillon, Mont. to Int. of J16V with Category "A" radar flight advisory area of J90V SW of Billings, Mont. Eff. 28 July 60.
9. VOR/VORTAC Jet Route #19(Omaha, Nebr., to Int. J19V with J64V). Eff. 28 July 60.
10. VOR/VORTAC Jet Route #21 (Omaha, Neb., to Duluth, Minn.) (Dallas, Tex., to San Antonio, Tex.)
11. VOR/VORTAC Jet Route #22 (Lake Charles, La., to intersection with J55V).
12. VOR/VORTAC Jet Route #24 (Phoenix, Ariz., to Albuquerque, N.M.)
13. VOR/VORTAC Jet Route #25 (Dallas, Tex., to Tulsa, Okla.)
14. VOR/VORTAC Jet Route #26 (Amarillo, Tex., to Appleton, Ohio.)
15. VOR/VORTAC Jet Route #29 (Houston, Tex., to Memphis, Tenn and Dayton, Ohio to Cleveland, Ohio.)
16. VOR/VORTAC Jet Route #31 (Dallas, Tex., to Chicago, Ill.)
17. VOR/VORTAC Jet Route #33(Shreveport, La., to the Int. with J31V and Kansas City, Mo., to Des Moines, Iowa.)
18. VOR/VORTAC Jet Route #34 (Cleveland, Ohio to Pittsburgh, Pa.)
19. VOR/VORTAC Jet Route #35 (New Orleans, La., to St. Louis, Mo.)
20. VOR/VORTAC Jet Route #37 (New Orleans, La., to Spartanburg, S.C.)
21. VOR/VORTAC Jet Route #41 (Miami, Fla. VOR to St. Petersburg, Fla. VOR.)
22. VOR/VORTAC Jet Route #41 (Kansas City, Mo., to Omaha, Nebr.) Eff. 28 July 60.
23. VOR/VORTAC Jet Route #42 (Dallas, Tex., to New York, N.Y.
24. VOR/VORTAC Jet Route #43 (Atlanta, Ga., to Waterville, Ohio.) Eff. 13 Aug. 60.
25. VOR/VORTAC Jet Route #45 (Alma, Ga., to St. Louis, Mo.)
26. VOR/VORTAC Jet Route #49 (Alma, Ga., to Spartanburg, S.C.)
27. VOR/VORTAC Jet Route #52 (Dallas, Tex., to Atlanta, Ga.) via Texarkana, Ark., VOR; Greenwood, Miss., VOR; Birmingham, Ala., VOR. (Dallas, Tex-Birmingham, Ala., extension to J52V.
28. VOR/VORTAC Jet Route #53 (Miami, Fla., to the Int. of J53V and J81V; Spartanburg, S.C., to Pittsburgh, Pa.)
29. VOR/VORTAC Jet Route #55 (From the intersection with J22V to Kenton, Del.)
30. VOR/VORTAC Jet Route #58 (San Francisco, Calif., to New Orleans, La.) Non-radar advisory area from 20 nmi W of Pioche, Nev., VOR to 90 nmi SE of Alamosa, Colo., VOR.)
31. VOR/VORTAC Jet Route #60 (Los Angeles, Calif., to New York, N.Y.) Nonradar advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb., VOR.
32. VOR/VORTAC Jet Route #62 (Idlewild, N.Y., to Nantucket VOR.)
33. VOR/VORTAC Jet Route #64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory area from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
34. VOR/VORTAC Jet Route #67 (Idlewild, N.Y., to U.S.-Canadian Border.)
35. VOR/VORTAC Jet Route #69 (Spartanburg, S.C., to Gordonsville, Va.)

(Continued)

36. VOR/VORTAC Jet Route #71 (Appleton, Ohio to Front Royal, Va.)
37. VOR VORTAC Jet Route #75 (Miami, Fla., to U.S.-Canadian Border)
38. VOR/VORTAC Jet Route #77 (Miami, Fla., to U.S. Canadian Border)
39. VOR/VORTAC Jet Route #78 (Los Angeles, Calif., to New York, N.Y.)
40. VOR/VORTAC Jet Route #79 (Miami, Fla., to Idlewild, N.Y.)
41. VOR/VORTAC Jet Route #80 (Denver, Colo., to New York, N.Y.) Nonradar advisory area that portion of JR-80 from 120 nmi ESE of Denver, Colo., VOR to 25 nmi W of Hill City, Kansas VOR.
42. VOR/VORTAC Jet Route #81 (The intersection of J81V and J53V to Barracuda Int.)
43. VOR/VORTAC Jet Route #82 (Chicago, Ill., to Boston, Mass.)
44. VOR VORTAC Jet Route #84 (Oakland, Calif., to the U.S. Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 40 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr. Advisory Service on Jet 84 Victor will be provided flight level 270 and above from 100 nmi W to 40 nmi E of Scottsbluff, Nebr.
45. VOR VORTAC Jet Route #85 (Miami, Fla., to the U.S.-Canadian Border.)
46. VOR VORTAC Jet Route #87 (Houston, Tex., to Northbrook, Ill.)
47. VOR VORTAC Jet Route #89 (Northbrook, Ill., to Miami, Fla.)
48. Control 1150 (West Palm Beach, Fla., to Wilmington, N.C.)
49. VOR/VORTAC Jet Route #90 (Seattle, Wash., to Chicago, Ill.)
50. VOR/VORTAC Jet Route #95 (Idlewild, N.Y., to U.S.-Canadian Border) Eff. 28 July 60.

AREAS

1. That area 20 n mi either side of a line from Des Moines, Iowa VOR; intersection of Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.
2. Duluth, Minnesota to the U.S.-Canadian Border via the Duluth 047° M radial(direct route between Duluth & Lakehead, Canada.)
3. Spokane, Washington to the U.S.-Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)
4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif., 208° M radials; thence via the Long Beach, Calif 208° M radial(Control Area Extension 1177) for a distance of 180 n mi.
5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif 236° M radial (Control Area Extension 1316) for a distance of 180 n mi.
6. Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 n mi.
7. Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 n mi.
8. Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial(Control Area Extension 1173 over Francis Intersection) for a distance of 150 n mi.
9. Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 n mi.
10. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 n mi.
11. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 n mi.
12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 n mi.
13. Honolulu, Hawaii VOR: thence via the Honolulu, Hawaii 250° M radial for a distance of 87 n mi.
14. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 n mi.
15. Honolulu, Hawaii VOR: thence via the Honolulu, Hawaii 168° M radial for a distance of 99 n mi.
16. Honolulu, Hawaii LFR; thence NW via Red Airway 87 to a point 40 nmi NW of Port Allen Fix;
17. Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.
18. Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 n mi (boundary of the Miami Oceanic Control Area)
19. Seattle, Washington VOR to the U.S.-Canadian Border via the Seattle VOR direct. radial to the Victoria (Patricia Bay), B.C., Canada RR.
20. Wolbach, Nebraska VOR; direct to Pawnee City, Nebraska VOR.
21. Boston, Mass., Terminal Area-- That area within 20 nmi to either side of J-16-V between Albany, N.Y., & Boston, Mass.
22. New York City, N.Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Bridgeport, Conn. Int. via Poughkeepsie, N.Y., VOR to Albany, N.Y., VOR.
    b. Idlewild, N.Y., VORTAC via Huguenot, N.Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.
23. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOF Baltimore, Md., Terminal Area--
    a. That area within 20 nmi from the sides and within the triangle formed by a direct course from the Baltimore, Md., VOR to the Idlewild, N.Y., VOR to the Salisbury, Md., VOR; to the Baltimore, Md., VOR.
    b. That area within 20 nmi to either side of the center line of Control Area Extension 1148.
24. St. Louis, Mo., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Int. of J-80-V & Terre Haute, Ind., 268° M radial; via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
    b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
    c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.
    d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
    e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.
25. Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
    b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
    c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 265° M radial; to Int. of Palmdale, Calif., 265° M radial and J-1-V.
    d. Los Angeles, Calif., VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 336° M radial and J-1-V
    e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.
26. Oakland, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. San Francisco, Calif., VOR via V-199 to Red Bluff, Calif., VOR.
    b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
    c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.
27. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
    b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
    c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.
    d. Dallas, Tex., VOR via the Int. of the Dallas VOR 230° and the Waco, Tex., VOR 344° M radials; to the Waco, Tex., VOR.
    e. Dallas, Tex., VOR via the Int. of the Dallas VOR 178° and the Waco, Tex., VOR 028° M radials; to the Waco, Tex., VOR.
28. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
    b. Spartanburg, S.C., VOR via V-20-N to Norcross, Ga., VOR.
    c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S.C., VOR.

(Continued)

29 Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.
b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne Bay, Fla., VOR.
c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR

30. Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S. Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.

31 Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V
d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

32 From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi--bndry of the Havana, Cuba Ctl Area.

33. Houston, Tex., Terminal Area--That area within 20 nmi to either side of a direct crs from the:
a. Houston, Tex., VOR via the Int of the Houston 036° and the Lake Charles, La, 265° M radials to the Lake Charles VOR (V-222N).
b. Houston, Tex., VOR via the Int of the Houston VOR 082° and the Lake Charles, La., VOR 233° M radials to the Lake Charles VOR (V20S).
c. Houston, Tex., VOR via the Int of the Houston VOR 315° and the Leona, Tex., VOR 162° M radials; to the Leona, Tex., VOR.
d. Houston, Tex., VOR via the Int of the Houston VOR 345° and the Leona, Tex., VOR 132° M radials; to the Leona, Tex., VOR.

34 San Antonio, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Antonio, Tex., VOR via the Int of the San Antonio VOR 048° and the Austin, Tex., VOR 166° M radials to the Austin, Tex., VOR.
b. San Antonio, Tex., VOR via the Int of the San Antonio VOR 353° and the Austin, Tex., VOR 248° M radials; to the Austin, Tex., VOR.

35 New Orleans, La., Terminal Area-- That area within 20 nmi to either side of a direct course from the:
a. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 320° and the Alexandria, La., VOR 098° M radials; to the Alexandria, La., VOR. (Overlies V-114-N.)
b. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 030° and the McComb, Miss., VOR 142° M radials; to the McComb, Miss., VOR. (Overlies V-9-E).
c. McComb, Miss., VOR to the Int. of the McComb, Miss., VOR 222° and the New Orleans, La., VOR 320° M radials. (Overlies V-194).
d. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 094° and the Mobile, Ala., VOR 219° M radials; to the Mobile, Ala., VOR. (Overlies V-240).
e. Mobile, Ala., VOR to the Int. of the Mobile, Ala., VOR 258° and the New Orleans La., VOR 030° M radials. (Overlies V-20-N.).
f. Alexandria, La., VOR to the Baton Rouge, La., VOR. (Overlies V-114).
g. Baton Rouge, La., VOR via the Int. of the Baton Rouge, La., VOR 126° and the New Orleans, La., VOR 269° M radials; to the New Orleans, La., VOR.

36 **Tampa, Fla., Terminal Area - That area within 20 nmi to either side of a direct course from the:**
1. St. Petersburg, Florida VOR direct to the Orlando, Fla., VOR. (Overlies V-152).
2. St. Petersburg, Fla., VOR via the Int. of the St. Petersburg, Fla., VOR 038° and the Orlando, Fla., VOR 257° M radials; to the Orlando, Fla., VOR. (Overlies V152N).
3. St. Petersburg, Fla., VOR via the Lakeland, Fla., VOR; to the Orlando, Fla., VOR. (Overlies V-152S).

37 **From the St. Petersburg, Fla., VOR to the Int. of the St. Petersburg, Fla., VOR 274° M radial with Control Area Extension 1226.**

(Continued)

38 From the Egmont Key, Fla., NDB via Control Area Extension 1226 to the Grand Isle, La, NDB.
39. From the Grand Isle, La., NDB via direct to the New Orleans, La., VOR.
40. From the Int. of J85-V and J41-V direct to the Egmont Key, Fla, NDB.
41 Green Federal Airway #1(From the Int. of G1 with U.S.-Canadian Border W of Millinocket, Me., to Int. of G1 with U.S.-Canadian Border NE of Millinocket, Me.)

AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60.23(A) of part 60 of the Civil Air Regulations has been granted to the Air Defense Command and they are conducting Interceptor Training against target acft without navigation lights at and above flight level 400 within the continental limits of the U.S.A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.

FREQUENCY CHANGE - 126.18 MC to 126.20 MC: FAA will change all existing 126.18 mc frequency assignments to 126.20 mc during the month of July 1960. The individual locations affected will be NOTAMED as the changes are accomplished. The military services have advised their commands to make the change not later than July 1, 1960.

VOR/DMET or TACAN EQUIPPED AIRCRAFT: The FAA has implemented new procedures and separation standards for the control of VOR DMET or TACAN equipped aircraft. In order that ATC can apply these standards, pilots of aircraft so equipped are requested to include the statement "TACAN (or DMET) Equipped" in the remarks section of their flight plan.

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight Information Manual Corrections." Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time.

LIST OF PERSONS NOT PERMITTED TO FLY TO OR OVER CUBA IN PRIVATE PLANES: On November 1, 1959, the Secretary of State, under the powers delegated to him by Presidential Proclamation 3004 and pursuant to the provisions of Section 215 of the Immigration and Nationality Act and regulations and rules prescribed thereunder, requested the Attorney General to prevent the departure of certain persons to or over Cuba in private aircraft. Pursuant to this request, the Commissioner of Immigration and Naturalization Service has served "Notice of Prevention of Departure" on the below-listed individuals.

Section 215 of the Immigration and Nationality Act provides that if a plane is used as an instrument for the illegal departure of a person from the United States contrary to such an order, the plane is subject to confiscation in addition to criminal penalties which may be imposed on the violator or persons who aid and abet violators.

The Service continues investigation of all illegal activities in the United States in connection with the present situation in Cuba. From time to time additions to the list may be made. In the meantime, if a person seeking to rent a plane is not well known to you or there is any doubt as to whether he is in any way connected with illegal Cuban activities, you are requested to call the nearest Immigration and Naturalization Service office for advice. You may also obtain this information from the Flight Information Center, Miami, Florida, telephone FRanklin 7-1495, which is operated by the Immigration and Naturalization Service.

Your cooperation in this matter will materially aid the Immigration and Naturalization Service in carrying out its mission and possibly save you the loss of an aircraft.

LIST OF NAMES - (NOTE: See additional names at end of list)

NAME	DATE OF BIRTH	PILOT'S LICENSE NO.
ALPIZAR-Perez, Evelio	11-27-39	Student S616495

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Stations, leased telephones services are provided to the nearest FAA station. One such service, entitled "Foreign Exchange" (FX), permits dialing a local number which will connect to the distant FSS at the cost of a local call. Another is "Interphones" a private line extension to the nearest FAA station and is normally located in the operations office at an airport where it is available to all pilots. Fixed base operators at the same airport may lease extension service on these lines for the convenience of pilots at the cost of a local telephone extension.

CUMULUS CLOUD RESEARCH PROJECT

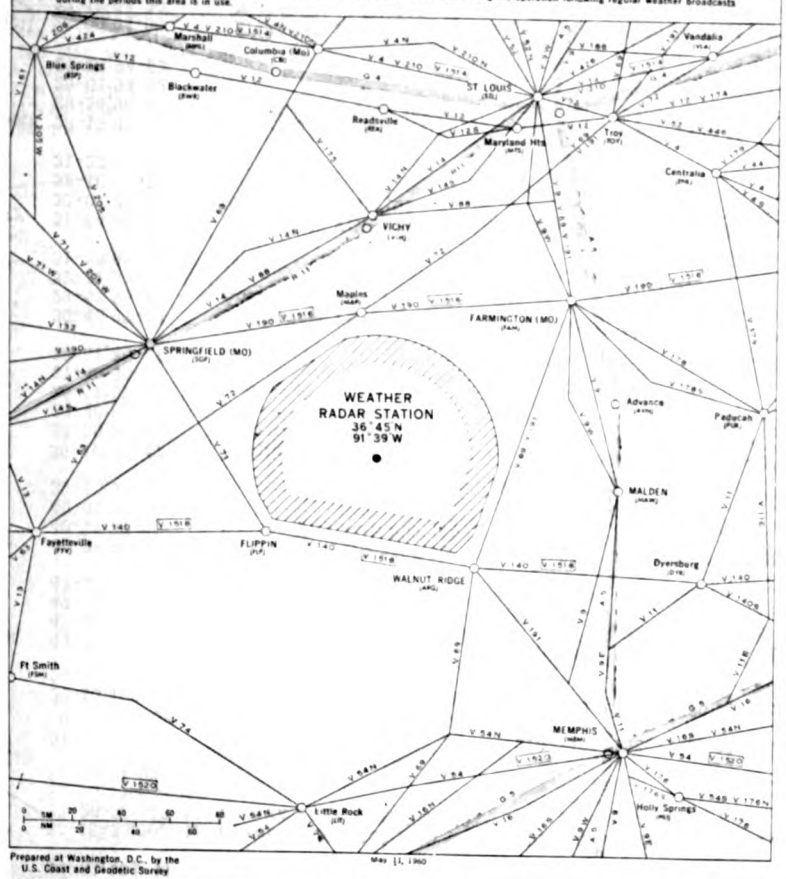
USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC TAC)
USAF jet aircraft have implemented, on a continuing basis, high altitude refueling

— SPECIAL NOTICE —

CUMULUS CLOUD RESEARCH PROJECT

EFFECTIVE MAY 15 THROUGH AUGUST 31 ANNUALLY

Beginning May 15 and ending August 31 all aerial cumulus cloud research operations will be restricted within a 50 statute mile radius of a designated point [illegible] Missouri at [illegible] N 91°39 W as indicated by the [illegible] circle.



All flight operations will be conducted [illegible] Two Cessna 172 aircraft will operate VFR [illegible] the area as indicated [illegible] between the [illegible] and [illegible] Base [illegible] will operate VFR [illegible] the area [illegible] feet MSL generally [illegible] feet MSL [illegible]

Flight operations will be conducted [illegible] during the seven and one half month period each year. Specific information concerning these operations will be disclosed by NOTAM [illegible] days the flights will be made.

Other aircraft proposing flight within the designated area may obtain current information concerning these operations from the following FAA facilities:

St Louis Mo FSS — Springfield Mo CS,T — Malden Mo FSS — [illegible] Ridge Ark FSS — Memphis Tenn ARTCC
Vichy Mo FSS — Farmington Mo FSS — Flippin Ark FSS — St Louis Mo ARTCC

The flight service stations listed above will broadcast appropriate information concerning the operation following regular weather broadcasts during the periods this area is in use.

NEW AIR TRAFFIC CONTROL ADVISORY SERVICE: IFR aircraft operating in accordance with an ATC authorized cruising level of VFR conditions-on-top are required by CAR 60.44 to be flown at the altitudes/flight levels specified in CAR 60.32 for VFR flight. Noncompliance by pilots with the cruising level requirements of CAR 60 compromises intended segregation between aircraft operating at VFR and IFR altitudes/flight levels. Beginning April 5, 1960, pilots of IFR aircraft operating in accordance with an air traffic control authorized cruising level of VFR conditions-on-top and reporting at an altitude/flight level incorrect for direction of flight will be advised by air traffic control facilities of the appropriate level/s for direction of flight. Controllers will provide this advisory service on a "workload permitting" basis. The provision, or lack of provision of this service should not be construed to relieve or diminish pilot responsibility for operation at the correct altitudes/flight levels for direction of flight.

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future. Effective date of changes (which are indicated by ✓) is July 31, 1960.

SECOND ANNUAL GENERAL AVIATION FLY-IN: All pilots are invited to attend the second annual general aviation "fly in" to be held October 1, 1960 at the Federal Aviation Agency's National Aviation Facilities Experimental Center at Atlantic City, New Jersey."

CAUTION-AIRCRAFT ARRESTING BARRIERS AT JOINT USE MILITARY/CIVIL AIRPORTS: Aircraft Arresting Barriers are installed at some joint use military/civil airports. Pilots, particularly those of the light propeller driven category of aircraft are advised to operate with caution while operating near or over a lowered barrier. Aircraft operations at minimum practical power settings and taxi speeds are recommended until clear of the arresting barrier system.

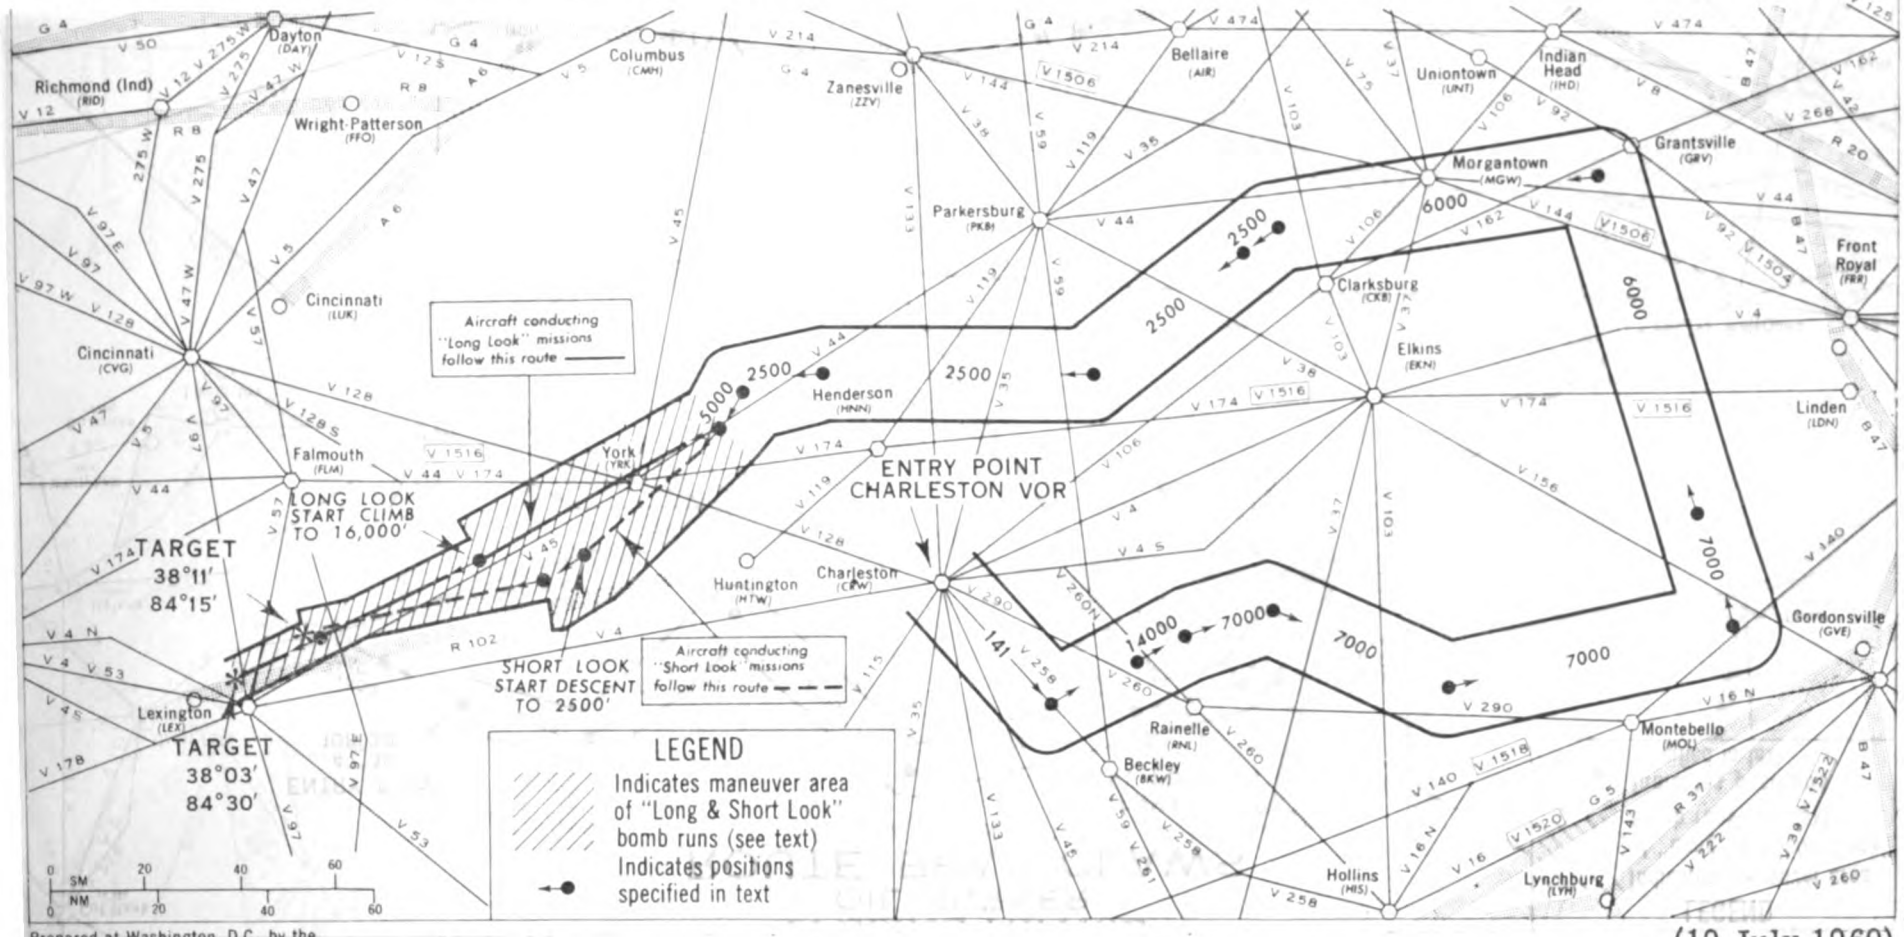
ILS SENSITIVITY ADJUSTMENTS: At a number of facilities in the United States, ILS localizer course width will be reduced from 5 degrees to 4 degrees in the near future. Individual facility NOTAM's will be published as these changes occur.

NAVIGATIONAL WARNING-USAF OPERATION "OIL BURNER". USAF (Strategic Air Command) is conducting low level navigational flights in jet aircraft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following pages, and at the alts specified therein. At the termination of the low level flights, the acft climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during times specified for each route.

(19 July 1860)

SPECIAL NOTICE
OIL BURNER

SPECIAL NOTICE



OIL BURNER
ROUTE GREEN VALLEY
EFFECTIVE July 31, 1960

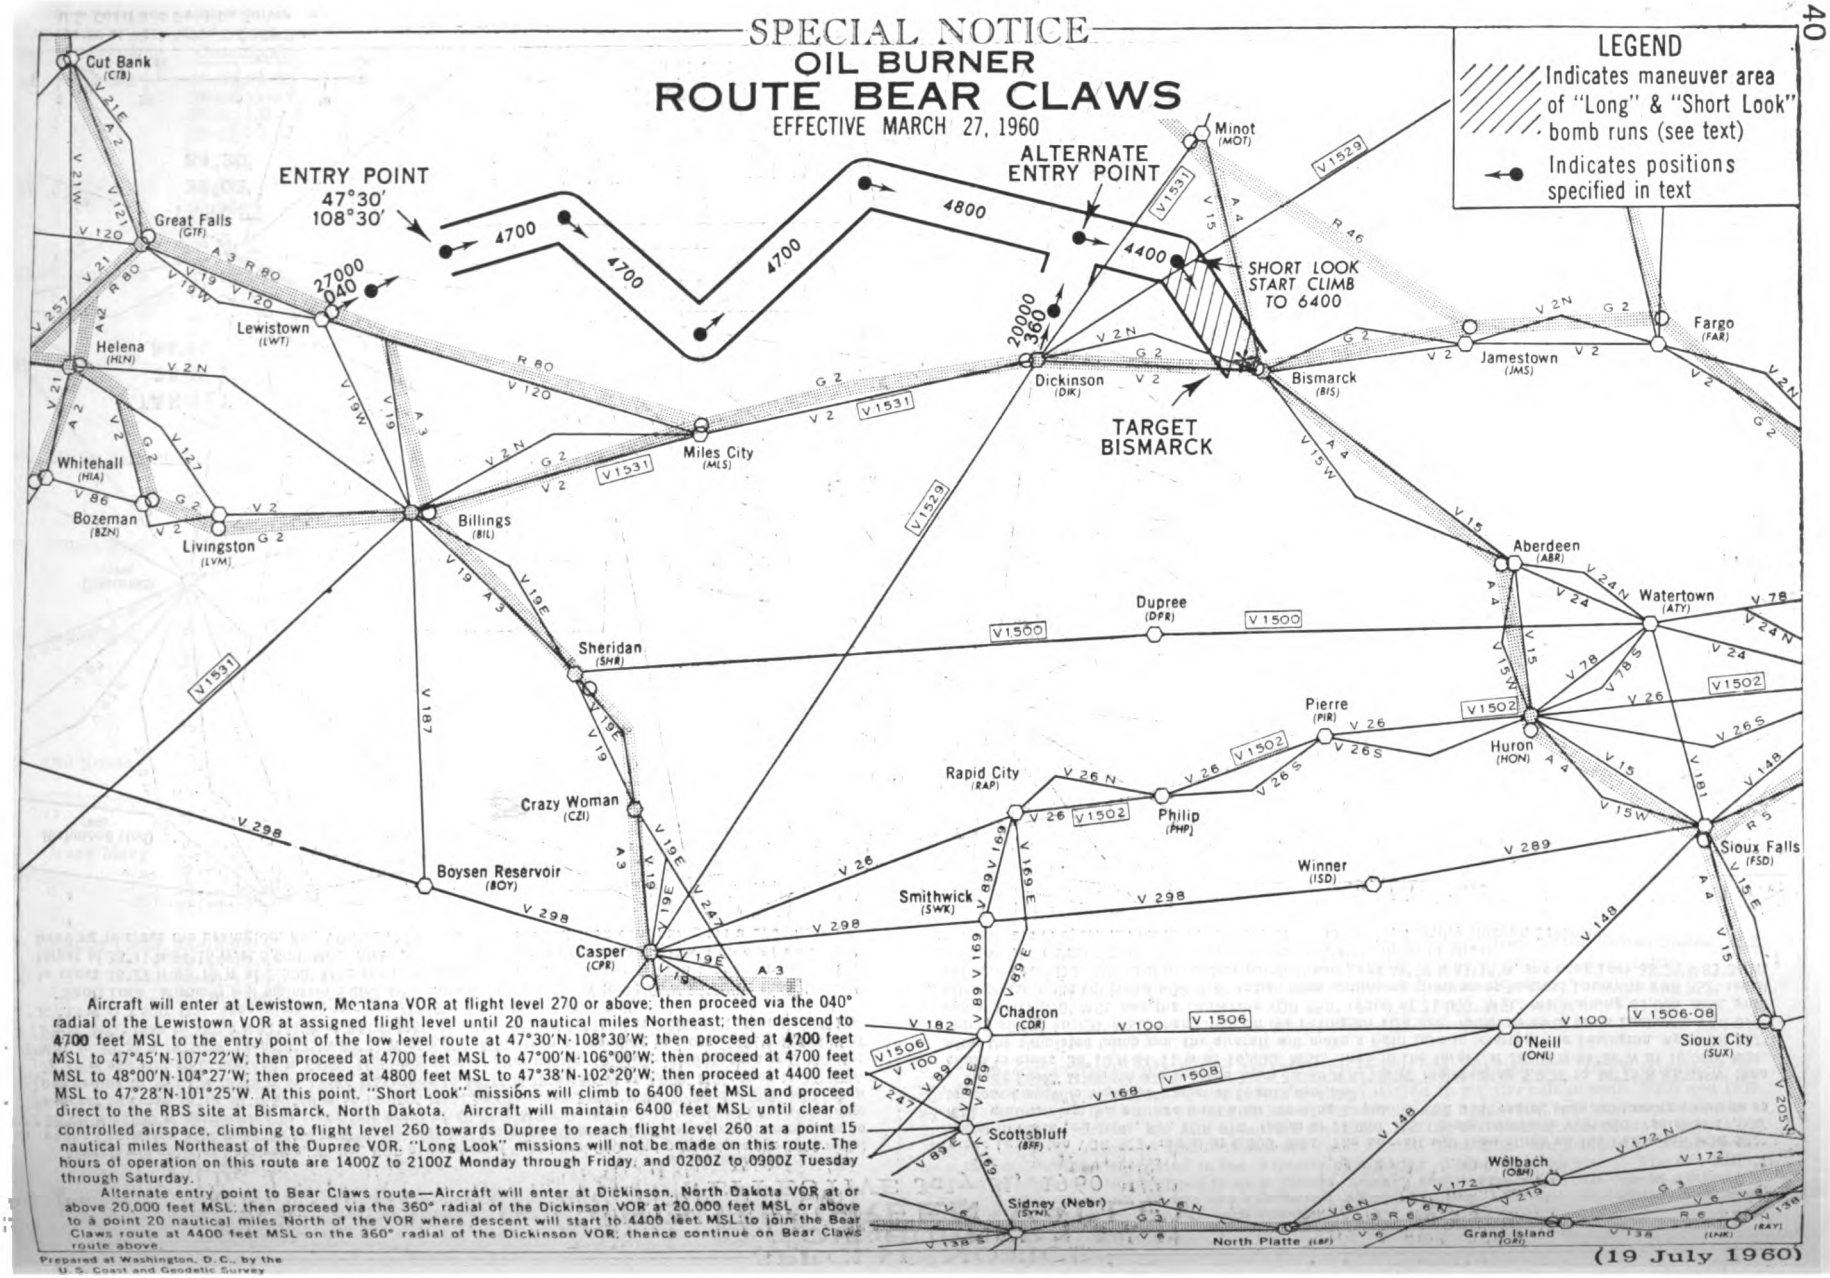
Aircraft will enter at Charleston, W. Va., VOR at or above Flight Level 240, and proceed via the 141° radial of the Charleston VOR to 37°59'N 81°22'W, maintaining assigned flight level to this point. Then proceed to 38°08'N 81°00'W descending to cross this point at 19,000' MSL or above. Aircraft will then continue descent to cross 38°12'30"N 80°49'W at 14,000' MSL, and to cross 38°16'N 80°30'W at 7,000' MSL, then proceeding to 38°01'N 79°49'W at 7,000' MSL, then to 38°11'N 78°41'30"W at 7,000' MSL, then to 38°32'N 78°49'W at 7,000' MSL, descend to 6,000' MSL immediately after passing 38°32'N 78°49'W, then at 6,000 feet MSL to 39°33'N 79°10'W, then 39°25'N 80°27'W at 6,000' MSL, then descending to cross 39°21'N 80°34'W at 2,500' MSL, then to 38°59'N 81°11'W at 2,500' MSL, then to 38°59'N 82°14'W at 2,500' MSL, then to 38°51'N 82°33'W at 2,500' MSL, then climbing to cross 38°49'N 82°38'W at 5,000' MSL.

"Short Look" Missions will maintain 5,000' MSL from 38°49'N 82°38'W to 38°26'N 83°09'W, then descend to cross 38°22'N 83°18'W at 2,500' MSL (end of navigation leg). Aircraft will then proceed to cross the target at 38°11'N 84°15'W at 5,000' MSL. After the simulated bomb run, the aircraft will proceed via a 270° heading to cross the Lexington, Ky., VOR 024° radial at 6,000' MSL, then continuing via a 270° heading, cross Lexington VOR 322° radial at 6,000' MSL. The aircraft will then climb on the Lexington VOR 322° radial to cross Louisville, Ky., VOR 070° radial at 11,000' MSL, cross Louisville VOR 050° radial at 17,000' MSL maintaining this altitude until after crossing Louisville VOR 018° radial, then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 280.

"Long Look" Missions will proceed from 38°49'N 82°38'W, maintaining 5,000' to 38°25'N 83°34'W, then climb to cross 38°10'N 84°11'W at 16,000' MSL, then to the target at 38°03'N 84°30'W at 16,000' MSL. After the simulated bomb run, the aircraft will make a right turn to intercept the Lexington, Ky., VOR 322° radial still at 16,000' MSL, then climb on the Lexington VOR 322° radial so as to cross Louisville VOR 070° radial at 17,000' MSL and the Louisville VOR 050° radial at 21,000' MSL maintaining 21,000' MSL until after crossing the Louisville VOR 018° radial, then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 310. At end of navigation points (Short Look 38°22'N 83°18'W, and Long Look 38°25'N 83°34'W) route widths reduced from 20 statute miles to 10 statute miles to target.

The hours of operation on this route are 0100Z to 1300Z, Tuesday through Saturday.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey



(19 July 1960)

SPECIAL NOTICE

OIL BURNER

ROUTE BEAR CLAWS

EFFECTIVE MARCH 27, 1960

Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast; then descend to 4700 feet MSL to the entry point of the low level route at 47°30'N-108°30'W; then proceed at 4700 feet MSL to 47°45'N-107°22'W; then proceed at 4700 feet MSL to 47°00'N-106°00'W; then proceed at 4700 feet MSL to 48°00'N-104°27'W; then proceed at 4800 feet MSL to 47°38'N-102°20'W; then proceed at 4400 feet MSL to 47°28'N-101°25'W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL; then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above.

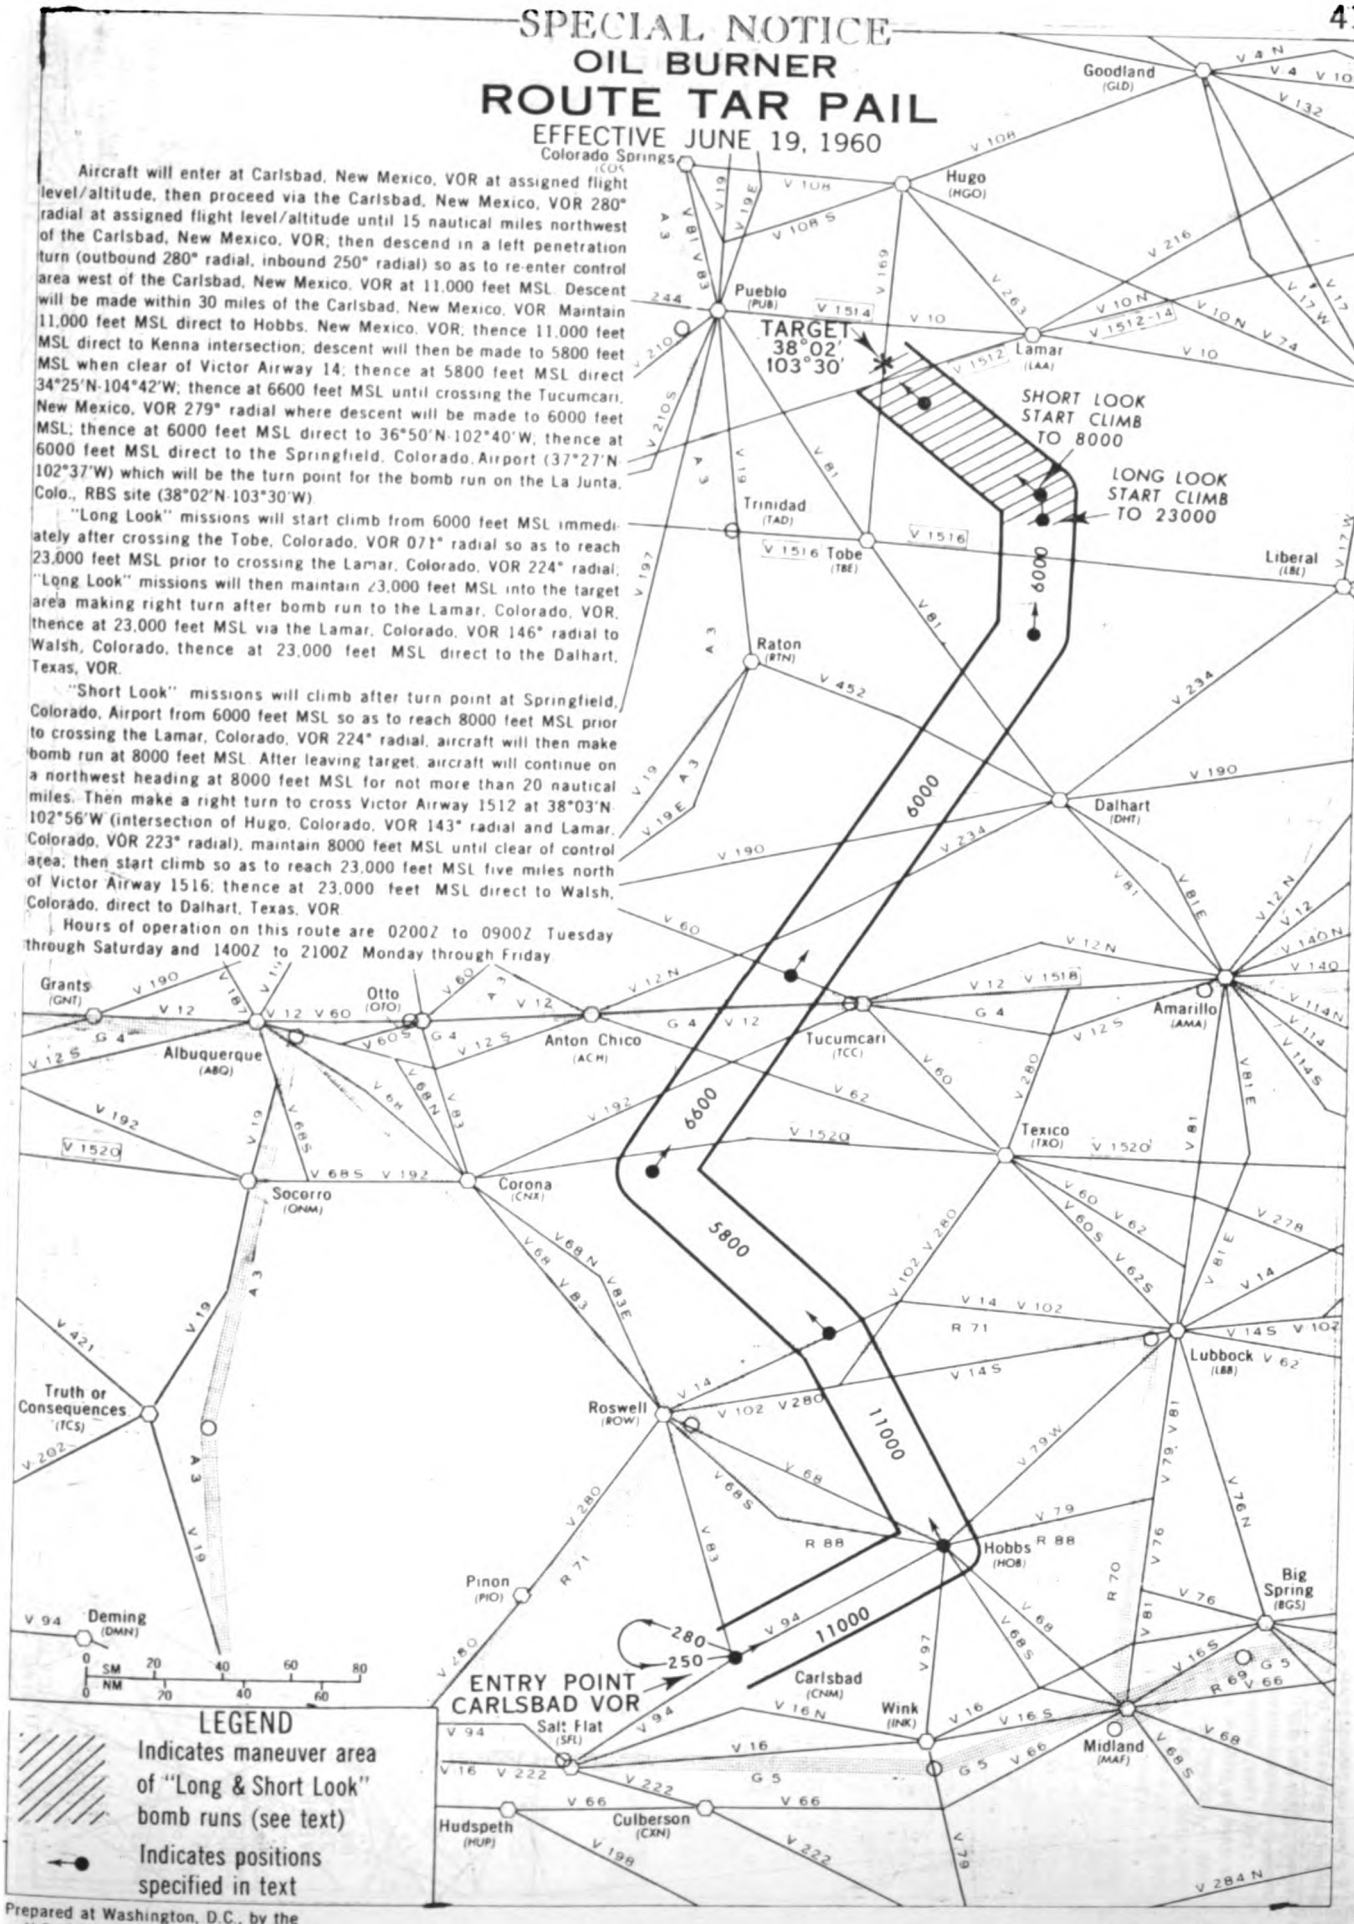
(19 July 1960)

SPECIAL NOTICE

OIL BURNER

ROUTE TAR PAIL



EFFECTIVE JUNE 19, 1960

Aircraft will enter at Carlsbad, New Mexico, VOR at assigned flight level/altitude, then proceed via the Carlsbad, New Mexico, VOR 280° radial at assigned flight level/altitude until 15 nautical miles northwest of the Carlsbad, New Mexico, VOR; then descend in a left penetration turn (outbound 280° radial, inbound 250° radial) so as to re-enter control area west of the Carlsbad, New Mexico, VOR at 11,000 feet MSL. Descent will be made within 30 miles of the Carlsbad, New Mexico, VOR. Maintain 11,000 feet MSL direct to Hobbs, New Mexico, VOR; thence 11,000 feet MSL direct to Kenna intersection; descent will then be made to 5800 feet MSL when clear of Victor Airway 14; thence at 5800 feet MSL direct 34°25'N-104°42'W; thence at 6600 feet MSL until crossing the Tucumcari, New Mexico, VOR 279° radial where descent will be made to 6000 feet MSL; thence at 6000 feet MSL direct to 36°50'N-102°40'W; thence at 6000 feet MSL direct to the Springfield, Colorado, Airport (37°27'N-102°37'W) which will be the turn point for the bomb run on the La Junta, Colo., RBS site (38°02'N-103°30'W).

"Long Look" missions will start climb from 6000 feet MSL immediately after crossing the Tobe, Colorado, VOR 071° radial so as to reach 23,000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial. "Long Look" missions will then maintain 23,000 feet MSL into the target area making right turn after bomb run to the Lamar, Colorado, VOR, thence at 23,000 feet MSL via the Lamar, Colorado, VOR 146° radial to Walsh, Colorado, thence at 23,000 feet MSL direct to the Dalhart, Texas, VOR.

"Short Look" missions will climb after turn point at Springfield, Colorado, Airport from 6000 feet MSL so as to reach 8000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial, aircraft will then make bomb run at 8000 feet MSL. After leaving target, aircraft will continue on a northwest heading at 8000 feet MSL for not more than 20 nautical miles. Then make a right turn to cross Victor Airway 1512 at 38°03'N-102°56'W (intersection of Hugo, Colorado, VOR 143° radial and Lamar, Colorado, VOR 223° radial), maintain 8000 feet MSL until clear of control area; then start climb so as to reach 23,000 feet MSL five miles north of Victor Airway 1516; thence at 23,000 feet MSL direct to Walsh, Colorado, direct to Dalhart, Texas, VOR.

Hours of operation on this route are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

EFFECTIVE MAY 8, 1960

LEGEND

Indicates maneuver area of "Long" & "Short Look" bomb runs (see text)

Indicates positions specified in text.

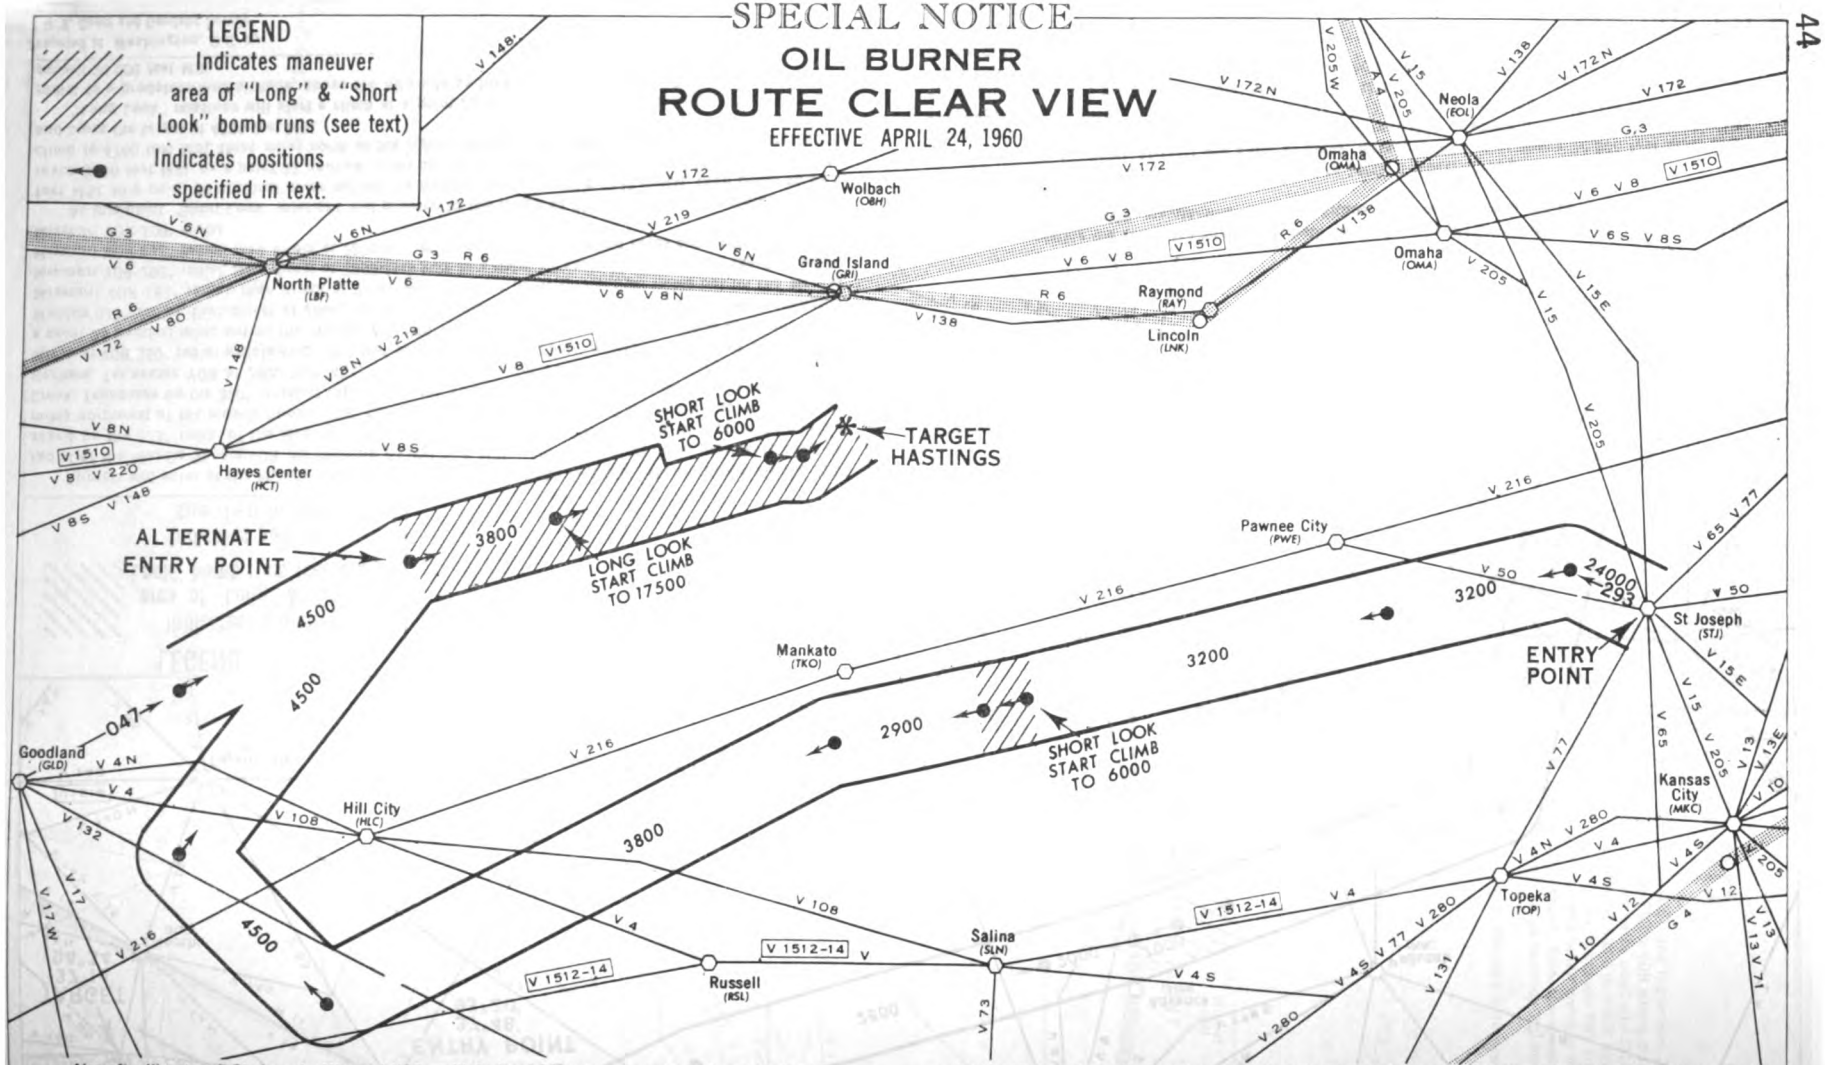
Aircraft will enter at the Muscle Shoals, Alabama VOR at 23,000 feet MSL; then proceed via the 323° radial of the Muscle Shoals VOR maintaining 23,000 feet MSL until 15 nautical miles northwest; then descend on the 323° radial of the Muscle Shoals VOR so as to reach 4,000 feet MSL at a point 47 nautical miles northwest of the Muscle Shoals VOR; then proceed direct to a point 49 nautical miles north of Jacks Creek, Tennessee on the 360° radial of the Jacks Creek VOR descending so as to cross the 234° radial of the Graham, Tennessee VOR at 2000 feet MSL; then direct to a point 21 nautical miles North on the Malden, Missouri VOR 350° radial maintaining 2000 feet MSL with a "Short Look" mission at 4700 feet MSL between a point 24 nautical miles out on the Malden VOR 049° radial and another point 19 nautical miles out on the Malden 019° radial; then direct at 2000 feet MSL to a point 41 nautical miles South on the Farmington, Missouri VOR 182° radial; then direct at 2800 feet MSL to a point 17 nautical miles out on the Maples, Missouri VOR 200° radial; then direct at 2900 feet MSL to a point 27 nautical miles out on the Springfield, Missouri VOR 352° radial; then direct at 2800 feet MSL to a point 25 nautical miles out on the Springfield, Missouri VOR 300° radial.

At this point "Short Look" missions will proceed to the target at 37°14'N-94°34'W, maintaining 2800 feet MSL to a point 38 nautical miles out on the Neosho, Missouri VOR 013° radial, then climb so as to reach 3500 feet MSL by a point 32 nautical miles out on the Neosho, Missouri VOR 004° radial, to start a climb to 4700 feet MSL three miles north of the Joplin, Missouri low frequency beacon (Waco intersection) and cross the target at 4700 feet MSL.

"Long Look" missions will start a climb at a point 25 nautical miles out on the Springfield VOR 300° radial to a predetermined altitude, above the RBS site as filed in the flight plan. This altitude will never exceed 20,000 feet MSL.

After completing the simulated bomb runs, both "Short Look" and "Long Look" missions will proceed to Bartlesville, Oklahoma VOR, maintaining bombing altitude. Normally aircraft will be routed by ATC via the Tulsa, Oklahoma VOR.

The hours of operation on this route are 0200Z to 1400Z Tuesday through Saturday.



Alternate Entry Point-Aircraft will enter at Vichy, Missouri, VOR at or above 20,000 feet MSL, then proceed via the 249° radial of the Vichy VOR at 20,000 feet MSL or above to a point 15 nautical miles southwest of Vichy VOR where descent will start to 2,800 feet MSL, reaching 2,800 feet MSL at a point 46 nautical miles out on the 034° radial of the Springfield, Missouri, VOR thence via the 249° radial of Vichy VOR to a point 27 nautical miles out on the 352° radial of the Springfield VOR at 37°48'30"N-93°20'W thence continue on Flat Rock route.

U. S. Coast and Geodetic Survey

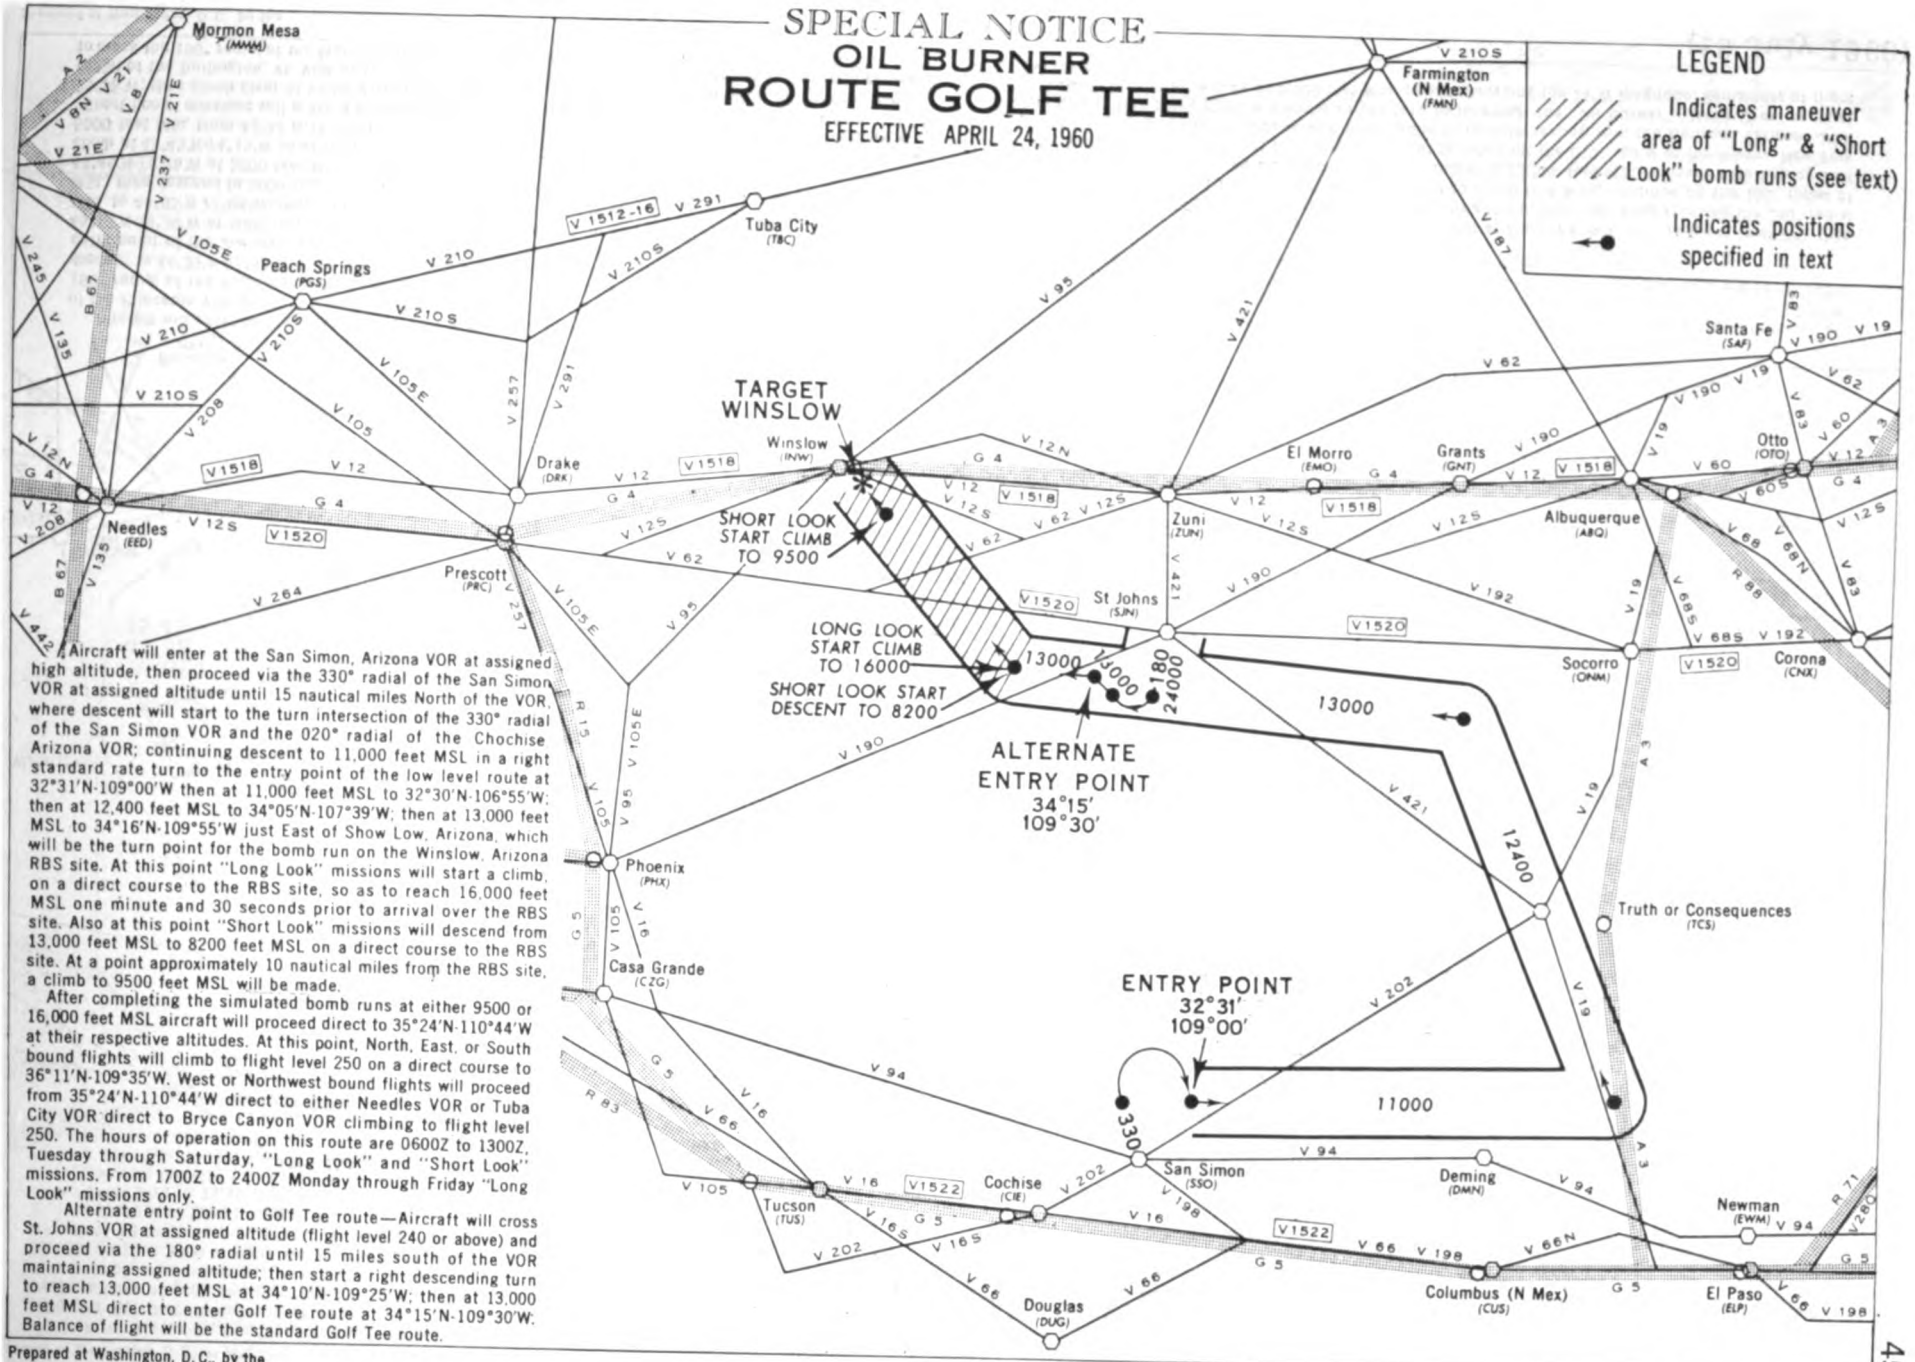
SPECIAL NOTICE

OIL BURNER
ROUTE CLEAR VIEW

EFFECTIVE APRIL 24, 1960

Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above; then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W, then proceed direct to 39°43'N-97°30'W, then climb to 6000 feet MSL for a "Short Look" mission at 39°41'N-97°41'W; then descend to 2900 feet MSL direct to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL; then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes; then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL; then maintain 20,000 feet MSL direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR. "Short Look" missions, after passing the RBS site, will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial; then proceed direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center. The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.

Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL; then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route.



Prepared at Washington, D. C., by the U. S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER
ROUTE GOLF TEE

EFFECTIVE APRIL 24, 1960

Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Chochise Arizona VOR; continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31'N-109°00'W then at 11,000 feet MSL to 32°30'N-106°55'W; then at 12,400 feet MSL to 34°05'N-107°39'W; then at 13,000 feet MSL to 34°16'N-109°55'W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs at either 9500 or 16,000 feet MSL aircraft will proceed direct to 35°24'N-110°44'W at their respective altitudes. At this point, North, East, or South bound flights will climb to flight level 250 on a direct course to 36°11'N-109°35'W. West or Northwest bound flights will proceed from 35°24'N-110°44'W direct to either Needles VOR or Tuba City VOR direct to Bryce Canyon VOR climbing to flight level 250. The hours of operation on this route are 0600Z to 1300Z, Tuesday through Saturday, "Long Look" and "Short Look" missions. From 1700Z to 2400Z Monday through Friday "Long Look" missions only.

Alternate entry point to Golf Tee route—Aircraft will cross St. Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude; then start a right descending turn to reach 13,000 feet MSL at 34°10'N-109°25'W; then at 13,000 feet MSL direct to enter Golf Tee route at 34°15'N-109°30'W. Balance of flight will be the standard Golf Tee route.

OIL BURNER
ROUTE HANG OVER

EFFECTIVE JULY 17, 1960

Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08′N-67°39′W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56′N-67°36′W at or above 20,000 feet MSL; then continuing descent to 44°39′N-67°32′W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44′N-67°07′W; then to 45°19′N-67°49′W at 5000 feet MSL; then to 45°16′N-69°30′W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08′N-71°09′W; then climb to 7000 feet MSL to 44°03′N-72°04′W; then to 43°42′N-73°12′W at 7000 feet MSL; then to 43°45′N-73°45′W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44′N-74°07′W; then to 43°45′N-74°15′W at 5000 feet MSL; then to 43°46′N-74°25′W at 5000 feet MSL; then to the RBS site at 43°58′N-75°43′W. "Long Look" missions will start climb at 43°45′N-74°15′W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45′N-74°15′W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial of the Burlington VOR to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL, turn right to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday, and 0000Z-0630Z Tuesday through Saturday.

Alternate entry to "Hang Over" route – Aircraft will enter at Massena, N.Y. VOR at flight level 290, then proceed via the 160° radial of the Massena VOR maintaining flight level 290, after crossing the 280° radial of the Burlington, Vermont VOR descent will be started to 5,000 feet MSL; continue on the 160° radial of the Massena VOR and cross the Burlington VOR 267° radial at 23,500 feet MSL, cross the Burlington VOR 250° radial at 14,500 feet MSL; at this point turn right to intercept the 010° radial of the Albany, New York VOR; continue descent on the Albany VOR 010° radial to its intersection with the Benson, Vermont VOR 287° radial; at this point make a standard right turn to intercept the "Oil Burner" "Hang Over" route at 43°46′N-74°25′W. Aircraft will be at 5,000 feet MSL prior to crossing the 74°W longitude. Remainder of flight via the "Hang Over" route.

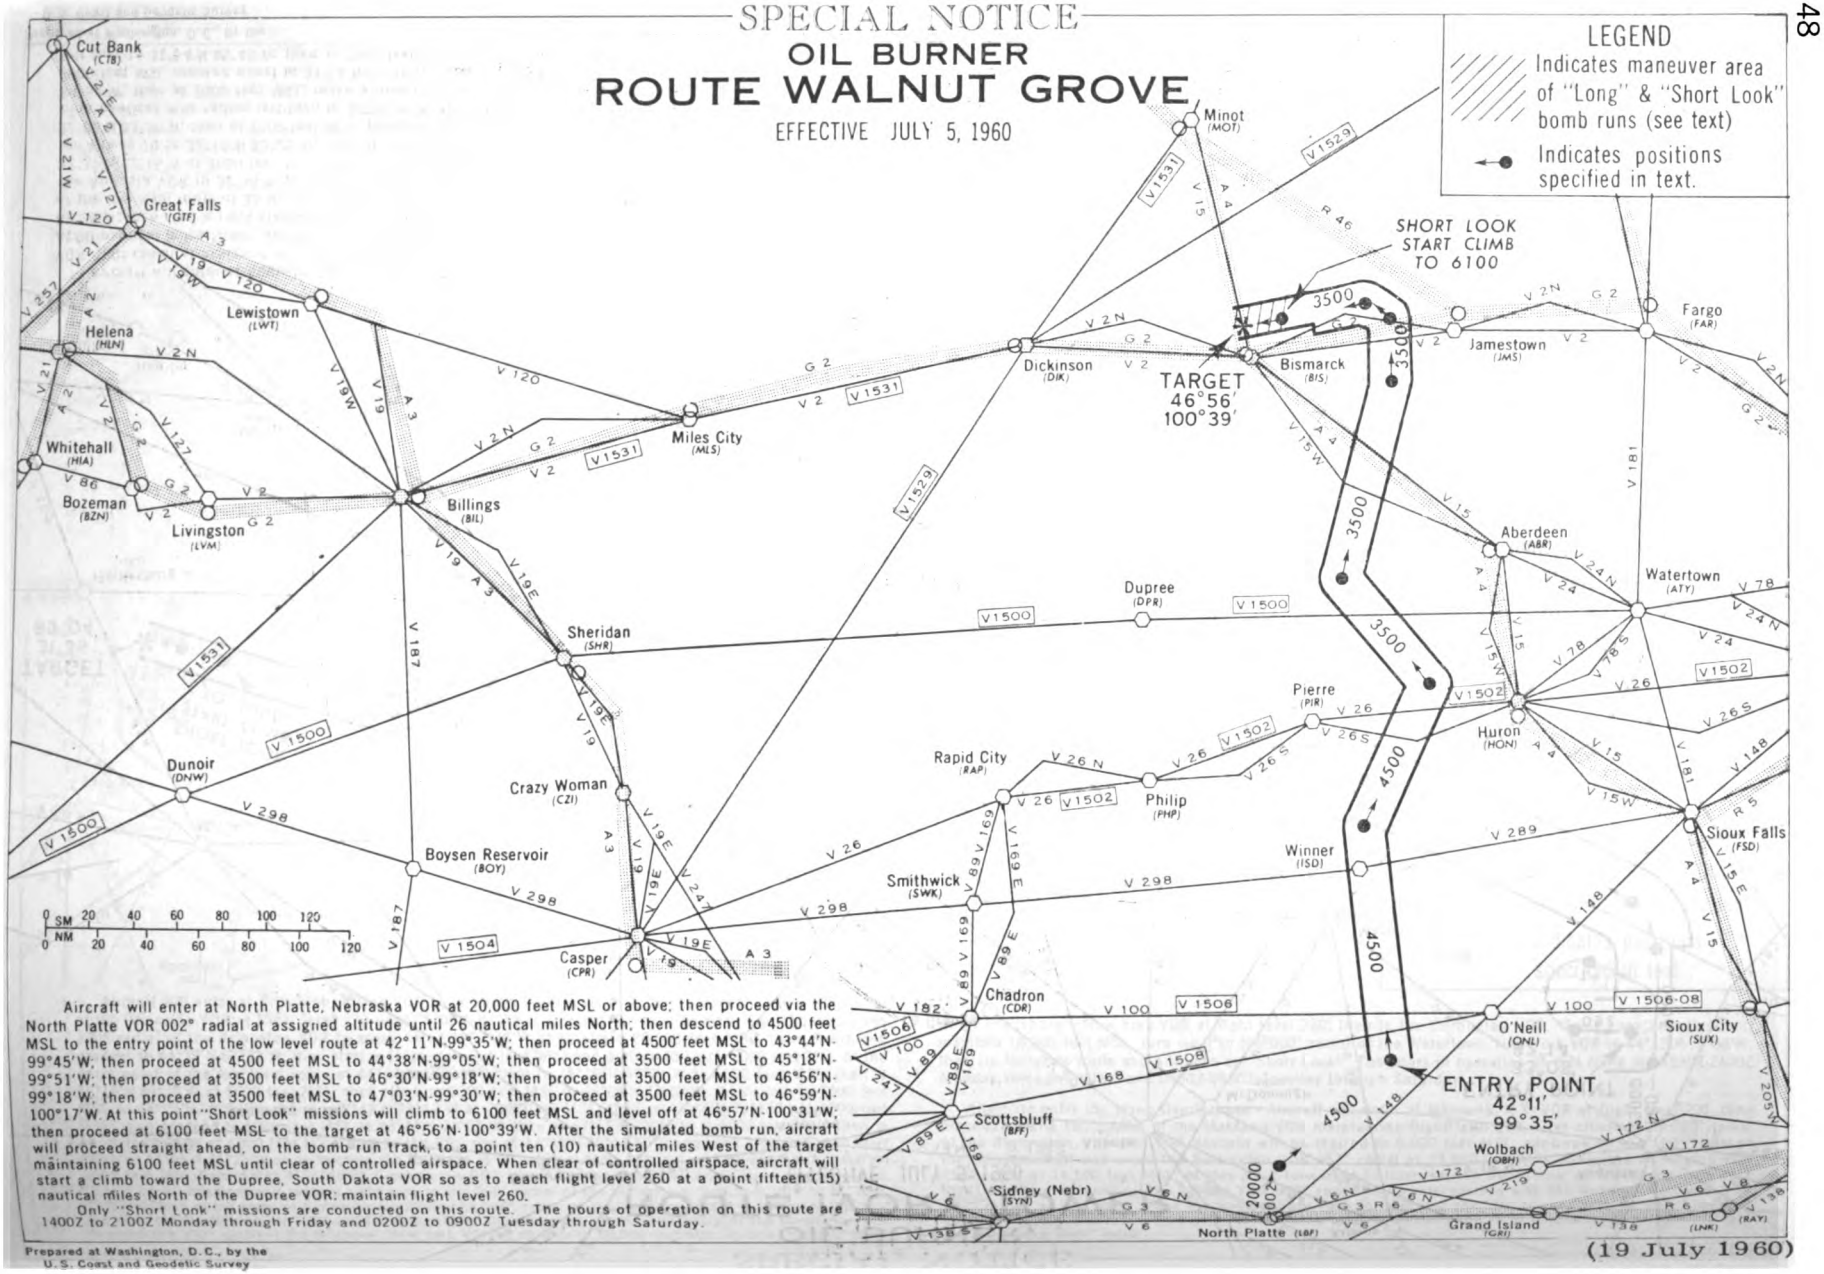
ROUTE IVORY TOWER

EFFECTIVE JULY 5, 1960

Aircraft will enter at Augusta, Georgia VOR at 23,000 feet MSL or above, then proceed via the Augusta VOR 180° radial at assigned altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49'N-82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N-82°30'W to the entry point of the low level route at 33°05'N-82°14'W, and at 2000 feet MSL, turn right to intercept the 180° radial of the Augusta VOR to 32°46'N-82°08'W. Aircraft will then make a nine nautical mile radius right turn to 32°35'N-82°16'W at 2000 feet MSL; then proceed at 2000 feet MSL Southwest along the South edge of Victor Airway 70 to 32°10'N-83°25'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 32°09'N-83°30'W; then at 2000 feet MSL, proceed direct to 32°09'N-84°25'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 32°07'N-84°32'W, then at 2000 feet MSL proceed direct to 31°53'N-84°54'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 31°51'N-85°01'W, then at 2000 feet MSL proceed direct to 31°54'N-85°46'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 31°54'N-85°49'W; then at 2000 feet MSL proceed direct to 31°34'N-87°18'W; then at 2000 feet MSL make a nine nautical mile radius right turn to 31°36'N-87°28'W; then at 2000 feet MSL proceed direct to 31°53'N-87°46'W; then at 2000 feet MSL make a nine nautical mile radius left turn to 31°55'N-87°55'W; then proceed at 2000 feet MSL to 31°43'N-88°43'W. At this point, "Short Look" missions will start a climb so as to reach 5000 feet MSL at 31°39'N-88°55'W; then at 5000 feet MSL proceed direct to the target at 31°36'N-89°04'W.

After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, and climb to 6000 feet MSL. Upon reaching 6000 feet MSL, aircraft will make a right turn to a true course of 106° and maintain 6000 feet MSL until past the 180° radial of the Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding direct to the intersection of the McComb, Mississippi VOR 068° radial and the Meridian VOR 160° radial; then continue climbing in a non-standard, one minute holding pattern (making all turns to the left) Southwest of the intersection on the 068° radial of the McComb VOR.



Only "Short Look" missions are conducted on this route. The hours of operation on this route are 2000Z to 2400Z Monday through Friday, and 0000Z to 0800Z Tuesday through Saturday.

Aircraft will enter at the Traverse City, Michigan VOR at 23,000 feet MSL or above as assigned by the Detroit Center. Maintain assigned altitude to a point 31 nautical miles out on the 360° radial of the Traverse City VOR, then descend to 2200 feet MSL direct to 46°01'N 85°37'W, maintain 2200 feet MSL direct to 46°41'N 85°38'W, then proceed at 1700 feet MSL direct to Manitou Is (47°25'N 87°35'W), then proceed at 2500 feet MSL direct to Cumberland Pt. (47°52'N 89°16'W), then proceed at 3000 feet MSL direct to Tom Lake (47°56'N 90°04'W), then proceed at 3000 feet MSL direct to 47°25'N 91°05'W, then proceed at 2000 feet MSL direct to Bark Pt. (46°53'N 91°11'W), then proceed at 2800 feet MSL direct to 45°55'N 91°42'W, then proceed at 2900 feet MSL to 45°32'N 91°02'W, maintain 2900 feet MSL to Short Look start climb point at 46°18'N 90°18'W. At this point start climb to Short Look bomb altitude of 6000 feet MSL reaching 6000 feet MSL at 46°21'N 90°15'W. Target located at 46°24'N 90°14'W. After bombs away maintain 6000 feet MSL and bomb run heading to 46°49'N 89°48'W. At this point start climb to 22,000 feet MSL maintaining bomb run heading until intersecting the 270° radial of Houghton, Michigan, VOR, then proceed inbound to Houghton, Michigan via the 270° radial of Houghton, Michigan, crossing the Houghton, Michigan, VOR at 22,000 feet, contact Detroit ARTCC for further clearance.

Route width reduced to 5 statute miles either side of center line from Cumberland Pt. to Tom Lake, and on the south side only from Tom Lake to 47°25'N 91°05'W, and on both sides from 46°05'N 90°31'W to target.

Hours of operation are 2000Z to 1000Z Monday through Saturday.

Alternate Entry to Iron Man route. Aircraft will cross the Eau Claire, Wisconsin, VOR at 23,000 or below, descending to 2900 MSL on the 022° radial of Eau Claire, Wisconsin, VOR to join the "Iron Man" route at 2900 MSL at 45°32'N 91°02'W, then continue on "Iron Man" route.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(19 July 1960)

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by the USAF when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 43-22-30N, 94-04-00W, (entry-call Mason City Radio), 43-28N, 91-00W, 42-21N, 90-54-30W; 40-25N, 92-07-30W; 40-22N, 92-31W(end nav. leg) to target 40-14N, 93-36W. Note: for a bomb run only, entry reporting will be 41-00N, 91-45W(call Ottumwa Radio); remainder of route is identical with above.

Route 2-M-1: Start at 31-45N, 91-49W (entry-call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N, 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg). 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N, 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-R-2: Start at 35-38N, 99-11W; to start climb point 36-12N, 98-14W; to termination 36-45N, 98-11W. Entry reporting point- Sayre Radio.

Route 2-R-3: Start at 36-22N, 92-14W; to 36-26N, 93-50W. Entry reporting point-Springfield Radio.

Route 2-S-1: Start at 29-29, 91-46, (entry reporting point-Baton Rouge VOR); to turning point 28-00, 91-30; to turning point 27-00, 92-30; to turning point 27-50, 94-00; to navigation termination point, bomb run entry point, and LONG LOOK start climb (if applicable) 27-50, 95-45; to SHORT LOOK start climb (if applicable) 28-11, 96-34; to target at Matagorda Island 28-13-30, 96-39-00. After bombs away, proceed to 28-21-30, 96-42-00, then right turn to Palacios VOR. On SHORT LOOK mission do not exceed 5000' MSL until past Port O'Connor, Texas. On LONG LOOK do not descend below 18,000' MSL until past Port O'Connor, Texas.

Route 2-T-1: Start at 42-00N, 96-12W; to target 42-51N, 97-29W. (Entry reporting point-Sioux City Radio).

Route 2-T-2: Start at 42-30N, 97-49W to target 41-26.5N, 96-36W. (Entry reporting point Point-O'Neil Radio).

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N, 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15 - A - 3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-D-3: Start descent at Hudspeth VOR, Texas to start low level point at 31-08N, 105-10W to start climb at 30-48N, 104-46W to target at 30-18N, 104-02W.

Route 15-E-1: Start descent 44-28N, 100-40W, entry point 44-34 1/2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1/2N, 103-36W.

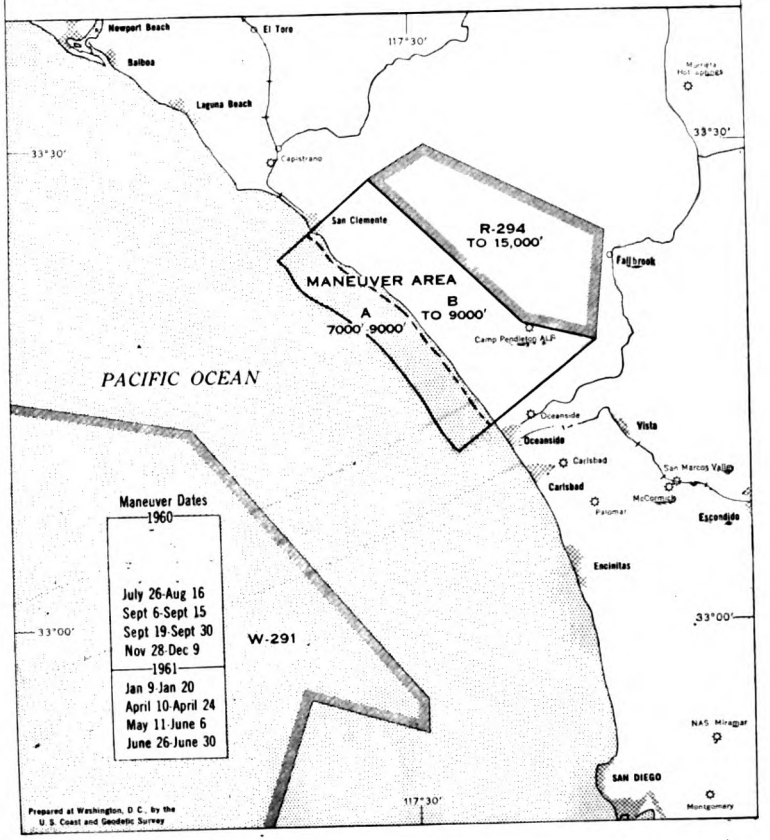
Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-G-1: Cross Ukiah, California VOR at flight altitude (entry point) - (Call Ukiah Radio), descend to start low level 39-06N, 124-17W to 39-08N, 124-45W; 40-24N, 125-29W; 42-20N, 125-35W; 43-08N, 126-00W to climb point 43-32N, 124-48W to start climb for Long Look at 43-43N, 124-17W or to start climb for Short Look at 43-54N, 123-20W to target 43-58N, 123-05W, S of Eugene, Oregon.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.

Route 15-M-2: 36-18 1/2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.



Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

SPECIAL NOTICE

CALIFORNIA
OCEANSIDE
MARINE CORPS MANEUVER AREA

Maneuvers, including air support to Marine Corps landing exercises are being conducted in the charted area. Pilots should contact Oceanside, San Diego, Thermal, Long Beach, Ontario and Los Angeles FSS for information pertaining to air activity during daylight hours on the maneuver dates.

INDIANAPOLIS/ST LOUIS CENTERS FLIGHT ADVISORY AND CONTROL AREA BOUNDARY: The present Indianapolis/St. Louis Center Boundary is defined, in part, by utilizing Federal Airway V 174 which is to be revoked July 28, 1960. It is requested that action be initiated to change this boundary as follows, to become effective at the same time V-174 is revoked: From a point 65 s(56 n) mi N of the Vandalia, Ill. VOR on the N edge of Federal Airway V-72 (the present Indianapolis/Chicago/St. Louis Control Boundary). Thence in a clockwise arc of 65 s (56 n) mi radius on the Vandalia, Ill. VOR to the S edge of Federal Airway V-12. Thence along a straight line to a point on the S edge of Federal Airway V-44, 5 s(4 n) mi E of the Samsville, Ill. VOR (the present Indianapolis/St. Louis Control Boundary).

JACKSONVILLE/MIAMI CENTERS FLIGHT ADVISORY AND CONTROL AREA BOUNDARY: Effective 0001 EST Aug 1 the Jacksonville/Miami Centers Flight Advisory and Control Area Boundary revised as follows: beginning at 28-43-30N, 80-58-45W; thence NW to 28-58-14N, 81-05-00W; direct 29-03-25N, 81-10-25W; 29-00-10N, 81-18-25W; S along the E edge of V-267 to 28-56-00N; thence W along 28-56-00N to the W edge of V-267; N along the W edge of V-267 to 29-00-00N; thence W along 29-00-00N to 29-00-00N, 81-33-55 W thence NW to 29-03-25N, 81-38-25W; clockwise along the SW edge of Restricted Area R-165 to 29-09-55N, 81-47-30W; NW to 29-15-15N, 81-55-15W on the Jacksonville/Miami boundary.

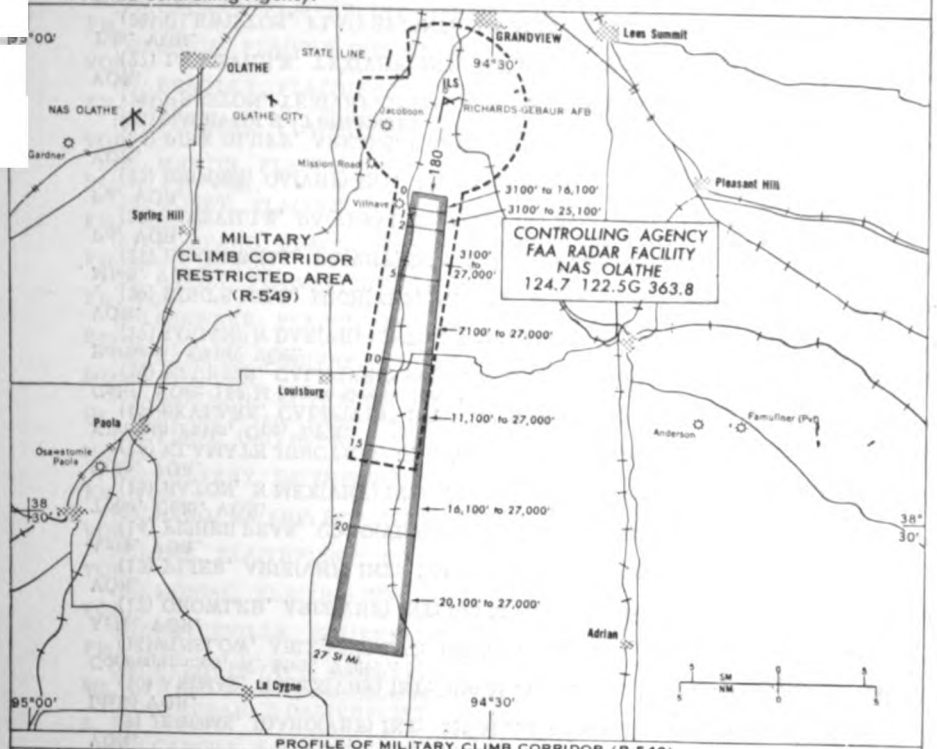
MISSOURI

SPECIAL NOTICE

SPECIAL NOTICE



MISSOURI

GRANDVIEW (RICHARDS-GEBAUR AFB) MILITARY CLIMB CORRIDOR

EFFECTIVE 0001 E.S.T. JULY 28, 1960

(This Special Notice will not normally be revised or reissued,)
Refer to Aeronautical Charts for current information)

Pilots of Century Series aircraft on active air defense missions are unable to see and safely avoid other aircraft during the climb phase of a scramble. In the interest of safety, the Dept. of Defense and the FAA have agreed to establish restricted corridors to segregate such operations from other air traffic. ALL FLIGHTS through these areas should obtain prior approval from the Controlling Agency.

✓ AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide Vol. 15, #6 dated 24 May 1960 as follows:
(1) Holding Patterns- Modified - effective 30 June 1960:
(a) Page 55, correct item (1) to read: NORWOOD, NORTH CAROLINA- change "NE on 021 M" to read: "NE on 071M".

Correct Airman's Guide Vol 15, #9 dated 5 July 1960 as follows:
(1) Page 132, Grandview (Richards-Gebaur AFB) Military Climb Corridor change the frequency in the Controlling Agency block to: "122.5G."

Correct Airman's Guide Vol. 15, #8 dated 21 June 1960:
(1) Page 53, the function of the new freq of 133.40 mc at Farmington, N. Mex. is listed as "I". Correct to read: "H".

RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

Effective upon date of publication in the Federal Register:

(Part 608)

(1) In Section 608.17, the Milford, Del., Restricted Area (R-12) is amended by deleting: "Designated altitudes - surface to 20,000' MSL. Time of designation - dalgt hrs only (when ceiling and visibility is 3 mi or better). Controlling agency - COMNAB, 4th Naval District, Lakehurst NAS, N.J." and substituting therefor: "Designated altitudes - surface to 3,000' MSL. Time of designation - from 0800 to 2200 lcl time April 15 thru Oct 31. From 0800 to 2200 lcl time, Sat and Sun only, Nov 1, thru April 14. Controlling agency - FAA, New York ARTC Center."
(2) In Section 608.24, the Brookville, Kansas, Restricted Area (R-196) is amended by deleting "Surface to 50,000' " and substituting therefor "Surface to 45,000' MSL."
(3) In Section 608.54, the Pendleton, Va., Restricted Area (R-74) is amended by deleting "Continuous" and substituting therefor "From 0800 to 1700 EST, Mondays thru Fridays."
(4) In Section 608.61, the Big Delta, Alaska, Restricted Area (R-346) is amended by deleting "Arctic Test Branch Army Field Forces, Fort Greely, Alaska" and substituting therefor "U.S. Army Arctic Test Board, Fort Greely, Alaska".

Effective 0001 EST 25 August 1960:

(1) In Section 608.38, Warren Grove, N.J., Restricted Area (R-26) is amended to read: Description by geographical coordinates - beginning at lat 39-46-10, long. 74-20-14; to 39-43-25, 74-17-37; 39-38-36, 74-23-27; 39-39-50; 74-25-52; 39-43-58, 74-24-13; to point of beginning. Designated altitudes - surface to 4,000' MSL. Time of designation - from 0700 to 1700 EST, daily, June 1 thru Aug 31. From 0800 to 1800 EST, Fridays, Saturdays and Sundays, Sept. 1 thru May 31. Controlling agency - New Jersey Air National Guard, 108th Tactical Fighter Wing (SD), McGuire AFB, New Jersey.

FEDERAL AVIATION AGENCY

(5) Page 119 add - Hilton Airport, New York - See this issue of Airgi page 18.
(6) Page 119 add - Broome Co. Arpt., Binghamton, New York - See this issue of Airgi page 18.

AIRCRAFT MANEUVERS WITHIN CONTROL ZONES: To reduce the potential for in-flight conflict between aircraft operated in the vicinity of controlled airports in VFR weather conditions, FAA airport traffic control specialists will approve only those maneuvers considered necessary for the safe and expeditious movement of air traffic within the associated control zones. For this purpose, maneuvers such as operation of aircraft at speeds in excess of the minimum speed consistent with safe operational limitations of an aircraft, formation fly-bys, and unnecessary low passes, will be considered as unusual and will not be approved.

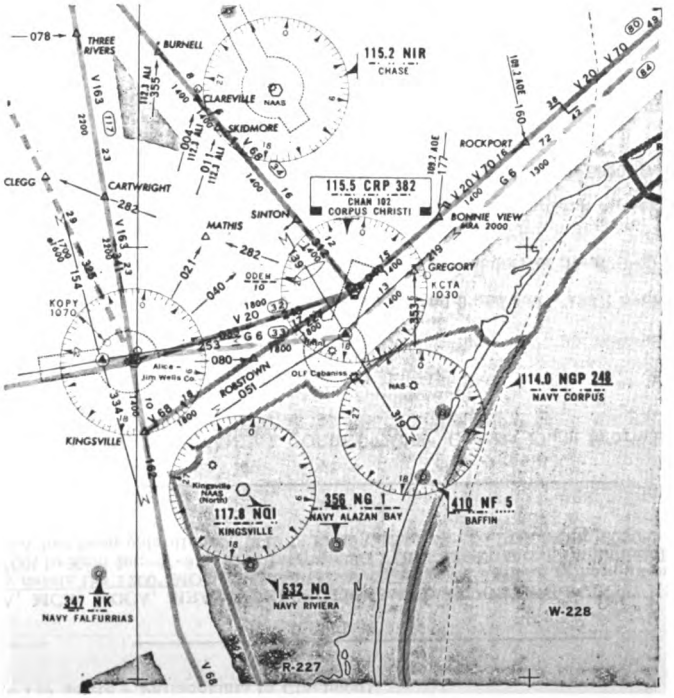
Maneuvers which will be approved, on a traffic permitting basis, include:

1. Normal take-offs and landings including 360° overhead approaches and those conducted in formation.
2. Practice instrument approaches including those conducted with a chase plane.
3. Touch-and-go landings.
4. Flight check activities such as short field take-offs and landings, engine out operations, checking of navigational aids, etc.
5. Simulated forced landing patterns including practice flame-out maneuvers.
6. Low passes for prearranged aircraft test or calibration purposes and visual equipment checks, such as gear checks, provided the flights are not conducted at an excessive speed.
7. Jettisoning of fuel tanks or other external stores.

RADAR WEATHER ADVISORY SERVICE(STAR GAZER) - On page 31 of the Flight Information Manual Volume 13 dated December 1959, Radar Weather Advisory Service(Star Gazer) will be discontinued on August 1, 1960, in the geographical area bounded by the following coordinates: 40-00N, 120-47W; NW to 41-25N, 121-50W; N to 45-50N, 121-50W; NE to 46-30N, 121-00W; N to a point on the U.S.-Canadian Border at 121-00W; thence E along the U.S.-Canadian Border to a point 113-25W; S to 42-00N, 113-25W; W to 42-00N, 119-25W; SW to the point of beginning.

RADAR - On page 30 of Flight Information Manual Volume 13, dated December 1959, add subtopic No-Gyro Vector or Approach - Aircraft Under Radar Control: A pilot under radar control will occasionally experience circumstances wherein his directional gyro or other stabilized compass is inoperative or inaccurate. When this occurs, he should so advise air traffic control and request a no-gyro vector or approach. Pilots of aircraft not equipped with a directional gyro or other stabilized compass who desire radar handling may also request a no-gyro vector or approach. Prior to commencing such vector/approach the pilot will be advised to make all turns at standard rate, and that turn instructions should be executed immediately upon receipt. For example, "Turn Right"; "Stop Turn." When a surveillance or precision approach is made the pilot will be advised after his aircraft has been turned onto final approach to make turns at half standard rate.

RADAR WEATHER ADVISORY SERVICE- On pages 31 and 32 of Flight Information Manual Volume 13 dated December 1959, under Radar Advisory Service Air Defense Command delete listings under Michigan, Oregon and Washington.



GOOD OPERATING PRACTICES-IFR RADAR DEPARTURE SERVICE AVAILABLE- On page 53 of Flight Information Manual Volume 13 dated December 1959, delete paragraph 12.

LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

BGQ	Big Lake, Alaska, Big Lake Airport (Assignment)
HLV	Hallsville, Mo., VOR (Assignment)
OWY	Owyhee, Nev., REP (Assignment)
SFD	Springfield, Vt., Radiobeacon (Assignment)

REVISION NOTICE

Effective August 8, 1960 all aircraft operations presently conducted at Cliff Maus Airport are to be moved to the new Corpus Christi, Texas International Airport and the Corpus Christi control zone redesignated.

(19 July 1960)

MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows, effective August 25, 1960:

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS:

ABILENE, TEXAS - Municipal Airport, Proc. No. ILS-35, Amdt. 1, Eff. 6 Aug. 60: Correct the second transition to read: "ABI-LFR to LOM" in lieu of "ABI-VOR to LOM".

The transmittal letter, dated 1 July 1960, forwarding procedures effective 13 Aug. 60, should be marked "Transmittal Letter No. 60-25."

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
From	To	Course and Distance	Minimum Altitude	Condition	Two Engine or Less: 65 Knots or Less	Two Engine or Less: More Than 65 Knots	More Than Two Engine, More Than 65 Knots
				Precision Approach

Special Notices page 59

FEDERAL AVIATION AGENCY

AIRMAN'S GUIDE

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and/or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Important or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and/or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below.

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction; or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.

VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:
Category I = Course alignment and signal coverage [illegible] Category II = No longer in use; formerly applied to VAR. Category III = Facility monitored solely through use of automatic visual course and signal level monitor with [illegible] VOR to be inoperative for a limited period [illegible] VHF ranges which are not controlled by an FSS, and located [illegible] with a VHF receiver will fall into Category III. NOTE: Category I, II, III [illegible] before name in Location Column.

LEGEND

NOTE: The Federal Government disclaims responsibility for [illegible]

(A) = Air Force facility
(N) = Navy facility
(P) = Private facility
(S) = State facility
(0700-2300) = Hours of operation local time
(3) = Monitoring category
→ = New or revised data
■ = Information deleted

RADIO CLASS DESIGNATIONS

Identification of VOR/VORTAC/TACAN Stations by Class (Operational Limitations)

Class	Normally Anticipated Altitude Service	Normally Anticipated Interference-free Distance Service
H-VOR	75,000' MSL	180 smi (156.31 nmi)
M-VOR	30,000' MSL	90 smi (78.16 nmi)
L-VOR	15,000' MSL	45 smi (39.08 nmi)

AC . . . . . Approach Control Tower, FAA (transmits on voice channel or associated ranges and ILS in addition to frequencies listed
B . . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, FAA
CI . . . . . Control Tower (City, County, Private, etc.)
CM . . . . . Control Tower (Military, listing only civil frequencies available)
CONSOLAN . . . LF/MF long range navigation aid, aircraft must have BFO oscillator
D . . . . . Doppler VOR/TAC
DME . . . . . Distance Measuring Equipment
DVRT . . . . . TACAN compatible VOR
FM . . . . . VHF low power [illegible] watts
GCA . . . . . Ground Controlled Approach System
H . . . . . Non-directional radio beacon with power 50 watts to less than 2 [illegible] watts
HH . . . . . Non-directional radio beacon [illegible] power 2000 watts or more
ILS . . . . . Instrument Landing System (localizer, glide slope, marker beacons)
J . . . . . L/MF/HF keyed voice facility on power other than range frequency
LFM . . . . . VHF low power [illegible]
LNM . . . . . Compass locator [illegible]
LOM . . . . . Compass locator [illegible] at Inner Marker site
MA . . . . . Portable-[illegible] vertical radiator, power less than 50 watts
MH . . . . . Non-directional radio beacon [illegible] power less than 50 watts
ML . . . . . Fan or [illegible] power less than 50 watts
MM . . . . . VHF marker beacon
MEA . . . . . Fan or [illegible] vertical radiator, power 50 watts or more, but less than 150 watts
MEL . . . . . Fan or [illegible] radiators, power 50 watts or more, but less than 150 watts
OM . . . . . VHF outer marker
PA . . . . . Fan or [illegible] vertical radiator, power 150 watts or more
PL . . . . . Fan or [illegible] radiators, power 150 watts or more
S . . . . . Simplified omni range, homing signal and or voice
T . . . . . Teletype
TACAN . . . . . UHF omni-directional bearing and distance type facility
TX . . . . . Press to talk type
V . . . . . Additional VHF voice feature on other than range frequency
VOR . . . . . VHF omni-directional range (omni-range)
VORTAC . . . . . Combination of VOR and TACAN
W . . . . . Without voice facilities on range frequency
Z . . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic inbearings.
2. All FAA MH facilities operate continuously unless cited as follows: (on req)
3. All FAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0700-2300)
4. VHF/LMr ranges listed with the same identifier are controlled by the same FSS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility.

RADAR AVAILABLE

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. ARSR = Air Route Surveillance Radar

FAA RADAR UNITS - Operate continuously at the locations listed below. Available to all pilots, civil and military. Contact associated FAA control tower on any frequency guarded for initial instructions, or in an emergency any FAA facility for information on nearest Radar Control. Weather minimums, associated runway and GCA procedures are listed in the Airman's Guide.

RADAR APPROACH CONTROL (RAPCON) - At certain USAF locations, approach control and the ASR portion of RAPCONS is operated by the FAA and service is available to all aircraft.

RADAR AIR TRAFFIC CONTROL CENTER (RATCC) - At certain US Navy locations, approach control and the ASR portion of the RATCCS is operated by the FAA and service is available to all aircraft.

RADAR BEACONS - Secondary radar beacon ground equipment is normally associated with a surveillance radar system and is used for target reinforcement and identification of aircraft equipped with a radar beacon transponder, either military or civil. One of two types of ground equipment is now available for operation at all FAA operated RAPCON facilities, some FAA air route traffic control centers, and at all ADC long range radar facilities.

AIR TRAFFIC CONTROL RADAR BEACON SYSTEM (ATCRBS) - ATCRBS is similar to and compatible with the military coded radar beacon equipment (Mark X (SIF)). Civil Mode A is identical to military Mode 3. Civil and Military transponders will be adjusted to reply in Mode A (military Mode 3) as follows:

1. **Civil turbojet aircraft transponders - reply on Code 40 at all times while in flight, unless otherwise advised.**
2. **Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 02 when operating on IFR flight plan unless otherwise advised by ground radar facilities.**
3. **Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 62 while operating VFR or VFR-on-top unless advised otherwise by air traffic control (ATC). Code 62 will also be used by such aircraft when operating VFR or VFR-on-top within radar advisory areas between flight levels 240 and 390, inclusive. (See ACIC En Route - High Altitude charts for radar advisory areas and procedures relating thereto.)**
4. **Under no circumstances shall civil aircraft operate on Code 00.**
5. **Civil and military transponders will be operated in "STANDBY" while taxiing for take-off and after landing, or when requested by ATC. This action is necessary to eliminate undesirable interference and clutter on certain radar displays. Therefore, departing pilots should turn transponder to "ON" as late as practicable before commencing take-off, and landing pilots should turn transponder to "STANDBY" as soon as practicable after completing landing roll.**
6. Civil and military pilots, when filing a domestic IFR flight plan, shall make known the fact that their aircraft are equipped with a functioning transponder by adding the word "transponder" immediately following the aircraft identification. An aircraft with a transponder not having coding capability (Basic Mark X) will be indicated by adding the words "no code" in the "Remarks" section of the flight plan.
7. Aircraft departing from within a United States domestic control area to points outside the United States will comply with 6 above. Transponder equipped aircraft entering a United States domestic control area from outside the United States will, when making the first radio report to the United States air traffic control center, advise of availability of such equipment by adding the words "transponder" or "no code transponder," as appropriate, to its identification.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach glide path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide slope desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with GCA which is an instrument approach aid, NOTE: Radar arrival and departure control available all locations, unless otherwise cited.

FAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 1180mc are not guarded; others listed plus 3023.5 kc are guarded unless otherwise shown under Remarks. Frequency 122.5 mc is guarded unless either 122.6 mc or 122.7 mc is shown. (Guarding frequencies not applicable to ARSR facilities) Emergency frequency 121.5 mc transmits and guards at all locations.

All acft contemplating VFR flt thru this area are advised to monitor one of the following FSS: Casper, Wyo; Chadron, Nebr; Rapid City, S. D. Durg trng periods, these stns will include an advisory message at the end of each wea bcst. (10-26)
CASPER AIR TERMINAL TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 nmi. Not to be used for auto pilot apchs. (12-5) About Aug 1, ILS lclzr and glide slope will be shut down until aprx Aug 20 - reconstr. (7-14)
CASPER RADIO: July 12 VOR shut down - reconstr. (7-14) Durg this period, following route structure and MEAs in efct: Unusable Awys: V1529 CKW-DIK; V19E CZI-DGW; J32V RKS-RAP; J13V LVM-CYS; V85W RKR-CPR; V26 CPR-RAP. Unusable Reporting Points: Alcova, Glenrock, Ross and San Creek Ints. Usable Awys: (Tmpry redesignated as follows with published MEAs and MCAs unless otherwise indicated) V26 CKW-Casper Int, 13,000'; V85 RKR-Casper Int., 11,000'; V298 BOY-Casper Int, SWK, 12,000'; V19 CZI-Casper Int- DGW, 9000'. Usable Reporting Points: Casper Int - CZI VOR R158° and DGW VOR R284°.
**CHEYENNE MUN ARPT: Due non-visibility twr unable to ctl tfc on ramp area N and NE of hangars on N side of arpt & ramp area within 100' radius of twr structure. (6-29)
★CHEYENNE RADIO: Aug 1, VOR class chgd to H-BVOR. Too late for Anra Page.
CODY MUN ARPT: Rnwy 9-27 clsd. (7-1)
DOUGLAS RADIO: DMET operg on test basis; channel 23. (3-18)
DUNOIR RADIO: DMET operg on test basis; channel 81. Soon, VOR voice ctl will be provided from Worland FSS. (6-17)
EVANSTON ARPT: New arpt reported 5 mi NNW, elev 6600' one dirt strip N/S 2800' in length, soft when wet. (3-2)
ROCK SPRINGS MUN ARPT: Rnwy 3-21, 200' SW end clsd, flagged, unlgtd; rnwy 7-25 800' W end from threshold lgts and 500' from W end of hard surface clsd, unflagged, due to 6' lgtd FAA detector obstn 50' inside of threshold lgts on W end of rnwy 7-25, to permit 40 to 1 safety glide margin; full length avbl for tkof. (5-16) Present usable length rnwy 3-21 is 5013' and rnwy 7-25, 6188'. (6-3)
SHERIDAN COUNTY ARPT: Caution, grass cutting in progress summer months. (6-29)
SHERIDAN RADIO: About Aug 8, VOR will be shut down until aprx Aug 27 - reconstr. Durg this period, following route structure & MEAs in efct: Unusable Awys: V1500 DNW-DPR; V19E BIL-SHR and SHR-CZI. Usable Awys (Tmpry redesignated as follows with published MEAs and MCAs unless otherwise indicated: V6, 1504-31 RNO-BAM via RNO R039° and BAM R231°: MEA 18,000'; V105 OAL-RNO, 12,000'. Unusable Reporting Points: Churchill and Yerington Ints. (7-15)
THERMOPOLIS MUN ARPT: 50' of entire length of rnwy 36-18 E of cntrline, clsd until aprx Aug 19, W side will remain open, but use with caution. (7-29)

PUERTO RICO: SAN JUAN, ISLE GRANDE ARPT: Tmpry twr lctd on NW corner of old trml bldg, due non-visibility tmpry twr unable to observe tfc on extreme S portion CG Navy ramp, ramp area E of CG hangar, extreme E end rnwy 9, ramp on N side J. Mack Aero hangar, and apch area of rnwy 27, Pilots will assume full responsibility for avoiding tfc in blind areas. 174' metal bldg lctd aprx 1000' SE of threshold rnwy 27, lgtd ngts by two steady red lgts. (6-9)
SAN JUAN-ISLA GRANDE ARPT TOWER: May 13, twr tmpryly relctd on NW corner of old trml bldg - renovation of twr structure . Soon, following freqs will be in use: 255 kc vice 369 kc; 233.8 mc vice 257.8 mc; and 250.2 mc. (7-20)
SAN JUAN, PUERTO RICO INTL ARPT: Access txwy to ANG parking apron lgtd; ditch at W side of ANG access txwy; use extreme caution while taxiing day and ngt. Transient facils avbl 1130-2000Z Mon-Fri but no parking space avbl. Caution, unlgtd perm jet blast fence 8' high, 20' long erected 10' W of W side of txwy to ANG ramp. Hi-intensity rnwy end identifier lgts lctd aprx 30' each side of apch end rnwy 7 comsnd. Men, eqpmt working vcnty of apch end rnwy 25; 20' derricks erected, area obstn lgtd. (1-7) Due to extsn of eastern end rnwy & txwy 39' lgtd dredge eqpmt operg 600' from end of rnwy, top of dredge 32.5' above rnwy at mean high water. (5-25)
SAN JUAN-RAMEY AFB RADIO: Soon, CM twr tsmtg freq 278 kc and rcvr 3023.5 kc will be decmsnd. (6-10)

VIRGIN ISLANDS: ST. CROIX, CHRISTIANSTED HAMILTON ARPT: Caution, acft making hand turn after tkofs to E. Men, eqpmt on E end of rnwy where 1200' extsn under constr; rnwy lgts E end tmpry lctd with exposed electric capbles across E end on Surface of rnwy. No runoff area avbl on E end.
ST. CROIX RADIO: No coverage to N and W on all UHF and VHF voice air/gnd channels. (2-17)
ST. THOMAS, CHARLOTTE AMALIE, TRUMAN RADIO: No coverage possible from N & E quads all VHF and UHF voice air/gnd channels - due terrain. (3-10)

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

MILITARY CLIMB CORRIDORS: ALL FLIGHTS desiring to traverse these areas must obtain prior approval from the Controlling Agency and maintain continuous listening watch on the appropriate frequency while traversing the corridor. The list of corridors, controlling agencies and frequencies follows:

Corridors	Controlling Agency	Frequencies
Alexandria (England AFB), Louisiana	England AFB	363.8;118.2;122.5G
Anchorage (Elmendorf AFB), Alaska	Anchorage Apch Ctl	122.5G; 119.1; 118.1; 270.6; 363.8
Burlington (Ethan Allen AFB), Vermont	Burlington Apch Ctl	118.3;122.5G;363.8
Camp Springs (Andrews AFB), Maryland	Andrews Apch Ctl	120.0;122.5G; 363.8
Columbus (Lockbourne AFB), Ohio	Columbus Apch Ctl	123.7;122.5G;274.3
Duluth Mun. Arpt., Minnesota	Duluth Apch Ctl	118.3;257.8; 122.5G
Falmouth (Otis AFB), Massachusetts	Otis RAPCON	124.7; 122.5G
Glasgow (Glasgow AFB), Montana	VFR Glasgow AFB Tower	126.2;236.6;122.5G
	IFR Great Falls ARTCC	123.9;301.4;307.2
Goldsboro (Seymour Johnson AFB), North Carolina	Seymour Johnson Apch Ctl	126.2;122.5G
Grand Forks (Grand Forks AFB), North Dakota	VFR Grand Forks AFB Tower	126.2;236.6
	IFR - Minneapolis ARTCC	120.8;283.7;301.4
Klamath Falls(Kingsley Fld), Oregon	Klamath Falls Apch Ctl	118.5;348.6
Merced (Castle AFB), California	Castle AFB Apch Ctl	118.9;122.5G;379.4

Youngstown Mun. Arpt., Ohio	Youngstown Apch Ctl	125.5;122.5G;257.8

G - Guards

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission; Army Air Fields are open to civil aircraft on authorization of the Air Field Commander.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS O, Hqs USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, Item 9 and page 73 - Position Reporting, in the Flight Information Manual. Volume 13, dated December 1959.
Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flgt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE(General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

WASHINGTON, D.C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D.C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U.S. Route 29 until past Falls Church. Departures proceed well right of U.S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Penetration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

JET ACROBATIC AREAS - VICINITY WASHINGTON, D.C. - Acrobatic maneuvers by jet aircraft are conducted daily, VFR daylight hours only, between the altitudes of 10,000' and 20,000' MSL inclusive, within the following areas:

Area #1: The uncontrolled portion of that airspace which is bounded on the N by V-174; on the E and SE by B-47 and V-140; and on the S by V-156.

Area #2: The uncontrolled portion of that airspace which is bounded on the N by V-156; on the E by V-140; on the S by V-290; and on the W by V-103.

REGULATIONS OF THE ADMINISTRATOR PART 570: Rules of Washington National Airport-"570. 49 - No pilots other than those possessed of at least a private pilot rating or the equivalent shall operate aircraft on the airport."

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York .FSS.. controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York . FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

✓ INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT: Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D. C. (Attention: FS-1). This does not apply to portable recorders and dictating machines which meet Military Specifications MIL-I-16910 or other comparable military specifications nor to hearing aids.

TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meterological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-frequency (200-400 kc) navigational aid (L/MF range or H facility.)

Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Boise, Idaho	359 kc
Boston, Mass.	382 kc
Chicago, (Joliet), Ill.	350 kc, 257 kc
Cincinnati, Ohio	335 kc
Cleveland, Ohio	344 kc
Denver, Colo	379 kc
Fort Worth, Texas	365 kc
Indianapolis, Ind.	266 kc
Los Angeles, Calif.	332 kc
Milwaukee, Wisconsin	242 kc
Minneapolis, Minnesota	266 kc
New York, N. Y.	209 kc
Oakland, Calif.	362 kc
Pittsburgh, Pa.	254 kc
Washington, D. C.	332 kc
Wichita, Kans.	332 kc

✓ PREFERRED ROUTES CORRECTIONS: Airman's Guide Volume 15, Number 9 dated 5 July 1960:

(1) Page 126, Buffalo to Boston should read: V2 SYR V2S ALB V2.
(2) Page 127, Cincinnati to Detroit (City) should read: V275 VWV V47 Milan SVM.
(3) Page 127, Cincinnati to Detroit (Metro. Wayne Co.) should read: V275 VWV V47.
(4) Page 127, Cincinnati to Detroit (Willow Run) should read: V275 VWV V47.
(5) Page 130, Pittsburgh to Boston should read: V119 V276 V35 ELM V72 ALB V2.

The following effective 20 August 1960:

(6) Page 127, Chicago (O'Hare) to Philadelphia should read: V84 PMM V30 VWV V92 MFD V8 PIT V12 V29 Darby.
(7) Page 128, Jacksonville to Idlewild should read: V51E Baxley V157 FLO V3 RDU V155 LVL V157 RIC R77 DOV MIV V16 V1.

✓ ATC PROCEDURES - On page 78 of the Flight Information Manual Volume 13 dated December 1959 paragraph under Approach Control line 8: delete the phrase "plus the LF range voice channel".

(2 August 1960)

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by the USAF when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 43-22-30N, 94-04-00W, (entry-call Mason City Radio), 43-28N, 91-00W, 42-21N, 90-54-30W; 40-25N, 92-07-30W; 40-22N, 92-31W(end nav. leg) to target Ottumwa Radio); remainder of route is identical with above.

Route 2-M-1: Start at 31-45N, 91-49W (entry-call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N, 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg). 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N, 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-R-2: Start at 35-38N, 99-11W; to start climb point 36-12N, 98-14W; to termination 36-45N, 98-11W. Entry reporting point- Sayre Radio.

Route 2-R-3: Start at 36-22N, 92-14W; to 36-26N, 93-50W. Entry reporting point-Springfield Radio.

Route 2-S-1: Start at 29-29, 91-46, (entry reporting point-Baton Rouge VOR); to turning point 28-00, 91-30; to turning point 27-00, 92-30; to turning point 27-50, 94-00; to navigation termination point, bomb run entry point, and LONG LOOK start climb (if applicable) 27-50, 95-45; to SHORT LOOK start climb (if applicable) 28-11, 96-34; to target at Matagorda Island 28-13-30, 96-39-00. After bombs away, proceed to 28-21-30, 96-42-00, then right turn to Palacios VOR. On SHORT LOOK mission do not exceed 5000' MSL until past Port O'Connor, Texas. On LONG LOOK do not descend below 18,000' MSL until past Port O'Connor, Texas.

Route 2-T-1: Start at 42-00N, 96-12W; to target 42-51N, 97-29W. (Entry reporting point-Sioux City Radio).

Route 2-T-2: Start at 42-30N, 97-49W to target 41-26.5N, 96-36W. (Entry reporting point Point-O'Neil Radio).

✓ Route 8-J: Cross Florence VOR at flt alt (entry point - call Jacksonville ARTCC) descend to start low level 34-22N, 79-05W; 33-21N, 80-05W; 32-08N, 82-11W; 31-20N, 81-54W; 30-32N, 82-51W; 30-21N, 83-00W; 29-47N, 83-30W; 28-48N, 82-42W. Start climb to target Tampa/St. Petersburg.

✓ Route 8-J Alternate: Cross Tallahassee L/F at flt alt (entry point - call Jacksonville ARTCC) descend to start low level 29-31N, 83-24W; 28-48N, 82-42W. Start climb to target Tampa/St. Petersburg.

✓ Route 8-K: Cross Niagara Falls TACAN/TVOR at flt alt (entry point - call Cleveland ARTCC) descend to start low level 42-49N, 77-18W; 42-14N, 79-21W; 42-07N, 79-30W; 40-55N, 79-28W; 40-50N, 78-57W; 42-28N, 76-55W; 42-46N, 76-16W; 42-47N, 76-08W; 42-28N, 73-55W. Start climb to target Springfield. NOTE: This route is used by jet fighter aircraft on Sats and Suns.

✓ Route 8-K Alternate: Cross Syracuse VOR at flt alt (entry point - call Boston ARTCC) descend to 42-28N, 73-55W. Start climb to target Springfield.

✓ Route 8-M: Cross Columbia VOR at flt alt (entry point - call Columbia Radio) descend to 34-23N, 80-25W. Start climb to target Charlotte.

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N, 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

✓ Route 8-S: Cross Nantucket VOR at flt alt (entry point - call Boston ARTCC) descend to start low level at 41-23N, 70-03W; 41-12N, 67-25W; 42-30N, 66-40W; 43-00N, 68-30W; 43-38N, 68-44W; 43-53N, 68-17W. Start climb to target at 44-46N, 67-50W.

✓ Route 8-S Alternate: Cross Brunswick TVOR at flt alt (entry point - call Boston ARTCC) descend to start low level at 43-53N, 68-18W. Start climb to target 44-46N, 67-50W.

✓ Route 8-T: Cross St. Petersburg VOR at flt alt (entry point - call Tampa Approach Control) descend to start low level at 27-33N, 83-16W; 27-30N, 84-43W; 27-24N, 84-51W; 26-10N, 85-00W; 26-00N, 84-51W; 25-51N, 81-41W; 25-56N, 81-32W; 26-57N, 81-03W; 27-01N, 81-03W. Start climb to target at 27-39N, 81-16W.

✓ Route 8-T Alternate: Cross Ft. Myers VOR flt alt (entry point - call Miami ARTCC) descend to start low level at 25-51N, 81-41W; 25-56N, 81-32W; 26-57N, 81-03W. Start climb to target at 27-39N, 81-16W.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15 - A - 3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-D-3: Start descent at Hudspeth VOR, Texas to start low level point at 31-08N, 105-10W to start climb at 30-48N, 104-46W to target at 30-18N, 104-02W.

Route 15-E-1: Start descent 44-28N, 100-40W, entry point 44-34 1 2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1 2N, 103-36W.

Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-G-1: Cross Ukiah, California VOR at flight altitude (entry point) - (Call Ukiah Radio), descend to start low level 39-06N, 124-17W to 39-08N, 124-45W; 40-24N, 125-29W; 42-20N, 125-35W; 43-08N, 126-00W to climb point 43-32N, 124-48W to start climb for Long Look at 43-43N, 124-17W or to start climb for Short Look at 43-54N, 123-20W to target 43-58N, 123-05W, S of Eugene, Oregon.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.

Route 15-M-2: 36-18 1 2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.

Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

Effective upon date of publication in the Federal Register:

(1) In Section 608.25, the Fort Knox, Ky., Restricted Area (R-64) "U.S. Army Armored Center, Fort Knox, Ky." is deleted and "The FAA, Standiford Ctl Twr, Louisville, Ky." is substituted therefor.

(2) In Section 608.30, the Sturgeon Bay, Mich., Restricted Area (R-502) is amended by deleting "0800-1800C, Mon-Fri" and substituting therefor "0900-1600 C.S.T., Mon-Fri.".

(3) In Section 608.39 the (a) Los Alamos, New Mexico Restricted Area (R-5A) is added: Description of geographical coordinates -beginning at lat 35-45-15, long. 106-15-12; thence to 35-50-03, 106-21-36; 35-52-22, 106-20-42; 35-52-52, 106-16-48; 35-52-30, 106-14-48; 35-48-35, 106-14-48; 35-47-05, 106-12-06, thence to point of beginning. Designated Altitudes-surface to 12,000' MSL. Time of designation - continuous. Controlling agency: U.S. Atomic Energy Commission, Los Alamos, New Mexico.

(4) In Section 608.39 the (b) Los Alamos, New Mexico Restricted Area (R-5B) is added: Description by geographical coordinates - beginning at lat 35-52-53, long' 106-14-06; thence to 35-53-03, 106-16-09; 35-54-45, 106-16-09; thence on the arc of a circle with a radius of 10,000', centered at 35-53-03, 106-16-09, to the point of beginning. Designated altitudes - surface to 12,000' MSL. Time of designation - continuous. Controlling agency - U.S. Atomic Energy Commission, Los Alamos, New Mexico.

Effective 0001 EST 22 September 1960:

(5) In Section 608.14, China Lake South, Calif., Restricted Area (R-278A) add: Description by geographical coordinates - beginning at lat 35-37-30, long. 117-41-30; thence to 35-24-00, 117-40-30; 35-24-00, 117-46-30; 35-37-30, 117-47-30; thence to point of beginning. Designated altitudes - surface to 6,000' MSL. Time of designation - sunrise to sunset, Mon thru Fri. Controlling agency - Commander, Naval Ordinance Test Center, China Lake, Calif.

(6) In the text of Section 608.53, Underhill, Vermont, Restricted Area (R-87) "Surface to 10,000' MSL" is deleted and "Surface to 5,000' MSL" is substituted therefor.

(7) In Section 608.57, the Sheboygan, Wisconsin, Restricted Area (R-83c) is revoked.
